

Sravya Amudala

Java Full Stack Developer

E: sravyaamudalaa@gmail.com | Ph: +1 (940)268-0843 | LinkedIn

SUMMARY:

Java Full Stack Developer with 5+ years of experience in designing, developing, and deploying full-stack applications. Proficient in Java, Spring Boot, and microservices architecture, with strong expertise in cloud-native development using AWS and Azure services. Skilled in containerization with Docker and Kubernetes, implementing CI/CD pipelines, and managing high-performance applications. Experienced in real-time data processing with Apache Kafka and Flink. Adept at modern frontend development using React and Angular, with expertise in state management libraries like Redux and mobile development frameworks like React Native. Enhanced user experiences with Tailwind CSS and Next.js. Proficient in secure authentication with OAuth 2.0, JWT, and Keycloak, delivering robust, scalable, and secure systems in agile environments. Familiar with OWASP principles and API security best practices to ensure compliance with modern security standards.

TECHNICAL SKILLS:

- **Languages:** Java (7/8/11), Python, Kotlin, TypeScript, SQL
- **Frameworks:** Spring Boot, Spring Data, Spring Security, Hibernate, Spring Cloud, Next.js
- **Frontend Development:** HTML5, CSS3, JavaScript, Angular (9/10/13/15), ReactJS, Redux, Bootstrap, Tailwind CSS
- **Database:** MySQL, Oracle, NoSQL (MongoDB, Elasticsearch, Cassandra), PostgreSQL
- **Web Services:** RESTful APIs, SOAP, GraphQL, Swagger, Apache Kafka
- **Cloud Platforms:** AWS (EC2, S3, Lambda, API Gateway), Azure (Functions, DevOps)
- **Containerization:** Docker, Kubernetes
- **DevOps Tools:** Jenkins, Terraform, Git, GitHub, Helm, Pulumi
- **Monitoring/Testing:** AWS CloudWatch, JUnit, Mockito, Selenium, JMeter, Prometheus, Grafana
- **Version Control:** Git, GitHub, SVN
- **Other Tools:** CI/CD Pipelines, Apache Maven, Log4j, Nagios, ELK Stack
- **Operating Systems:** Windows, Linux

PROFESSIONAL EXPERIENCE:

Client: Mizuho Bank, New York, NY

Mar 2023 – Current

Java Full Stack Developer

- Developed scalable microservices with Spring Boot, containerized with Docker, and deployed on AWS, enabling a 25% improvement in system reliability.
- Enhanced dynamic web interfaces using Angular and React, leveraging TypeScript for type safety and better maintainability.
- Implemented real-time financial transaction processing with Apache Kafka, ensuring seamless data flow and accurate updates.
- Designed and optimized PostgreSQL queries, reducing query execution time by 30% in high-transaction systems.
- Automated CI/CD pipelines using Jenkins, improving deployment efficiency by 50%.
- Streamlined container orchestration with Kubernetes, achieving high availability and fault tolerance.

- Improved system monitoring with ELK Stack and AWS CloudWatch, reducing troubleshooting time by 20%.

Environment: Java, Spring Boot, React, Angular, Docker, Kubernetes, Kafka, PostgreSQL, AWS (EC2, Lambda, CloudWatch), Jenkins, ELK Stack.

Client: Bizzon Info Solutions, India

Apr 2021 - July 2022

Software Developer

- Designed and developed scalable applications using AngularJS, Spring Boot, and RESTful Web Services.
- Led migration of legacy systems from SQL to MongoDB and Elasticsearch, reducing response times by 25%.
- Utilized Apache Kafka for reliable and timely data streaming in high-volume transactions.
- Containerized microservices with Docker, improving deployment efficiency across environments.
- Automated build and deployment pipelines using Jenkins, accelerating time-to-market.
- Built single-page applications using AngularJS, enhancing UI responsiveness.
- Designed user interfaces with React, leveraging reusable components for scalability.
- Enhanced login security with Spring Security and OAuth 2.0, reducing vulnerabilities by 30%.
- Wrote SQL queries and managed NoSQL databases to enhance data performance.
- Developed unit and integration tests with JUnit and Mockito for reliable releases.
- Deployed services on AWS EC2 and monitored performance with CloudWatch.
- Participated in Agile sprints, ensuring timely delivery of features.
- Conducted database performance tuning for SQL and NoSQL systems.

Environment: Java, Spring Boot, AngularJS, Apache Kafka, MongoDB, Elasticsearch, Docker, Jenkins, AWS EC2, Spring Security, OAuth 2.0, JUnit, Mockito.

Client: Erudite Soft, India

May 2018 - Mar 2021

Software Developer

- Developed RESTful web services with Spring Boot and JAX-RS, enabling distributed system communication.
- Implemented dynamic web pages with HTML5 and backend services using JSP and Hibernate.
- Automated data extraction and processing using Perl scripts, reducing manual efforts.
- Designed SOAP-based web services with Apache Axis2 for legacy integrations.
- Automated deployment pipelines using Jenkins and Docker, reducing deployment time by 40%.
- Developed unit and integration tests with JUnit and Selenium, achieving 90% code coverage.
- Refactored legacy code, improving performance through modern design patterns.
- Managed Oracle database schemas, optimizing queries for better application performance.
- Implemented logging and monitoring with Log4j and Nagios for efficient troubleshooting.
- Migrated on-premises applications to AWS, leveraging EC2 and S3 for scalability.
- Created UML diagrams (use cases, class diagrams, sequence diagrams) for system design documentation.
- Secured APIs with Spring Security and JWT for robust authentication mechanisms.

Environment: Java, Spring Boot, JSP, Hibernate, SOAP, Oracle, Docker, Jenkins, AWS EC2, Spring Security, JUnit, Selenium, Log4j, Nagios.

EDUCATION:

- **Master of Science in information systems** from University of North Texas, Denton, Texas – USA - 2024
- **Bachelor of Commerce** from Osmania University – India - 2019
