

Syed Atif Akbar Rizvi

Sr. ServiceNow Developer / Administrator

Email rizvis1010@gmail.com

Bothell | 206-638-3204

Education

- Masters in Computer Science
(The National College
Lahore)

Certifications

- CSA – Certified System Administrator
 - CAD – Certified Application Developer
 - ITIL V4 Foundation
 - Agile Scrum Foundation
-

Professional Summary

- Experienced Senior ServiceNow Developer with over 12+ years of expertise in designing, developing, and optimizing ServiceNow solutions tailored to enterprise IT needs.
- Implemented ITOM health monitoring and Discovery automation, improving event correlation and incident detection
- Enhanced SecOps automation, integrating with ITSM for streamlined security incident and vulnerability response.
- Configured ITSM service catalog and request fulfillment, aligning with Portal enhancements for seamless user experience.
- Configured ITOM workflows with CMDB for real-time infrastructure visibility and dependency tracking.
- Integrated SPM and ITBM to align strategic IT planning with cost optimization and resource allocation
- Configured ITAM workflows to track asset depreciation, ensuring compliance with GRC financial policies.
- Managed ITOM alert escalations, integrating SecOps threat detection for enhanced security responses.
- Enhanced ITSM workflows, integrating incident, problem, and change management with CSM case handling for improved efficiency.
- Maintained CMDB accuracy by integrating Discovery, improving asset visibility and reducing discrepancies.

- Designed ITSM dashboards to monitor key metrics, integrating SPM insights for strategic service improvements.
- Expanded ITOM monitoring to include automated service discovery, improving CMDB data accuracy and proactive issue detection.
- Developed ITAM lifecycle automation, optimizing asset tracking in CMDB and integrating with HAM Pro and SAM.
- Strengthened ITSM integration with ITOM, leveraging Discovery and event correlation to reduce downtime.
- Automated ITAM procurement approvals, linking with ITBM budgeting and financial tracking.
- Configured CMDB governance controls, ensuring alignment with GRC compliance and security audits.
- Automated ITSM SLA tracking, integrating with GRC policies for improved service commitments and compliance monitoring.
- Enhanced CMDB reporting dashboards, aligning with SPM project tracking and strategic IT planning.
- Automated Discovery processes, improving ITOM operational intelligence and reducing manual asset tracking.
- Optimized ITSM incident response workflows, aligning with SecOps security incident management for proactive resolutions.
- Integrated Discovery with SecOps, enabling real-time vulnerability scanning and security compliance checks.
- Strengthened ITAM governance, aligning GRC policies for compliance in hardware and software asset management.
- Developed Service Portal enhancements, optimizing self-service capabilities and linking to CSM case management.
- Customized Portal UI and automated workflow approvals, ensuring efficient service request handling.
- Implemented GRC risk assessment automation, integrating IRM for proactive enterprise risk management.
- Strengthened IRM reporting, aligning risk mitigation efforts with ITSM incident response workflows.
- Optimized SPM workflows, integrating ITBM financial planning for cost-effective project execution.
- Automated HAM Pro asset tracking, integrating lifecycle management with SAM for software compliance.
- Implemented ITSM change management policies with IRM risk assessments, ensuring compliance and reducing deployment risks.

