SUMMARY

Full Stack Developer with **9 years** of experience in **software engineering** and **cloud computing**, expert in Full Stack development and cloud infrastructure. My key achievements include **migrating Amazon's historic data service**, which included managing two **50 billion+** entry databases, and optimizing integration tests and improving their runtime by over **60%**. Seeking a Full Stack Developer position, where I bring my software engineering and cloud computing skills to support your mission of driving technological innovation in the digital ecosystem.

EXPERIENCE

Full Stack Developer

Self Employed

📅 01/2022 - Present 📍 Dallas, TX

Freelancing as a Full Stack Developer, working with various startups.

- Developed \$5 mln worth of products by leading development for 5 U.S. startups using Laravel and React Native
- Leading development to Laali in Laravel & Vue and optimizing search with Algolia on AWS infra
- Lead development of CollegiateElites.app Laravel & Vue as well as new Android & iOS apps (in progress) in React Native
- Developed a custom solution for automotive industry startup TheFastLanes.co building their solution in Laravel & mobile apps in ReactNative
- Lead development team of BuildMarker.com web and mobile app making them market ready
- Lead development team of EverCart.co web and mobile apps built in MERN & React Native
- Built 2 eCommerce stores in Laravel & Vue for DivinityMetals & ValiantProducts
- Lead development team of sports-based startup TheLockerRoom.app
- Lead development team of startup ProMinute.com

Software Development Engineer

Amazon - AWS

📅 10/2017 - 01/2022 📍 Seattle, WA

Cloud computing and data service solutions.

- Owner of historic data service having TPS of up to 200k.
- Sole owner of migrating it to new service which included designing and implementing solutions to 2 databases containing 50 billion+ entries each spanning terabytes in collaboration with 5 teams.
- Worked on optimization of integration tests improving runtime by more than 60%.
- Worked on load testing the fleet capacity by analyzing & improving the configurations resulting in reduction of required fleet size by 30%.

Software Development Engineer

Microsoft - Skype / Teams

📅 12/2014 - 10/2017 📍 Redmond, WA

Software development for Microsoft Teams and Skype.

- Working on extending Microsoft Teams to Education with special team type of class, having custom rules, filtering, OneNote integration and settings.
- Sole developer of Skype for Business 'Freemium' portal used by users wanting to try SfB Meetings.
- Improving SfB web (used by over 500k MAU) on customer pain points like increasing screen share content real estate by 26%, smoothing join experience, browser compatibility, & accessibility which resulted in immensely positive feedback from customers & support teams.
- Improving selenium tests coverage, documentation & run time from 2 hrs to 35 minutes (>65%).
- Worked on Windows update, OS Imaging, QuickSetupStick, & Windows activation transfer.
- Implemented factory reset, drive reset and device rollback features for the product.
- Documented onboarding, development and troubleshooting.
- Worked with Polycom & GigaByte teams identifying their BIOS issues/differences for mass installation.
- Implemented device settings in companion app. (Cordova - EmberJS).
- Analysis & decision maker on keeping emberJS against reactJS based on cost of switching & roadmap.

EXPERIENCE

Software Development Engineer

Microsoft Denmark

10/2013 - 11/2014 Copenhagen, Denmark

Development for Microsoft's Social Engagement Application.

- Worked on Microsoft Social Engagement Application team and was lead developer of settings, along with contribution in filtering, widget APIs & charts (highcharts).
- Made them browser compatible and accessible.
- Investigated and introduced grunt processes helping in reducing App team's compile time by more than 50%.
- Investigated and decided on using SCSS over SASS for the team.

SKILLS

Android	apis	AWS	AXIOS	bootstrap	Cordova	CSS	CRM	dynamodb	Docker
