Experienced IT & Infrastructure Director with a strong record of optimizing and modernizing large-scale operations for internal and client environments. Skilled at establishing sustainable processes, driving operational savings, and generating new revenue, with a focus on governance and impactful results. Managed global teams of 225+ and budgets over \$50M, consistently optimizing to deliver ~30%+ operational savings and \$15M+ in new revenue. Committed to service and process improvements that enhance customer satisfaction and customer experience, exceed SLA and KPI metrics, and drive client retention and business growth.

PROFESSIONAL EXPERIENCE

Tata Consultancy Services (TCS) | 2011 - Present

Delivery Director- IT Infrastructure (TCS Internal) | Sep 2024 - Present

- Secured multimillion-dollar deals by leading RFP development, solution design, and client defense meetings, expanding TCS's global IT Infrastructure footprint.
- Developed a Project-as-a-Service framework (Core and Core-Flex Model) to standardize delivery, optimize resource allocation, and seamlessly balance project and operational demands, enhancing lifecycle upgrades and operational stability across environments.
- Directed EUC/FSS transition for a Swedish appliance manufacturer, driving 35% market share growth (Electrolux).
- Spearheaded solution, defense, and bid efforts for a Detroit-based automotive manufacturer (Ford) and an Irish American auto tech and parts supplier (Aptiv) in the EUC FSS stream.

Delivery Director – IT Infrastructure & DSS | Dec 2023 - Aug 2024

TCS @ Toyota Motors North America – Manufacturing

- Led end to end IT infrastructure and desk-side support across North America, managing a \$200M+ contract to oversee field services for 125+ manufacturing and regional sites. Focused on cost and resource optimization while driving productivity by implementing automation to advance a Zero Voice Service Desk.
- Collaborated with various business units to analyze processes, identify gaps, and drive strategic transformation in alignment with operational efficiency and cost-reduction goals.
- Led mass hiring, training, and transition efforts, completing a 3-month transition across three countries in North America with a team of 200+ (175+ onshore, nearshore, offshore, and transition support staff).
- Expanded account scope through strategic partnerships and resource planning for a new battery plant, identifying critical support needs and addressing SLA gaps to strengthen TCS's market presence.

Senior Director – IT Infra Portfolio Programs and Transformation | Dec 2022 - Nov 2023

TCS @ Bombardier Aerospace – Manufacturing

- Spearheaded IT infrastructure transformation by implementing Storage and Backup as a Service (STaaS/BaaS) for 6 PB of data, leveraging Pure Storage and Networker to enhance data management and operational efficiency. Led a flexible, cross-functional team to streamline processes and reduce costs across business lines.
- Led strategic planning, \$8M budget management, and implementation of storage, backup, and data center solutions, aligning with business needs and ensuring service quality.
- Established a Portfolio Project Management Office (PMO) with full P&L accountability, managing multimillion-dollar storage and backup programs, streamlining SOWs and RFPs, and coordinating with stakeholders for timely delivery and resource alignment.
- Expanded project scope to include NDA-compliant (ITAR/CCG) projects, enhancing security and compliance.

Senior Director IT Infra Portfolio Programs and Transformation | Sept 2021 - Nov 2022

TCS @ American Electric Power – Utilities

- Architected IT infrastructure transformation initiatives to drive operational efficiency and cost reduction, establishing a Portfolio Program Office for IT Infrastructure, generating \$10M+ in annual gross revenue for TCS.

- Deployed a Machine-First Delivery Model, incorporating generative AI and machine learning to reduce workloads and ticket volumes across various roles, streamlining operations and enhancing efficiency.
- Cultivated strategic relationships across business lines to successfully plan and initiate IT enhancement projects.

Director IT Infra Lifecycle & Portfolio programs | Aug 2014 - Aug 2021

TCS @ Cargill Group - Manufacturing (Global) |

Established and led a Global COE for asset management, overseeing end-to-end infrastructure lifecycle for MADJV activities in North America. Optimized SD-WAN, SD-Access, and logistics to mitigate risks and ensure timely asset management, even amid COVID-19 disruptions.

- Led critical global programs for technology enhancements, vendor management, and asset procurements as part of Managed Services.
- Oversaw IT budget planning, project execution, and asset lifecycle management, managing P&Ls valued at over \$10M and annual budgets exceeding \$50M across portfolio projects.
- Established a Global Asset Lifecycle Office for hardware and software, achieving \$25M in savings over seven years.
- Directed MADJV IT infrastructure integrations for high-profile clients (e.g., Cargill) under NDA.
- Streamlined vendor operations by consolidating Accenture, IBM, Infosys, and others into steady-state operations within six months, ensuring adherence to SLAs and KPIs.
- Established TCS's first large-scale Global Field Services and Hands-on Support office across 70 countries, securing regional and global partners and vetting contracts to ensure reliable, on-demand M&A support, enhancing global operational capabilities.
- Provided leadership in infrastructure projects from analysis and planning to execution and operational support.

Service Delivery and Program Manager | TCS @ Aldo Group | Retail and CPG | 2013 -2014

- Built operations and support teams from scratch for Aldo Group, achieving \$10M in revenue within 6 months. Drove presales success, completed a 12-week operational transition, and implemented 23 ITIL processes in 3 months.

Project Manager, Defects | TCS @ Bank of Montreal | BFSI | 2013

- Led Defects Management and Data Migration Validation for BMO's CLR project, stabilizing operations and eliminating 100% of defects to complete successful migrations within 2 months.

Service Delivery & Program Manager | TCS @ General Motors of Canada | Auto Manufacturing | 2011 – 2013

- Rehired to lead TCS's Global Hosting Services Account for GM, overseeing Canadian operations and driving vendor management and infrastructure modernization. Led a 5 PB storage refresh, saving \$10M in 10 months; initiated Linux/Unix elimination and Windows virtualization, saving \$3M over 2 years; and established a Vendor Management Office for NA, optimizing costs.

Enbridge Gas Distribution | ITSM Business Process Analyst | Energy Resources | 2011

Rogers Communications | Platform Engineer | Telecommunications | 2010 – 2011

Tata Consultancy Services | Various Roles in Early Career | IT Services | 2005 - 2010

- Included acting as Service Delivery Manager for **Kimberly Clark**, pioneering executive support services, establishing and delivering end-user computing solutions with extensive accolades in service excellence. (CPG)
- Transitioned and set up Remote Deskside Support and L2 Troubleshooting for **Lexmark International** (CPG)
