EDUCATION

University of Texas at Dallas, Dallas, Texas

Master of Science, Information Technology and Management

Graduate Dean's Scholarship, Graduate Competitive Scholarship

Aug 2023 – May 2025

GPA 3.7/4.0

Kalinga Institute of Industrial Technology, Bhubaneswar, India

Bachelor of Technology, Electronics and Telecommunication Engineering

Aug 2012 – May 2016

GPA 7/10

SKILLS

- **Programming Languages and Frameworks:** COBOL, Python, Java, R, Hadoop
- **Databases:** IBM DB2, MySQL, PostgreSQL, MongoDB
- **Tools and Applications:** VSAM, CICS, JCL, CA7, PL/SQL, Autosys, TWS, IBM-IDZ, XPED, File-Aid, Endevor, Tableau, R Studio, Jupyter, IBM-BPM, Apache Spark, Informatica Power Centre, OpenText Exstream, Agile (Kanban JIRA), Git

WORK EXPERIENCE

Senior Software Engineer | Principal Global Services(Principal Financial Group) | India

Apr 2020 – Aug 2023

- Migrated the commission's legacy system to an event-based architecture by capturing events from batch and online transactions, formatting and routing them to MongoDB and MQ increasing the internal free flow capital by **13% on newly sold products**.
- Automated legacy document composition tool to on-premises fully paperless electronic document creator by designing COBOL programs to utilize OTE and generate XMLs hence **saving 1500-5000 business hours** spent on manually scanning and indexing.
- Created Python scripts to automate the quarterly production verification thereby **saving 5 business hours per quarter** spent on manual verification and documentation.
- Leveraged Informatica PowerCenter to design workflows that automated the ETL process, enabling accurate and timely ledger data integration with mainframe systems **reducing processing time by 18%**.
- Root cause analysis of production bugs and permanent fixes, hence reducing ticket backlogs by **13.8% per quarter**.
- Optimized data loading and transformation by creating new table structures in the system database by migrating from VSAM to Mongo DB, creating JSONs for batch/online transactions thereby achieving **40% faster task completion** and customer experience.
- Coordinated with Product Managers to plan & prioritize tasks using the agile framework demonstrating a good understanding of the Software Development Life Cycle.
- Trained junior teammates with the onboarding of modernized mainframe applications and conducted knowledge transfer sessions.

Associate Consultant | Capgemini Technology Services India Limited | India

May 2016 – Apr 2020

Client: Discover, HSBC

- Coded and conducted end-to-end testing for feature enhancements in batch and online environments, optimizing logic modifications and reconfiguring job scheduling to accommodate evolving functionalities
- Streamlined change management process by working on change requests and scheduling through TWS, optimizing workflow, and minimizing disruptions, achieving a **34% reduction in business hours** spent on troubleshooting and redundant tasks.
- Developed complex queries on MySQL, DB2, and MongoDB for deployment impact analysis to ensure application functionality and for any security vulnerabilities in the system.
- Performed 'Disaster Recovery' for BU applications and worked preemptively to resolve system breakdown/failures in the DR environment.
- Mentored my teammates through code reviews to help them grow technically and improve the overall quality of deliverables.

ACADEMIC PROJECTS

Assess Market Opportunity for Conagra Brand | Python, Matplotlib, NumPy, pandas, Regression models

Developed predictive models using Python to identify target segments for increased market share at Conagra, leveraging regression techniques like Ridge regression, LASSO, and OLS. Conducted data cleaning, EDA, and visualization to provide actionable insights on sales optimization across forms, flavors, and geographical preferences

US Healthcare Transparency | Python, PostgreSQL, Docker

Processed and standardized large-scale datasets from six hospitals across four states, designed a robust PostgreSQL database by creating ER diagrams and deploying it using Docker for seamless integration and scalability

Risk Analysis Truck Fleet Data | R, Tableau, Hadoop, Hive, Spark

Employed Hadoop tools and techniques to scrutinize truck fleet data, pinpointing risk factors based on various parameters such as truck company, abnormal events, and geographical locations. Generated visualizations for a national trucking corporation to proactively mitigate risks.

ACCOMPLISHMENTS

- **Certifications:** IBM DB2 9 Database Associate, AWS Certified Cloud Practitioner, Oracle SQL Certified, NIAT-accredited Core Java
