Professional Summary

Certified Network Security Engineer with 10+ years of experience in threat analysis, vulnerability management, and system optimization. Skilled in antivirus operations, DLP strategies, and compliance with ISO 27001/NIST frameworks. Holding CCNA/CCNP and LPIC-1 certifications, with expertise in Windows Server and Azure. Proven ability to lead security initiatives and deliver compliant solutions on time and within budget.

Skills

- Network Security and Threat Monitoring
- Data Loss Prevention (DLP) Implementation
- Project Reporting and Documentation
- SIEM Monitoring and Log Analysis
- Threat intelligence
- Antivirus and Firewall Management
- Vulnerability Assessment and Mitigation
- Team Training and Leadership
- ISO 27001/NIST Compliance
- Social engineering prevention

Work History

Network Security Consultant, 12/2023 to Current

Freelance

- Reviewed and audited clients' facility security management programs.
- Promoted safety and security by providing consistent armed security for diverse events.

Senior Network Security Engineer, 03/2014 to 09/2023

Shabakeh Gostar

- Analyzed and maintained security architecture, overseeing antivirus operations for large-scale infrastructures supporting over 5,000 clients, achieving a 40% reduction in vulnerabilities.
- Configured and deployed antivirus management servers, proactively monitoring and mitigating threats while implementing best practice policies to ensure compliance with security standards.
- Led team training initiatives on security software, conducted product testing, and developed comprehensive user documentation to enhance operational efficiency.
- Collaborated with vendors to troubleshoot and resolve complex security issues, and prepared detailed performance reports to track project progress, ensuring timely completion within budget constraints.

Technical Support Engineer, 12/2008 to 12/2011

Shabakeh Gostar

- Supported security architecture by monitoring and maintaining antivirus and firewall solutions, with a focus on McAfee, ensuring timely resolution of issues related to updates and threats.
- Delivered comprehensive project reports, conducted troubleshooting for network and software issues, and provided client support via phone, email, and remote access.
- Addressed a range of technical challenges, including cabling, FTP access, Outlook configurations, operating system installations, and hardware-related concerns to ensure seamless operations.

Education

Master of Information Security 01/2024

Stockholm University

Master of Computer Networks Engineering 01/2014

Halmstad University

Bachelor of Computer Hardware Engineering 01/2007

Azad University - Iran
