Professional Summary

Data Analyst and BI Developer with over 4 years of expertise in data analysis, visualization, and business intelligence, leveraging tools like SQL, Tableau, Power BI, Python, and Azure Cloud Services to drive measurable business outcomes to improve performance metrics. Proficient in SQL optimization, statistical modeling, ETL pipelines, and data visualization, with a proven ability to create interactive dashboards that translate complex data into impactful narratives for technical and non-technical stakeholders.

Technical Skills

Languages: Python, SQL, R, VBA, C#, Shell/Bash, HTML, CSS, JavaScript

Frameworks & Tools: NumPy, Pandas, Matplotlib, GitHub, Agile, PySpark, Jira, KPI, Google Cloud Analytics, Microsoft Azure

Databases: MS-SQL, MySQL, Snowflake, Big Query, PostgreSQL, MongoDB, Spark SQL, Oracle, MS Access

Data Analysis / ETL: Power BI, Tableau, Looker, Data Bricks, MS Excel, Machine Learning, Data Modeling, Data Mapping, Data Mining, Data Extraction, Transformation, Data Warehousing, Data Cleaning, Data Visualization, Data Warehouse, Data wrangling

Others: SSIS, SSRS, Data Flow, Google Data Studio, Descriptive Statistics, Statistical Process Control, Parametric and Nonparametric Testing, Predictive Analysis, Hypothesis Testing, Regression Analysis, Time Series Analysis, Problem-solving, Change Management

Professional Experience

Business Intelligence Analyst, Trimen Industrial LLC

Oct 2024 – Present | WI, USA

- Led sales data analysis leveraging Python (NumPy, Pandas, Matplotlib, scikit-learn) and SQL, identifying actionable insights and optimizing sales strategies, contributing to a 15% increase in revenue for the organization.
- Collaborated with cross-functional teams to define revenue-focused KPIs, and managing project timelines and documentation to ensure clear communication, track progress, and deliver actionable insights that enhanced decision-making efficiency across the organization.
- Performed segmentation analysis using SQL and advanced clustering techniques to identify high-value client groups and bottlenecks in the sales pipeline, leading to streamlined processes and a 12% improvement in conversion rates.
- Designed PowerBI dashboards integrated with Dataflows for real-time data transformation and Power Automate for workflow automation, driving a 20% improvement in resource utilization and increasing revenue opportunities by enabling sales teams to make data-driven decisions faster.

Data Analyst, Edward Jones

Feb 2024 – Oct 2024 | MO, USA

- Partnered with product, marketing and finance teams for requirement gathering and to define objectives for a millennial-focused sustainable investment campaign, using Salesforce Marketing Cloud and survey data to identify key demographics and engagement metrics.
- Executed advanced analytics using SQL in Azure Synapse Analytics, employing data transformation and multinomial logistic regression to predict millennial interest in sustainable investments, enhancing campaign targeting accuracy.
- Carried out hypothesis testing and A/B testing to refine messaging strategies based on demographic insights and interest patterns, leading to a 35% improvement in message relevance.
- Developed and presented interactive Tableau dashboards to both technical and non-technical stakeholders, showcasing campaign performance metrics such as open rates, click-through rates, and conversion rates, which drove an 18% increase in client engagement and informed data-driven marketing strategies.

Data Analyst, Assurant

Jun 2023 – Aug 2023 | FL, USA

- Integrated and analyzed multi-source data, including Google Analytics and customer service records, in Microsoft SQL Server to uncover critical insights into pain points across the mobile claims journey, improving data accuracy.
- Engineered and implemented dynamic Power BI dashboards, including funnel charts, to visualize customer behavior, conversion rates, and NPS, enabling stakeholders to identify key process bottlenecks.
- Directed root cause analysis to uncover barriers in the claim process, effectively communicating findings to stakeholders and recommending process improvements that reduced wait times and enhanced customer satisfaction.

Data Engineer, Arcon TechSolutions

Jul 2020 – Jul 2022 | India

- Streamlined ETL pipelines using Azure Databricks and Python, integrating store-level data from 50+ locations into a centralized data warehouse, improving data accessibility by 40%.
- Conducted data cleansing and outlier detection of over 5 TB of monthly transactional data, using SQL (stored procedures, CTEs, and indexing) to enhance the data validation and accuracy of inventory and operation analyses by 30%.
- Designed and deployed engaging dashboards in Tableau and Excel, uncovering actionable insights into inventory trends and store performance, leading to a 15% increase in operational efficiency.

Data Analyst, DXC Technology

Dec 2019 – Apr 2020 | India

- Constructed a Python web scraping solution to centralize investment data, reducing manual processing time by 20% and enhancing data accuracy, while conducting exploratory data analysis for actionable insights.
- Analyzed investment portfolio performance using advanced Excel tools and custom VBA macros, reducing reporting time by 30% and enhancing workflow efficiency.
- Implemented Power BI dashboards for financial portfolio analysis, utilizing DAX formulas and data hierarchies to visualize asset allocation trends and returns, while ensuring data privacy through row-level security.
- Consulted with stakeholders to deliver visualizations that identified investment trends and optimized asset allocation strategies, contributing to a 10% improvement in portfolio performance metrics.

Education

Master in Data Science and Application, University at Buffalo, SUNY | CGPA: 3.93/4

Aug 2022 – Jan 2024 | NY, USA

Bachelor in Information Technology, Mumbai University | CGPA: 3.33/4

May 2016 – Jun 2020 | Mumbai, India
