

Steven Colunga

Senior Software Engineer

+1 657-565-4055 steven.colunga@outlook.com <https://www.linkedin.com/in/steven-colunga-71625a363>

Driscoll, Texas, United States

SUMMARY

Senior Software Engineer with **12+ years** building **AI-augmented web applications**, specializing in **LLM integration (AWS Bedrock)** and **agentic workflow automation**. Proven expertise in developing scalable Python backends and Angular frontends that leverage generative AI for NLP and complex task automation. Passionate about bridging cutting-edge AI with intuitive user experiences.

Core Competencies

- ✓ GenAI & LLMs: AWS Bedrock, RAG, Agentic Workflows, NLP
- ✓ Full-Stack Dev: Python (Django/Flask), Angular, REST/GraphQL
- ✓ Cloud & DevOps: AWS (Lambda, Sagemaker), CI/CD, Docker
- ✓ Technical Leadership: Scalable Architecture, Cross-Functional Collaboration

EXPERIENCE

Senior Software Engineer | REMOTE

VIENNA, VIRGINIA

Conscious Networks

09/2022 – 03/2025

- Architected LLM-powered web app using AWS Bedrock (Claude/LLaMA) for document analysis, reducing manual review time by 65%
- Built agentic workflow system with Python/Flask for automated document processing (planning + tool usage modules)
- Developed Angular dashboard visualizing AI outputs with real-time streaming, improving user engagement by 40%
- Designed GraphQL API layer unifying 3+ foundation models and legacy databases (PostgreSQL + MongoDB)

Full Stack Engineer | REMOTE

LAGUNA BEACH, CALIFORNIA

SavvycomSoftware

12/2019 - 08/2022

- Created multi-agent customer support system with memory-augmented LLMs (Python/Django), handling 10K+ monthly queries
- Optimized RAG pipeline using AWS Bedrock's Titan embeddings, improving answer accuracy by 32%
- Implemented Angular/TypeScript chat interface with streaming responses, achieving 95% user satisfaction
- Led migration from monolithic to microservices architecture, cutting deployment times by 50%

Full Stack Engineer | ONSITE

CHARLOTTE, NORTH CAROLINA

AT-NET Services

04/2017 - 11/2019

- Developed Python/Flask API for legal document generation using GPT-4, saving 20+ hours/week for clients
- Built real-time collaboration features in Angular with WebSocket integration, enabling concurrent editing by 50+ users
- Designed hybrid database solution (PostgreSQL for transactions, Redis for AI agent memory)
- Implemented CI/CD pipeline with AWS CodePipeline, reducing production bugs by 60%

Full Stack Engineer | ONSITE

LANCASTER, PENNSYLVANIA

NGS Solution

11/2012 - 03/2017

- Prototyped AI planning agent for logistics optimization (Python + LangChain), reducing routing costs by 22%
- Created admin dashboard (Angular Material) for monitoring LLM performance metrics and cost tracking
- Integrated AWS Sagemaker with Django backend for custom model fine-tuning
- Authored technical docs for AI/API systems, accelerating onboarding for 5+ new engineers

SKILLS

Python (Django, Flask, FastAPI), Angular (TypeScript, RxJS), AWS (Bedrock, Lambda, Sagemaker), LLM Integration (RAG, Fine-Tuning), Agentic Systems (Planning/Reasoning/Tools), GraphQL, REST APIs, PostgreSQL, MongoDB, Docker, CI/CD, WebSockets, NLP, AI Orchestration (LangChain), Unit Testing (PyTest, Jasmine)

EDUCATION

Bachelor's Degree in Computer Science

University of Texas at Austin, [GPA 3.8/4.0](#)

08/2008 - 07/2012
