

VENKATA SAI MANI LAKSHMI KAVYA DARSI

Data Engineer

Cumming, GA | +1 (470) 621-5442 | venkata@techjobmails.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Data Engineer with 3+ years of experience building and optimizing scalable data pipelines using technologies like Apache NiFi, Kafka, and DBT and managing 10+ projects. Proficient in cloud platforms such as AWS, Azure, and GCP, utilizing ETL tools like SSIS and Informatica. Experience managing and integrating data across databases such as MongoDB, PostgreSQL, and SQL Server. Well-versed in big data ecosystems, including Hadoop, Spark, and Presto. Proficiency in leveraging tools like Tableau and Power BI for data visualization, with a good background in implementing CI/CD pipelines and terraform for infrastructure automation.

SKILLS

Methodologies: SDLC, Agile, Waterfall

Programming Languages: Python, R, SQL

IDEs: PyCharm, Jupyter Notebook

Packages: NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, Seaborn, TensorFlow

Big Data & ETL Tools: Hadoop, MapReduce, Hive, Apache Spark, Pig, Presto, Apache Drill, YARN, HDFS, SSIS, Informatica

Data Pipelines & Orchestration: DAG, DBT, ETL, Apache NiFi, Apache Kafka, Talend, Fivetran, Delta Live Tables

Cloud Technologies: AWS, Azure, GCP, DataBricks, MinioS3

Visualization Tools: Tableau, Power BI, SSRS

Databases: MongoDB, Cassandra, Redis, Neo4j, Apache HBase, MySQL, PostgreSQL, SQL Server, Oracle, Cosmos DB, JSON

Data Tools: Data Migration Techniques, SAS, Trino, Iceberg, ElasticSearch, Exploratory Data Analysis, Teradata, Delta Lake, Unity Catalog, Kimball Architecture

APIs & Web Services: RESTful API, GraphQL

CI/CD & Infrastructure: Terraform, CI/CD Pipelines

Version Control Tools: Git, GitHub, GitLab

Operating Systems: Windows, Linux, Mac

EDUCATION

Master of Science in Data Science | Syracuse University, Syracuse, NY

May 2024

Bachelor of Engineering in Computer Science and Engineering | KKR and KSR Institute of Technologies, AP, India

Jun 2021

EXPERIENCE

Metlife, USA | Data Engineer

Jan 2024 - Present

- Led the migration of ETL processes from Informatica to Talend, embracing a more open-source approach that ensured minimal disruption to existing systems and workflows.
- Designed and optimized data pipelines using DAG (Directed Acyclic Graphs) and DBT (Data Build Tool), reducing data processing time and enhancing workflow efficiency for large-scale data engineering projects.
- Developed scalable data pipelines using Hadoop and MapReduce, enabling efficient handling of massive datasets and reducing processing time by 50%.
- Integrated Databricks to efficiently process and analyze large datasets, improving data storage and analysis speed by 40% and enabling scalable, high-performance data solutions.
- Successfully implemented Apache Drill on our Hadoop ecosystem to facilitate seamless data integration between SQL and NoSQL databases, enabling real-time analytics and reporting which significantly reducing query response times by over 40%.
- Developed and maintained Terraform scripts to automate the provisioning of critical AWS infrastructure components, including EC2 instances, EMR clusters, S3 buckets, and RDS databases.
- Leveraged Delta Lake for scalable data processing and integrated Cassandra to enhance data consistency and availability, ensuring fast query performance across distributed systems.

Sidearm Sports, Syracuse | Data Curator Intern

Jun 2023 - Aug 2023

- Spearheaded content organization for new clients using proprietary CMS, ensuring accuracy and efficiency during data migration for content types, resulting in 100% error-free transfers.
- Led a team of peers to manage data transfer projects, coordinating tasks and ensuring timely completion of assignments while maintaining high data integrity.
- Corrected anomalies in large-scale imports, applying detail responsiveness to improve overall data quality and system performance.
- Collaborated with cross-functional teams to build and optimize web pages, ensuring seamless content migration and a positive user experience across client platforms.

Aplus Datalytics, India | Jr. Data Engineer

Apr 2020 - Jul 2022

- Utilized Informatica PowerCenter tools, including Designer, Repository Manager, Workflow Manager, and Workflow Monitor, to develop and optimize Extract, Transform, Load processes, enabling efficient data movement & transformation for datasets.
- Collaborated in the design and implementation of robust ETL architecture, enhancing the overall data pipeline and efficiency of data loading processes into the Data Warehouse, thus supporting multiple business intelligence initiatives.
- Designed scalable data workflows using Apache Kafka and Apache Spark, improving real-time data processing speed by 35%.
- Executed data extraction from various sources including flat files and relational databases (RDBMS), loading into staging areas, and ultimately populating the Data Warehouse, leading to a 20% improvement in data availability for analytics and reporting.
- Analyzed existing ETL processes and collaborated with senior engineers to identify bottlenecks, implementing enhancements that achieved a 30% increase in performance consistency and reduced resource consumption.
- Worked closely with cross-functional teams, including business analysts and data scientists, to gather requirements, share insights on data capabilities, and ensure alignment on data quality standards and definitions.

CERTIFICATIONS

Microsoft Certified: Azure Data Engineer (DP-203)

Hands On Essentials – Data Warehouse

Microsoft Office Specialist: Excel Associate (Office 2019)
