

PROFESSIONAL SUMMARY

I am a **Senior Android Developer** and **Technical Team Lead** with over 9 years of experience in the Software Industry.

- Over 9 years of experience as a Senior Android Developer.
- Over 4 years of experience as a Technical Team Lead.
- Over 2 years of experience as a KMM Developer with Compose Multiplatform.
- Over 2 years of experience as a React Native Developer

Throughout my career, I have worked across diverse domains, including Health, E-Commerce, Parental Control, IoT, Ride-Hailing, Education, Entertainment, Food, and Travel.

TECHNOLOGIES

Mobile Development	Android, iOS (Beginner), KMM, KMP, Compose Multiplatform, React Native
Languages	Java, Kotlin, Compose, XML, PHP, HTML, CSS, JavaScript, Bootstrap
Principles	SOLID Principles, Multi-Modular, Builder, Singleton, Repository, Use Cases
Libraries	Coroutines, RxJava, Retrofit, Glide, Flows
Dependency Injection	Koin, HILT, Dagger 2
Data Stores	Room, OrmLite, Realm DB, Firebase Cloud, SQLite, SQL Delight
Jetpack	Navigation, Paging, Room, Interpolator, DataBinding
Architectures	Clean Architecture, MVC, MVP, MVVM, MVI
Unit Testing	Unit Testing (JUnit 4), Mocking Libraries (Mockk)
DevOps	Continuous Integration (Jenkins) Continuous Deployment (Bitrise)
Project Management	GitHub, Jira, Bitbucket, Slack, Trello
Analytics	Firebase Analytics, Statsig
Coding Standards	KtLint Formatter on each commit pre-hook to achieve code standardization
Other	Datadog, Lucid Chart, Figma, Coda, PRD and TDD writing

EXPERIENCE

Lead Mobile Developer | [AnyTrek](#) | USA (Remote) | May 2024 – Present

AnyTrek is an innovative smart trailer solution provider that designs and develops GPS tracking solutions and information systems that utilize the latest technologies for the heavy-duty trucking industry.

Responsibilities:

- Leading a cross-functional team of mobile and backend developers, providing technical mentorship, defining roadmaps, and ensuring timely delivery of features across both mobile & backend platforms.
- Collaborating with stakeholders, including the Project Manager, SQA, and designers, to translate business requirements into actionable technical tasks.
- Coordinating sprint planning, backlog grooming, and progress tracking using Agile methodologies.
- Prioritizing and allocating tasks between mobile and backend teams based on project requirements and team strengths. Balancing workload across both teams to ensure efficiency and quality.
- Mediating and resolving conflicts within teams and across departments, fostering a collaborative and productive work environment.

- Advocating for scalable, maintainable, and future-proof technical solutions during strategic decision-making processes.
- Reviewing code to ensure high quality, adherence to standards, and performance optimization.

Technologies: KMM, Compose Multiplatform, Kotlin, Swift, Node JS, Python

Projects: Under Development

Senior Android Developer | [COFE](#) | Abu Dhabi, UAE (Remote) | Aug 2023 – Nov 2024 (1.5 Years)

COFE provides quick access to a wide range of international coffee franchises and artisanal coffee brands through multiple premium services and features on one platform.

Responsibilities:

- Developed an Android Cloud library with a multi-modular approach to be used by all vendor apps.
- Analyzed the requirements, gathering relevant information, and recommending the course of action.
- Collaborated with Mobile, Backend, Designer, and product teams to ensure product stability.
- Review PRs to improve coding style and business logic using the latest Kotlin functions.
- Tested the app across different Android versions and phones to ensure quality and performance.

Achievements:

- Created Cloud Library using the multi-modular approach; to improve the useability of the code and have one codebase to use for all the vendor apps.
- Added clean architecture with a multi-modular approach to separate Data, Domain, and Presentation layers to improve code structure, easy for unit testing, and for scalability of the product.
- Introduced PRD and TDD writing to document each requirement, for better understanding in the future.

Technologies: Android, Kotlin, XML, Compose

Projects: [COFE](#) | [Caribou Rewards](#) | [Darat Al Qahwa](#) | [FiLLi](#) | Barista mPOS

Senior Android Developer | [Motive ex KeepTruckin](#) | USA (Remote) | Jul 2021 - Sept 2023 (2+ Years)

A tracking application to comply with FMCSA regulations with 1 million end users. Motive combines IoT hardware with AI-powered applications to connect vehicles to the cloud and automates driver safety, compliance, tracking and telematics, maintenance, etc.

Responsibilities:

- Worked in an agile team responsible for designing and developing Android applications.
- Led the production of several features, which required close communication across the teams. Integrated 40+ REST APIs in the Android application.
- Refactored their mobile apps from Java to Kotlin with MVI, Room, Coroutines, Unit Testing, LiveData, and Dagger2 to resolve performance issues, resulting in increased crash-free users from 80% to 95%.
- Analyzed PRD for product requirements, investigated codebase, implemented TDD with technical aspects, and proposed optimal approach to achieving goals.
- Collaborated between the designer, technical, and product teams to ensure product stability.
- Reviewed PRs to improve coding style and to improve business logic using the latest Kotlin functions.
- Android On-Call to closely monitor/resolve the support technical issue.

