

Sneha Eslavath

Python Developer

Email address: snehaeslavath04@gmail.com

Contact details: 201-673-4343

Professional Summary:

- Over 5 years of experience in the IT industry with proficiency in Analysis, Design & Development Testing of Enterprise Applications and Database Development using, **Python** and **SQL** projects.
- Experienced in complete Software Development Life Cycle, and major aspects of technological projects including Requirement Analysis, Design, Development, Database Design, Deployment, Testing, Debugging, and Application Maintenance.
- Hands on Experience in **AWS** like Amazon EC2, Amazon S3, Amazon Redshift, Amazon EMR and Amazon SQS.
- Implemented Spring boot microservices to process the messages into the **Kafka** cluster setup
- Involved in dealing with various development methodologies like Waterfall, Scrum, and Agile.
- Experienced with **WAMP** (Windows, Apache, MySQL, and Python) and **LAMP** (Linux, Apache, MySQL, and Python) Architecture.
- Proficient in **JSON** based **RESTful** web services, and **XML** based **SOAP** web services.
- Understanding of **Python** best Practices (PEP-8).
- Development of platform components using object-oriented Perl and Unix shell scripting
- Experience of working with relational databases like **Oracle**, **SQLite**, **MySQL**, **DB2**, **SQL server**
- Experience in project deployment using **Heroku**, **Jenkins** and **Amazon Web Services (AWS)**.
- Worked on various Operating Systems like **UNIX**, **Linux**, **Windows**, and **Mac OS**.
- Sound knowledge with version control systems like **Git**, **GitHub**, **CVS**, and **SVN** to keep the versions and configurations of the code organized.
- Fast learners can quickly incorporate and implement new procedures with efficiency and accuracy
- I am highly motivated, dedicated, quick learner and have proven ability to work individually and as a team.
- Excellent written and oral communication skills with results-oriented attitude.

Technical Skills:

Primary Languages	Python 3.x,2.7/2.4, SQL
Python Libraries	Pandas, NumPy, SciPy, Matplotlib, urllib2, Network, MySQL dB
IDE Tool	PyCharm, Eclipse, PyDev
Web Technology	HTML, CSS, Bootstrap
RDBMS	MS-SQL, MySQL, Oracle
Operating Systems	Windows Variants, LINUX, UNIX
AWS	Amazon EC2, S3, RDS, ELB, EBS, Auto Scaling, Lambda, API Gateway
DevOps	GIT, GitHub, Jenkins, Docker, Ansible

Professional Experience:

Client: Center point Energy ,Houston, TX

Jan 2023 –Till Date

Role: Python Developer

Responsibilities:

- Responsible for Design and development of web applications using **Python**. Developed **Python** based **APIs**.
- Developed web-based applications using **Python**, **XML**, **CSS**, **HTML**, **DHTML**
- Test and execute all data transformation, extraction, and load activities
- Have been involved in implementing security features for the **APIs**.

- Experience in Amazon Web Services (AWS) Cloud services such as **EC2, EBS, S3, VPC**, and **Elastic Load Balancer**.
- Used **Lambda** function for Infrastructure automation.
- Setup database in **AWS** using **RDS** and configuring backups for **S3** bucket.
- Worked on Amazon **EC2** Clusters to deploy files into Buckets.
- Deployed and tested different modules in **Docker** containers and **GIT**. Implemented programming automations using **Jenkins** and **Ansible** on **Unix/Linux** based OS over cloud like **Docker**.
- Develop Perl modules for internal use
- Development of complex applications using object-oriented Perl and Unix shell scripting
- Migrated the Django database from **SQLite** to **MySQL** to PostgreSQL with complete data integrity.
- Deployed the project onto the **Jenkins** server and organized the configurations and versions of the code using **SVN** version control system.
- Used **AWS** for application deployment and configuration. Responsible for setting up **REST APIs** using **Django**.
- Creating and maintaining deployment of Pipelines.
- Knowledge of version control systems (**Git**) and modern version control for use in continuous deployments
- Implemented **shell** script to integrate with **Python** Script
- Developed **Python** Scripts to Pull and publish data in **OL**
- Have been involved in implementing security features for the **APIs**.
- Experience in Amazon Web Services (**AWS**) Cloud services such as **EC2, EBS, S3, EFS**, and **RDS**.
- Setup database in **AWS** using **RDS** and configuring backups for **S3** bucket.
- Configured and set up **New-Relic** alerts.
- Configured Splunk in instance, user data to set up logs
- Experience in **producing** support for export and import code.
- Involved in maintenance activities.
- Build servers using **Jenkins for rehydration**.
- Development of complex code using object-oriented **Python** and **Unix** shell scripting
- Knowledge of version control systems (**Git**) and modern version control for use in continuous deployments

Environment: Python 3.x/2.7, AWS, DevOps, Bootstrap, PostgreSQL, Eclipse, JSON, Shell Scripting, HTML, XHTML, Git, CSS, AJAX, Apache Web Server, My-SQL, Windows, Linux.

Client: Techouts, India

June 2020 to May 2022

Role: Python Developer

Responsibilities:

- Designed, developed, tested, deployed and maintained the website.
- Developed entire frontend and backend modules using **Python**.
- Developed **Python scripts** to update content in the database and manipulate files.
- Rewrite existing Java application in **Python module** to deliver certain format of data
- Developed entire frontend and backend modules using Python.
- Generated property list for every application dynamically using **Python**.
- Designed and developed the UI of the website using **HTML, XHTML, AJAX, CSS** and **JavaScript**.
- Wrote **Python** scripts to parse XML documents and load the data in database.
- Generated property list for every application dynamically using **Python**.
- Handled all the client-side validation using **JavaScript**.
- Designed and developed data management system using **MySQL**.
- Creating unit test/regression test framework for working/new code.
- Responsible for search engine optimization to improve the visibility of the website.
- Responsible for debugging and troubleshooting the web application.

Environment: Python, Django, PyQT, PyQuery, MySQL, HTML, CSS, JavaScript, Ajax, Web Services (SOAP), XML, PL/SQL, and Oracle SQL Developer.

Client: AKTRIX Technologies, HYD
Python Developer

Jun 2018 to May 2020

Responsibilities

- Responsible for gathering requirements, system analysis, design, development, testing and deployment.
- Developed **Python batch** processors to consume and produce various feeds.
- Python based GUI components for the front-end functionality such as selection criteria.
- wrote **Python** scripts to parse **XML** documents and load the data in database.
- Generated property list for every application dynamically using **Python**.
- Used **Python NumPy** library to visualize data point using interactive charts. Designed data visualization to present current impact and growth.
- Utilized **PyQt** to provides GUI for the user to create, modify and view reports based on client data.
- Developed custom reports using **HTML, Python and MySQL**.
- Developed monitoring and notification tools using **Python**.
- Created Data tables utilizing **PyQt** to display customer and policy information and add, delete, update customer records.
- Created **PyUnit**test cases for unit testing.
- Added the navigations and paginations and filtering columns and adding and removing the desired columns for view.
- Used **Github** for version control.
- Worked in an **agile** development environment.

Environment: Python, MySQL, Linux, HTML, CSS, AJAX, PyUnit, XML, Apache Web Server.

Education Details:

Masters in computer science and information technology sacred heart university