Professional Experience

VOTORANTIM

JUL 2020-Present

Senior ServiceNow Developer / Administrator

- Developed and enforced a governance framework for platform development, aligning with GRC policies and IRM standards.
- Led ServiceNow platform initiatives, collaborating with the platform owner to design, develop, and refine functionalities within ITSM, ITOM, ITAM, and CMDB.
- Designed and implemented IAM solutions to streamline user provisioning, role management, and access reviews, enhancing security and compliance.
- Developed custom Clear Skye integrations within ServiceNow to automate IAM workflows, role-based access controls, and approvals.
- Configured and enhanced Service Portal to provide a user-friendly interface for IAM processes, including password resets and access requests.
- Designed and implemented SecOps workflows to automate security incident response, vulnerability management, and proactive risk mitigation.
- Developed automation scripts using REST/SOAP APIs to integrate ServiceNow IAM with third-party tools like Okta, Azure AD, and SailPoint.
- Engaged with stakeholders to document technical requirements and provided consistent support throughout the project lifecycle.
- Dedicated time to continuous learning, staying updated with new ServiceNow modules and features, including ITBM, HAM Pro, SAM, and ITAM.
- Led Clear Skye integration with ServiceNow, automating identity provisioning, access requests, and compliance reporting.
- Customized and configured ITSM, ITOM, ITAM, and CMDB modules to optimize incident, change, and asset workflows, improving system performance.
- Implemented workflows and automation within ServiceNow IAM, ITSM, ITOM, ITAM, and Discovery, enhancing efficiency and ensuring data consistency across systems.
- Collaborated with cross-functional teams, translating business requirements into technical specifications for IAM, ITSM, ITOM, ITAM, and SecOps.
- Effectively communicated technical information to diverse audiences at all organizational levels.
- Worked closely with the ServiceNow Development team and Architects on projects within ITSM, SPM, ITFM, ITOM, ITAM, and CMDB.
- Assisted in gathering requirements and designing ServiceNow solutions, focusing on hands-on technical work and implementation within GRC and IRM frameworks.
- Managed end-to-end implementations, including integrations and modernization of the existing ServiceNow platform with HAM Pro, SAM, and ITAM.

- Applied best practices for both out-of-the-box and custom ServiceNow solutions to meet specific business needs, optimizing CSM and ITBM functionalities.
- Developed technical solutions supporting Incident, Problem, Change, Chat, Portal, and Security Incident Response (SIR).
- Acted as a subject matter expert, implementing solutions to enhance Service Management, ITSM, ITOM, and ITAM capabilities.
- Demonstrated leadership and mentoring skills, guiding junior developers in ServiceNow best practices.
- Partnered with product owners, process owners, and business leaders to develop effective Service Management solutions, leveraging CMDB, Discovery, and ITAM.
- Ensured solution delivery adhered to ServiceNow best practices, minimizing customizations and optimizing platform performance across ITSM, ITOM, ITAM, and SecOps.
- Contributed to the ServiceNow platform roadmap, enforcing engineering standards and reviewing complex features for alignment and quality, ensuring compliance within SPM and IRM.

ELARA CARING

MAY 2016- JUN 2020

ServiceNow Developer / Administrator

- Engineered ITSM, ITOM, and ITAM workflows to enhance service delivery, minimize downtime, and improve operational efficiency across enterprise environments.
- Designed robust CMDB, Discovery, and SecOps solutions to ensure accurate asset mapping, proactive threat mitigation, and seamless infrastructure dependency tracking.
- Developed compliance frameworks in GRC and IRM, streamlining risk assessments, policy enforcement, and audit readiness for better regulatory adherence.
- Optimized CSM, SPM, and Portal functionalities to improve user engagement, automate request handling, and create an intuitive self-service experience.
- Implemented HAM Pro and SAM strategies for precise software license management, contract tracking, and asset lifecycle optimization across global IT environments.
- Automated IT processes using ITOM, Discovery, and CMDB, enabling real-time infrastructure monitoring, accurate asset inventory, and seamless incident resolution.
- Integrated ITBM, SPM, and SecOps to enhance project governance, risk monitoring, and automated incident response for improved business resilience.
- Strengthened security posture through GRC, IRM, and ITSM, enforcing strict compliance policies, governance models, and risk mitigation strategies.
- Built interactive dashboards for SAM, HAM Pro, and SecOps to provide actionable insights on asset compliance, vulnerability response, and security tracking.
- Enhanced infrastructure visibility using ITOM, Discovery, and CMDB, ensuring accurate service mapping, dependency visualization, and real-time impact analysis.

