

Steven Hoy

Senior Software Engineer, Full Stack & AI & Frontend Specialist

shoy711@protonmail.com

+1 385 367 3717

Texas, United States

SUMMARY

A results-driven Full Stack Engineer with a deep expertise in building scalable, high-performance applications. I excel in creating dynamic, responsive front-end solutions using **React.js**, **Next.js**, and **Vue.js**, while architecting robust and efficient back-end systems with **Python** and **Golang**. With a strong focus on integrating **AI technologies** such as **OpenAI GPT**, **TensorFlow**, and **Azure AI**, I drive innovation in application development. Additionally, I have extensive experience optimizing **AWS**, **Azure Cloud** deployments for enterprise-grade applications, ensuring seamless scalability, security, and performance.

EXPERIENCE

Senior Full Stack Engineer

Fortunes Tech

United States

01/2023 - Present

- ✧ Spearheaded the design and development of scalable, cloud-native applications hosted on **Azure**, utilizing **React.js**, **Vue3**, and **React Native** for e-commerce, healthcare, and financial platforms.
- ✧ Led the integration of **AI technologies**, including **LoRA (Low-Rank Adaptation)** fine-tuning, to enhance pre-trained language models (such as **Claude** and **GPT**) for customized applications, improving efficiency and accuracy in real-time customer interaction tools.
- ✧ Implemented **Retrieval-Augmented Generation (RAG)** architecture, combining powerful language models with external data retrieval systems to provide more accurate, context-aware responses in conversational agents and chatbots.
- ✧ Developed resilient backend systems with **Python** (Django, FastAPI) and **Node.js** (NestJS, Express), hosted on **Azure** using **App Services** and **Azure Functions** for cloud-native solutions.
- ✧ Optimized data processing pipelines with **Azure CosmosDB** and **PostgreSQL**, implementing **Redis** for caching to improve performance and scalability.
- ✧ Utilized **AI tools** such as **OpenAI Codex**, **TensorFlow**, and **Azure AI** to rapidly prototype and fine-tune models for specific business needs.
- ✧ Architected and deployed AI-powered solutions, including **AI-driven customer service chatbots** and **ML-based recommendation systems**, utilizing **LoRA fine-tuning** to adapt existing models for personalized experiences.
- ✧ Integrated secure payment solutions like **Stripe** and **PayPal**, ensuring seamless and secure transactions for enterprise clients.
- ✧ Designed and implemented **CI/CD pipelines** using **Azure DevOps**, improving deployment efficiency and reducing deployment times by 40%.
- ✧ Actively participated in SCRUM ceremonies and collaborated with cross-functional teams to deliver high-impact features on time and within scope.

Senior Front end Engineer

Launchifi

United States

11/2021 - 01/2023

- ✧ Developed and maintained the frontend of the Launchifi blockchain platform using **Next.js**, ensuring responsive and high-performance user interfaces for decentralized applications (dApps).
- ✧ Integrated **Web3** functionality to enable secure wallet connections, transactions, and interactions with blockchain smart contracts.
- ✧ Optimized the platform's UI for scalability and usability, leveraging **Next.js** server-side rendering (SSR) capabilities to enhance performance and SEO for blockchain-related content.
- ✧ Worked with **gRPC** and **GraphQL** to efficiently fetch and display **blockchain** data, ensuring smooth and real-time updates across the application.
- ✧ Enhanced the user experience by implementing modern CSS frameworks like **Tailwind CSS** and **Material UI**, along with animations using **GSAP** and **Framer Motion** to create visually engaging, interactive interfaces.

Senior Mobile App Developer (React Native & Laravel & Postgres)

Ovia Health

Boston, United States

07/2019 - 10/2021

- ✧ Developed and maintained a mobile health-tracking application focused on women's reproductive health, pregnancy, postpartum recovery, and fertility tracking using React Native for cross-platform support.
- ✧ Built and integrated scalable backend services using **Laravel** and **Supabase**, ensuring secure authentication, seamless data synchronization, and real-time updates.
- ✧ Optimized API interactions and database performance, leveraging **PostgreSQL**, **Redis caching**, and **GraphQL**, reducing app load times by 35%.
- ✧ Deployed and maintained cloud infrastructure on **Azure** and **Firebase**, automating CI/CD workflows for seamless app updates and reducing deployment times.

Senior Full Stack Engineer

Reed Technology Solutions, LLC

East Stroudsburg, United States

09/2016 - 06/2019

- ✧ Built and maintained frontend components and UI features with **Vue.js**, **React** improving user engagement and app interactivity.
- ✧ Utilized **Nuxt.js** for **SSR** (Server-Side Rendering) and optimized **SEO** for client-facing applications.
- ✧ Implemented frontend styling using modern **CSS frameworks** like **Tailwind CSS**, **Bootstrap**, and **Material UI**, while utilizing animation libraries like **GSAP** to create scalable, visually appealing designs with smooth animations and transitions.
- ✧ Built and optimized server-side logic with **Python / Django** and **Go**.
- ✧ Implemented authentication using **JWT** and **OAuth2**, ensuring secure user access across web and mobile platforms.
- ✧ Managed databases like **MongoDB** and **PostgreSQL** to handle user data.

Backend Engineer

SPIN

Chicago, United States

11/2014 - 07/2016

- ✧ Migrated e-commerce platform backend to **Django**, improving performance and scalability.
- ✧ Developed **GraphQL** APIs, optimizing data access and integration.
- ✧ Implemented MongoDB and **Redis** for reliable data storage and fast data retrieval.
- ✧ Containerized applications with **Docker** and automated deployments using **GitLab CI/CD**.
- ✧ Optimized **PostgreSQL** performance, ensuring high availability and low-latency access.

EDUCATION

Bachelor's Degree in Computer Science
University of Houston

Texas, United States
10/2010 - 05/2014

SKILLS

Frontend: React.js, Vue.js, Next.js, Angular, React Native, Tailwind CSS, Shadcn, Material UI, GSAP, Framer Motion

Backend: Node.js, Go, Python (Django, Flask, Fast API), Express.js, Sitecore, GraphQL, RESTful APIs

Databases: MongoDB, PostgreSQL, MySQL, Redis

DevOps: Docker, Kubernetes, AWS, Google Cloud, Azure, CI/CD (GitLab CI, Jenkins)

Version Control: Git, GitHub

Testing: Jest, Mocha, Cypress

Methodologies: Agile, Scrum

Other: OpenAI, Google Maps, Stripe, Mailjet, Twilio, Pinecone, Web3, Smart Contracts
