

Terron Ross

Security Analyst | Cybersecurity Professional

Austin, US, +1 512-968-2947, Terronross09@gmail.com

Professional summary

Security analyst with a collaborative spirit, driven to protect organizations and their constituents. Passionate about digital forensics, threat hunting, and incident response, I'm dedicated to adding value while honing my skills as a Security Analyst. Eager to leverage my fresh perspective and enthusiasm in the cybersecurity field.

Security Projects and experience

Utilized Microsoft Azure for SOC lab to develop an in-house SIEM tool on Microsoft Sentinel platform.

Employed KQL to create query-based rules for failed and successful login attempts.

Conducted vulnerability scans against VMs using Nessus.

Analyzed and presented Endpoint user vulnerability data for the company Six Engines.

Deployed firewalls and segmented networks for various organizations for Flash.

Employment history

InfoSec. Project Coordinator, Apr 2024 - Nov 2024

Tailored Brands, Austin, Tx

- Managed and updated documentation for pin pad audits, enhancing process efficiency.
- Coordinated with vendors to align audit projects, optimizing outcomes.
- Communicated with 700+ brands for comprehensive audits, including Jos. A. Bank and Men's Wearhouse.
- Led security awareness initiatives, focusing on phishing and social engineering prevention.
- Presented audit findings weekly, contributing to PCI 4.0 compliance and circuit migrations.
- Managed comprehensive documentation updates and weekly reporting cycles, ensuring alignment between internal teams and external auditors.
- Orchestrated weekly audit reporting cycles and documentation updates, facilitating seamless communication between internal teams and external auditors.
- Directed multi-stakeholder circuit migration initiatives through effective vendor partnerships and systematic audit project alignment.

Project Coordinator, Jul 2023 - Feb 2024

Project Resource Group, Austin, Tx

- Managed secure BOM submissions for fiber networks, ensuring data integrity and compliance.
- Contributed to weekly reports, identifying roadblocks and proposing effective solutions.
- Maintained project confidentiality, safeguarding critical infrastructure components.

Colo Engineer Support, Aug 2022 - Dec 2022

Charter Spectrum, Austin, Tx

- Managed secure access, protecting critical network assets and ensuring data confidentiality.
- Collaborated in cross-functional teams using Jira, enhancing project efficiency and synergy.
- Guided 30+ clients in improving Business Continuity with redundant networks.
- Verified data accuracy in Granite and Salesforce, ensuring reliable information integrity.
- Conducted market research and negotiations, maintaining budget integrity and risk assessment.
- Coordinated with cross-functional teams to resolve complex infrastructure challenges and deliver comprehensive colocation solutions

Jr Project Manager, Jan 2020 - Feb 2022

FlashParking, Austin, Tx

- Managed risk to prevent project delays and failures, ensuring smooth execution.
- Planned network segmentation and firewall setups to boost security and performance.
- Led teams to configure 200+ network devices, enhancing security.
- Maintained project reports for transparent communication and tracking.
- Coached clients on controls to reduce vulnerabilities and risks.
- Developed project schedules, managed resource allocation, and tracked key performance indicators to ensure timely completion of technical initiatives

Fiber/Data Tech, Mar 2014 - Dec 2019

AT&T, Austin, Tx

- Installed and maintained fiber networks, ensuring seamless connectivity for clients.
- Consistently exceeded workflow metrics with a quality rate over 91%.
- Secured network infrastructure by locking vulnerable points effectively.
- Educated clients on enhancing network security with personal security keys.
- Gained comprehensive knowledge of network topology and data transmission.
- Conducted systematic network diagnostics and repairs, implementing preventive maintenance protocols to minimize service disruptions
- Led fibre optic installations across multiple sites, reducing installation time while maintaining quality standards and customer satisfaction

Education

Aug 2010 - Jun 2011

Austin Community College, Austin, Tx