- Streamlined procurement and cost tracking by configuring ITAM, HAMPro, and SAM to optimize asset utilization, reduce waste, and improve financial forecasting.
- Designed user-friendly portals in CSM, ITSM, and Portal, improving self-service adoption, workflow automation, and SLA compliance for end users.
- Developed risk and audit automation within GRC, IRM, and SPM, optimizing regulatory adherence, policy management, and continuous compliance tracking.
- Configured ITBM, SPM, and SecOps frameworks to accelerate business transformation, improve strategic decision-making, and mitigate evolving cybersecurity threats.
- Integrated CMDB, Discovery, and ITAM for accurate configuration tracking, reducing service disruptions, enhancing change management, and minimizing IT failures.
- Automated IT operations using ITOM, ITSM, and SecOps, enabling predictive analytics, proactive issue detection, and seamless incident remediation workflows.
- Enhanced compliance monitoring in SAM, HAM Pro, and ITAM, ensuring optimal software license utilization, audit readiness, and cost optimization.
- Developed enterprise-wide security workflows in GRC, IRM, and SecOps to mitigate cyber threats, enforce governance standards, and strengthen IT risk management.
- Improved service request fulfillment by refining CSM, ITSM, and Portal, optimizing user workflows, reducing resolution times, and improving overall service efficiency.
- Strengthened cyber resilience by integrating SecOps, ITOM, and IRM, enabling rapid threat detection, risk-based response, and improved security intelligence.

MERCARI

Oct 2013- APR 2016

ServiceNow Developer

- Developed robust automation scripts for onboarding/offboarding, leveraging Flow Designer and Business Rules to eliminate redundant tasks and reduce errors.
- Implemented ITOM integrations with IAM to improve asset visibility, tracking, and lifecycle management across the organization.
- Created data-driven dashboards and reports to monitor IAM, ITSM, ITOM, and CMDB activities, providing actionable insights for stakeholders.
- Streamlined incident resolution and user access through Clear Sky integrations, ensuring seamless identity synchronization and access approval.
- Supported multi-platform IAM integrations across ServiceNow, centralizing user identities, entitlements, and audit trails.
- Developed best practices for ServiceNow platform use, ensuring consistent application of standards across ITSM, ITOM, and ITAM.
- Gathered and analyzed requirements, applying ServiceNow methodology to deliver tailored solutions aligning with ITIL processes.
- Enhanced user experience and system stability by proactively identifying and addressing improvements in SecOps, ITSM, and IAM.

- Provided guidance on system interoperability and integration, ensuring compatibility across CMDB, Discovery, and ITOM.
- Conducted peer reviews of system integrity, promoting adherence to development standards and engineering best practices.
- Managed capacity planning, patching, upgrades, and clones, optimizing ITOM, ITAM, and CMDB performance.
- Developed a comprehensive Knowledgebase, writing and updating knowledge articles for system education and troubleshooting.
- Configured, implemented, and maintained ServiceNow ITSM, ITOM, and ITAM, managing workflows, user roles, and integrations to drive automation.
- Integrated ServiceNow with external service providers to enhance operational automation and efficiency.
- Customized Incident, Change, and Problem Management modules to align with business objectives and ITIL best practices.
- Collaborated with IT teams to implement solutions aligned with ITSM, ITOM, and SecOps, ensuring effective service delivery.
- Created and maintained technical documentation for ServiceNow configurations, ITAM customizations, and ITBM development work.
- Developed server-side and client-side JavaScript to enhance functionality, creating update sets and XMLs for configuration management.
- Leveraged Flow Designer and Integration Hub to create seamless end-to-end automation and workflow efficiencies.

Desjardins

JUN 2010- SEP 2013

JavaScript Developer

- Developed server-side and client-side JavaScript to enhance ServiceNow functionality, optimizing platform performance.
- Wrote and maintained custom scripts, Business Rules, Script Includes, and UI Policies to automate workflows.
- Created update sets and XMLs for configuration management, ensuring seamless migration and system stability.
- Integrated ServiceNow with third-party applications using REST and SOAP APIs, enabling data synchronization.
- Built dynamic Service Portal pages using JavaScript, AngularJS, and Bootstrap, enhancing the user experience.
- Developed custom widgets and client scripts to improve form behavior, UI interactions, and automation tasks.
