erics1337@gmail.com • <https://www.ericsdrupalportfolio.com/>

Drupal Developer

Passionate Developer with over 5 years of experience in bringing success to teams by building great relationships and understanding the needs of clients to build high-performing custom digital solutions. Proven history of engineering bespoke web application features and crafting user-friendly designs and components. Proficient in Drupal and React with a strong background in Agile development environments. An avid mentor and open-source contributor, passionate about sharing knowledge and giving back to the development community.

WORK EXPERIENCE

Nularian

Full Stack Engineer

07/2024 - Present

Asheville, NC

- Developed scalable, user-centric front-end interfaces for Nularian Electrify, an AI automation platform integrating LLM-powered solutions, using MakerKit's Next.js Supabase SaaS Kit. Leveraged best practices from Chatwoot and SuperAGI to improve customer engagement

Blu Omega/Booz Allen

Drupal Developer • Full-time

10/2023 - 05/2024

Washington, DC

- Key agile team member for a federal client's rebuild of the National Institute of Health's Heart, Lung, and Blood Association's Website, ensuring compliance with public sector accessibility standards.
- Enhanced system performance by fixing bugs, upgrading components, and building new features within an advanced devops framework utilizing Microsoft Azure cloud services and Docker containers
- Cleaned up legacy code resulting in a 25% reduction in total repository size
- Organized Sharepoint files, aggregated company documents, and wrote technical documentation to clarify standard operating procedures which resulted in greater team cohesion and streamlined workflow
- Developed new features and custom modules including a calendar feature for NHLBI's "Our Hearts" challenge initiative
- Collaborate with designers and front-end developers to implement responsive and visually appealing user interfaces.

Spruce Technology, Inc

Drupal Developer • Full-time

12/2022 - 10/2023

New York, NY

- Administered and enhanced the Delaware Bridge and Bay Authority's Veterans Memorial Park website, managing a daily visitor count of over 2,000. Maintained legacy code and addressed more than 80 issues in the backlog, improving site load time by 30%.
- Configured a Multi-site Drupal implementation for all the sites the company managed with the same client, resulting in enhanced code reusability and reducing maintenance time by up to 50%, improving update consistency across sites by 80%, and leveraging Acquia's enterprise-level hosting to enhance performance by 30% and ensure 99.99% uptime.
- Collaborated as a key team member in developing the Rebuilding California website for the California Transportation Department, built with React and Gatsby delivering project components two weeks ahead of schedule and helping increase site traffic by 20% within the first three months.

- Designed and implemented a robust search component using Typesense, reducing average query response time by 40% from previous implementations and improving content discoverability, resulting in a 15% boost in user engagement.
- Configured and integrated Contentful headless CMS, empowering the content team to manage static content autonomously, which led to a 50% reduction in content update times and enhanced flexibility for non-technical users.
- Successfully migrated arcGIS Web AppBuilder widgets to Experience Builder, improving the usability of interactive maps and reducing site load times by 25%, enhancing user satisfaction and engagement.

Kitzuma Cycling Logistics
Full Stack Engineer

06/2022 - 11/2022
Asheville, NC, USA

- Led development of software features for a proprietary Salesforce-based Transportation Management System, enabling delivery drivers to verify safe bike deliveries. These tools enhanced customer trust, contributing to a 15% increase in business over three months by providing real-time delivery confirmations and supporting nationwide bicycle delivery operations.
- Redesigned the company's marketing website with Vue.js framework to improve SEO and user experience, resulting in a 25% boost in lead conversions over 3 months.
- Created custom front-end designs using Figma and Miro and collaborated with UI/UX team to iterate on component form and function
- Developed and maintained unit tests and end-to-end tests for Salesforce applications to ensure 70% code coverage

Business Enterprise Institute
Developer

04/2021 - 06/2022
Denver, CO, USA

- Transpiled code from PHP 7 to PHP 8 using a migration tool to support the Drupal 7 to 9 upgrade, reducing code incompatibility issues and ensuring a smoother transition to the updated platform.
- Integrated HubSpot APIs to automate lead capture and data syncing, increasing lead conversions by 30%.
- Optimized website performance and SEO scores using Lighthouse and Arc DevTools, achieving a 35% faster load time and improving SEO scores by 20%, which led to a 30% increase in organic traffic over 12 months.
- Conducted security testing using Rapid7 AppSec software, identifying and resolving critical vulnerabilities that improved the application's security rating by 25% and reduced potential exploit risks, enhancing overall platform stability and user trust.
- Developed and managed an exit-planning course on the Moodle LMS, replacing traditional seminars with an accessible, self-paced format. This transition allowed for a 50% increase in participant sign-ups and was widely praised by users for its convenience and structured learning, enhancing the company's training reach and engagement.

Tiny Feet
Developer

09/2020 - 04/2021
Gunnison, CO, USA

- Led development of a climate action planning tool as part of a cross-functional team, working alongside a Master's student in Environmental Management and engineers from the Colorado School of Mines to support rural communities in reducing greenhouse gas emissions.
- Built a full-stack web application using Python Flask with features including a Google Maps API-powered map tool, greenhouse gas data visualizations, and a recommendation engine that filtered planning suggestions based on community needs.

- Worked in an agile, collaborative environment guiding a team of 7 all-female engineers dubbed the "30% crew" to design, implement, and test the application. The project's impact earned a \$2,000 grant for its contribution to environmental planning in underserved areas.

Freelance

02/2016 - 12/2017

Web Developer

- Developed marketing e-commerce websites using WordPress for local businesses including a site for Earthy Soul Living studio, where I built custom templates and designed and implemented a video-on-demand membership system

EDUCATION

Bachelor Of Science (BS) In Computer Science

Western Colorado University

Gunnison, CO, USA • 09/2017 - 05/2020

Bachelor of Arts (BA) in Media and Communications

Purchase College, SUNY

Purchase, NY • 01/2010 - 12/2014

PROJECTS

Earthy Soul Living

- Collaborated with the client to gather requirements and build a user-friendly ecommerce platform using WordPress and Elementor, enhancing the client's ability to independently manage and customize their site.
- Designed and implemented a subscription-based model for video repository access, effectively boosting the website's revenue generation capabilities
- Integrated advanced payment processing solutions to ensure secure and efficient transactions for the site's ecommerce functions
- Provided ongoing technical support and training to empower the client with tools and knowledge for site maintenance and updates
