SUMMARY

Experienced business intelligence analyst with expertise in designing and managing dashboards, reporting, developing efficient ETL pipelines, and transforming raw data into actionable insights. Skilled in cross-functional collaboration with IT, governance, data security, and business teams to align data strategies with evolving needs and gather business requirements. Adept in customer-facing roles, delivering training and tailored solutions, ensuring data integrity, and supporting data governance best practices. Proficient in advanced SQL, Python, Tableau, Cloud, and ETL Tools.

TECHNICAL SKILLS

Programming Languages: SAS, R, Python(pandas, numpy), MySQL, MS Access, Linux Shell Scripting

Tools: Tableau, PowerBI, Alteryx, Azure, Microsoft Excel, Salesforce, Snowflake

Others: Data Transformation, Business Intelligence, Project Management, Data Manipulation, Big Data, Data Analytics

EXPERIENCE

Student Supervisor, Data Analytics

Mar. 2023 – Dec 2024

Aramark

- Created Power BI dashboards to monitor sales and other KPI, used **Power Automate** to schedule reports.
- Conducted data analysis to identify trends and actionable insights, leading to improved revenue generation.
- Designed predictive models with 90% accuracy to optimize staff allocation during peak demand periods.

Data Analyst

Jun. 2021 – Feb. 2023

Acube Business and Technologies Solutions

- Developed **tableau** dashboards to highlight performance insights, reducing reporting time by 30% and delivering complex metrics with high accuracy.
- Developed and optimized scalable database designs, supporting analytics for functional teams and improving query performance by 30%.
- Designed and managed ETL pipelines using **Azure** and **Snowflake**, reducing data processing time by **40%** and enhancing reporting accuracy across 100K+ data records.
- Automated data processes using **Python** and **SQL**, reducing manual work by 40% and improving data delivery.
- Collaborated with business stakeholders and IT teams to gather and document business requirements.

Senior Associate

Jun. 2019 - May 2021

CDK Global

- Conducted in-depth data analysis using **SQL** and **Python**, leading to a 20% increase in operational efficiency.
- Created Extract, Transform, Load (ETL) processes to integrate data from different sources, ensuring data quality.
- Built and maintained **interactive tableau dashboards**, enabling real-time monitoring of KPIs and decision-making for leadership.
- Optimized and troubleshoot SQL queries and stored procedures to ensure optimal performance.
- Conducted training sessions for customers, enhancing their proficiency in data tools and analytics.

Trainee Engineer

July 2017 - May 2019

Netxcell Limited

- Developed ad-hoc reports using **SQL** querying based on the requests including report enhancements/fixes.
- Maintained database systems and optimized risk management ensuring **99.9% uptime**. reducing application.
- Created reports and data forecasts for financial analysis and operational planning, improving accuracy by 20%.
- Enforced data privacy and data governance controls to protect sensitive information and maintain data integrity.

EDUCATION

University of Delaware

Newark, USA

Master's in Business Analytics and Information Systems Management

Feb 2023 - Dec 2024

CERTIFICATIONS

Qlik Sense Business Analyst, SAS Coding Certified Specialist: Base Programming Using SAS 9.4, Alteryx Core