Achievements:

- Led the successful implementation of several features into production, overseeing the entire lifecycle from gathering requirements from the product team to release. Responsibilities included team selection, cross-team collaboration, leading meetings, resolving technical issues, and monitoring & resolving issues in subsequent releases.
- Collaborated closely with the team on fulfilling the requirements of the Federal Motor Carrier Safety Administration (FMCSA), contributed to the company's successful acquisition of the Canada Mandate, and expansion of business operations into Canada.
- Played a key role in implementing clean architecture with a multi-modular approach, separating Data, Domain, and Presentation layers to improve code structure, unit testing, and enhance scalability.

Technologies: Android, Kotlin, Java, XML

Projects: [Motive Driver App](#) | [Motive Fleet](#)

Senior Android Developer | [DevBatch](#) | Lahore, Pakistan | Jan 2020 – Jun 2021 (1.5 Years)

DevBatch, is an IT solution provider company with the end-to-end development of scalable solutions, delivering full-cycle software development services.

Responsibilities:

- Led a team of Android developers and successfully developed and delivered mobile apps on schedule, implementing essential design patterns.
- Maintained a fast-paced work environment without compromising quality standards.
- Enhanced client retention rates by collaborating closely with stakeholders to set achievable timelines and milestones.
- Fostered a collaborative environment and conducted coaching sessions to improve team skills.
- Reviewed PRs to improve coding style and to improve business logic using the latest Kotlin functions.

Achievements:

- Led a team of Android developers as a Technical Team Lead and worked closely with the clients.
- Enhanced client communication to foster stronger relationships and understanding.
- Comprehensive guidance and support to junior developers, empowering them to achieve excellence.

Technologies: Android, Kotlin, Java, XML

Projects: [IMC Women's Health](#) | [IMC Doctor App](#) | [My IMC App](#) | Service Proz

Senior Android Developer | [YummyApps](#) | Lahore, Pakistan | Jan 2017 – Dec 2019 (3 Year)

YummyApps is a growing software house headquartered in Japan and Canada with development offices in Pakistan, and a leading digital software development, distribution, and digital marketing company.

Responsibilities:

- Led a team of Android developers as a Technical Team Lead and worked closely with stakeholders to establish realistic project timelines and milestones.
- Understood team strengths and weaknesses, and communicated project objectives, requirements, and expectations with the team. Delegated tasks based on individual capabilities and project needs.
- Encouraged collaboration and knowledge sharing among team members. Monitored progress and provided regular feedback. Recognized and celebrated team achievements. Provided guidance, support, and resources as needed and fixed technical cases.
- Improved retention rate by closely monitoring/resolving the support issues and improved application crash-free rate to 99.9% by resolving Firebase and Play Store crashes.
- Fostered a collaborative environment and conducted coaching sessions to improve team skills.

Achievements:

- Refactored the entire application from Java to Kotlin using the latest libraries like MVVM, Flows, Coroutines, Navigation, Retrofit, Room, Dagger2, and Clean Architecture.
- Led a cross-platform team (Mobile, Web, Designer) and provided guidance, support, and mentorship.
- Improved application crash-free rate to 99.9%.

Technologies: Android, Kotlin, Java, XML

Projects: [FamilyTime Parental Control](#) | [FamilyTime Child App](#)

Android Developer | [TEP](#) | Lahore, Pakistan | Jul 2015 – Dec 2016 (1.5 Years)

The Engineering Projects is a platform for engineers & technical professionals to share their engineering projects, solutions & experiences with the TEP Community & support open source.

Responsibilities:

- Successfully developed and delivered mobile apps on schedule, implementing essential design patterns.

- Maintained a fast-paced work environment without compromising quality standards.
- Enhanced client retention rates by collaborating closely with stakeholders to set achievable timelines and milestones.
- Collaborated directly with the clients to get requirements.

Technologies: Android, Java, XML

Projects: [Verbier - Club du Chalet Blanc](#) | [Chauffeur - MayTaxi Verbier](#) | [Green Solution Group](#)

EDUCATION

Electrical (Telecommunication) Engineering

National University of Science and Technology, Pakistan (2011-2015)

Participated in various events of Soccer, Cricket, Chess, and programming.

CERTIFICATIONS

- SOLID Principles: Introducing Software Architecture & Design | Udemy
- Android TDD Masterclass - Coroutines, Jetpack | Udemy
- The Complete Android 14 & Kotlin Development Masterclass | Udemy
- Android Development Essential Training: App Architecture with Kotlin | LinkedIn
- Kotlin Essential Training: Object-Oriented and Async Code | LinkedIn
- Kotlin Essential Training | LinkedIn

ACTIVITIES & HOBBIES

- Doing certifications and helping the community on Stack Overflow
- Soccer, Table Tennis, Badminton, Volleyball, and Chess player
