#### **Career Objective**

I have excellent knowledge of Property & Casualty insurance domain in Personal Lines (Auto, Motorcycle, Home, Umbrella, Earthquake, Snow Mobile, and Watercraft), Commercial Lines (Comm. Auto, Work Comp., BOP, Comm. Umbrella, and Special Events - Sports & Recreation), and Specialty Lines (Premises Environmental Coverage (PEC)). My experience as an analyst involves understanding the client requirements, gathering them, eliciting and detailing them out before providing them to development teams through requirements documents like User Story etc. I was involved in the Policy Life Cycle of the project and was involved in requirements gathering across Quote, Rating Binding and Policy Issue. I have very strong Claims Processing background and was involved in automation of the Claims Processing using diversified product like Guide Wire Claim Centre. Through my experience and academic background, I have applied my skills to a broader array of problems, enabling me to lead a team through a host of various technology functions.

#### **Professional Summary**

- 10+ Years of experience as a Business Analyst in Personal Property Casualty with solid understanding of Business Requirement gathering, Business Process flow, Business Process Modelling, Data Analysis, Data Mapping and Business Analysis.
- Worked on various products like Auto, Renters, Condominium and Homeowners, Specialty insurance including General Liability, Inland Marine and Property.
- Experience in documentation of online web-portal used for submitting New Business Application, Policy change, pay online, submit claims and Express Apps
- Good understanding and articulated Origami standards and best practices.
- Worked on the Origami full suite to integrate SaaS solutions for policy, rating, billing, loss control and claims administration, reporting and analytics, along with a comprehensive digital engagement experience for all internal and external stakeholders.
- Worked on the Guidewire implementations, configuration and upgrades (Planning, Design, Development and Deployment to Maintenance)
- Experience in Guidewire Insurance Suite for Personal and Commercial Autos, Workers Compensation, General Liability, Inland Marine, and Personal Liability.
- Expert in Insurance Technology solution like Guidewire with in-depth knowledge in the Underwriting, policy administration, billing, rating and claims process.
- Experience in Guidewire configuration and integration experience with Claim Centre, Policy Centre and Billing centre.
- Extensive understanding & experience of migrating insurance suite solutions to Guidewire solutions.
- Well versed in service-oriented architecture, XML schema design and generation.
- Experience in facilitating Joint Requirement Planning (JRP) sessions with Business User Groups, conducting Joint Application Development (JAD) sessions with IT Groups and Conflict Management with Project team member
- Extensive experience in gathering business and application requirements, business processes, identifying risks, impact analysis, UML Modelling, Sequence and Activity Diagrams using Rational Rose and Microsoft Visio.
- Facilitated and managed JAD sessions with committee of SMEs from various business areas including auto insurance, homeowner's insurance etc.
- Proficient in creating tailor-made Business Requirement Documents (BRD), Functional Requirement Documents
- Proficient in Guidewire platform workflow, Claim, Billing, and Policy Centre.
- Excellent skills in writing Business Requirement Documents, Functional Requirement Documents, System Design Specification, Workflows, and diagramming skills for drawing UML diagrams such as activity diagram, sequence diagram, use case diagram, and class diagrams.
- Well versed in SQL queries, OLTP, and OLAP system for Data Mining and Data Profiling.
- proficient in writing SQL queries and conduct data analysis using SQL and Good working knowledge of MS Excel
- Performed Data mapping, logical data modelling, involved in creating class diagrams and ER diagrams and used SQL queries to filter data.
- Developed efficient business relationships with various client teams to process and support requirements, develop tactical and strategic plans to implement technology solutions, and effectively managed client expectations.
- Team player and self-starter with excellent communication, coordination, documentation, project planning, and interpersonal skills.
- Extensive experience in elaborating, developing, and testing various functionalities in Guidewire products Billing Centre and Claim Centre. Fair understanding of Policy enters functionality and experience in elaborating Policy Cancellation and Policy Renewal related user stories
- Good understanding of Rational Unified Process (RUP) methodology, Use Cases, Software Development Life Cycle (SDLC) processes, and Agile.
- Strong experience with QA team in developing Test Scripts, Test Cases and Test Plan for User Acceptance testing.

| <b>Project 1</b>        | Implementation of Specialty (Excess & Surplus Lines of Insurance) for Risk on PAS and Billing system. Requirement elicitation and organizing requirement sessions, creating requirement documents and managing traceability. Implemented ISO forms skeleton, along with specific forms. Underwriting rules and policy workflow on SharePoint. Document management on SharePoint. Creation of Statutory reports, financial reports and reinsurance bordereau. JIRA tool for Issue management/time management and requirement tractability.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Project 2</b>        | Production Support on Business Owners issues related to Agent portal, providing work arounds to complete policy workflow, recreating issues in test environment and creating tickets. State Rollouts - eliciting state revision requirements from Solution Center through ISO circular provided by carrier. Validating changes in manuscripts from ISO circulars, taking signoff from carrier. Coordinating with vendor team to push changes to carrier system and completion of testing by QA team. Helping carrier in UAT and taking signoff for Production.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| <b>Project</b>          | Allianz provides Specialty and Standard Commercial Lines Insurance products. Allianz offers General Liability, Property and Inland Marine coverage for a wide variety of Excess and Surplus (E&S) risks including contractors, day care, distributors, farm, garage, habitational, hotels, manufacturers, a variety of mercantile risks, restaurants and bars, special events, vacant risks and many other types of exposures. The purpose of the project was to implement functionality of "Policy in a Box" initiative. Release 1 is currently defined to consist of the implementation of policy administration for nine ISO Commercial Lines products (Property, GL, Crime, Inland Marine, Auto, Workers Comp, Umbrella, CPP, and Massachusetts Auto) and one program - Program Brokerage Corp (PBC).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| <b>Project</b>                      | My project at Alfa Mutual Insurance involved working on project which was to transform the legacy application to the new Policy Administration System of Guidewire Suite which includes brand new Portal for agents, Guidewire's powerful Policy enter, Billing enter and Claim enter.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| <b>Policy Administration System</b> | The main goal of the project included upgrading the generation old company Policy administration system with the Guidewire policy centre platform. The application would generate automated quote, policy lifecycle - Product definitions, Endorsements, Underwriting, Quoting, Renewals, and Binding, expand the areas for risk details, and allow automated and manual policy renewable features.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
