

Name: Yasaswini Bobbilla
Sr. .Net Developer
Email: yasaswini094@gmail.com
Phone: 8722285828

PROFESSIONAL SUMMARY:

- **10+ years** of experience as a **Senior .Net Developer** in various phases of software development life cycle with Software Analysis, Design, Development, Coding, Integration, Maintenance, Testing, Process Control, and Maintenance of Multi-tier, Transactional web, and window-based applications.
- Experience in **.NET Framework 4.8/4.7/4.6/4.5/4.0/3.5/3.0** Web-based application development using **Microsoft.NET** technologies including **ASP.NET, C#, WCF, MVC, jQuery, AJAX, LINQ, Entity Framework, Web Services, MS - SQL Server 2008/2012, 2016, ADO.NET, IIS, HTML, JavaScript, XML.**
- Working experience on projects using the latest Microsoft technologies such as Visual Studio **.NET, C#. NET, ASP.NET, VB.NET ADO.NET, XML Web Services, REST, WCF, and Microsoft Azure.**
- Experience in developing highly scalable web applications with a focus on usability and performance.
- Extensive experience in architecture, design, and development of Client-Server and Distributed Web Applications with **MVC, MVVM, and 3-Tire Architecture** using **Web Forms and Razor view engine.**
- Solid knowledge and experience with **Web Forms, LINQ, CSS, AJAX, and JavaScript** consuming and manipulating data using **ADO.NET.**
- Worked on the applications developed on **Service Oriented Architecture (SOA)**
- Knowledge of creating REST Services using **ASP.NET Web API / Web API Core** and **C#.**
- Experience in developing **Microservices** to utilize **.NET Core REST Webservices** in the client's environment.
- Hands-on experience in building single-page applications using **Angular JS.**
- Experience in building world-class **UX** in Expression **Blend 4.0/3.0/2.0** using **Silverlight 4.0/3.0** and **WPF 4.0/3.0.**
- Good knowledge of **XAML, ASP.NET, MVC 4.0, AJAX, Java Script, JQuery, Knockout, VBScript, XML, XSLT, HTML.**
- Experience in creating reusable components like grids, models, sheets, date-picker, and dropdowns using **Angular JS and Angular 10.**
- Implemented **Figma CSS** for rich look and feel and styling of the application.
- Set up the development environment using the latest **BLAZOR.NET** with **ASP.NET CORE.**
- Expert experience in **Microsoft Azure services** like **VM, Azure Service bus, App service, Microsoft Power Apps**
- Experience deploying applications in **AZURE Cloud (platform as a service).**
- Experience with NoSQL databases like **Azure Cosmos, MongoDB and Couchbase.**
- Experienced in **Azure** deployment and worked on Microsoft Azure API Management
- Expertise in developing multi-Cloud strategies in better using **GCP (For its PAAS)**
- Possess the domain knowledge on all the platforms of **Microsoft Azure Cloud Technology** like **SQL azure, blob storage, resource manager, service bus.**
- Technical proficiency in Microsoft Technologies such as .Net frameworks, ASP.NET MVC, .NET Core, Blazor, Web API, WCF, WPF, WinForms, WebForms, LINQ, ADO.NET, AJAX, and SQL Server.
- Strong database interaction skills using **ADO.Net** objects and database design using SQL Server.
- Proficient in front-end technologies like **HTML5, CSS3, AngularJS, ReactJS, JavaScript, Ajax, JQuery, Bootstrap, Kendo UI, Razor, Blazor, and Telerik Controls.**
- Hands-on experience with **Microsoft Azure** for system deployment and maintenance using Azure Blob Storage, Virtual Networks, Virtual Machines, Azure Service Bus, and more.
- Experience with **AWS Cloud services** such as EC2, S3, AWS Lambda, EBS, IAM, VPC, CloudFormation and CloudWatch.

- Worked in **Cross Functional teams** to gather requirements and implemented them in the desired project.
- Implemented and managed **SharePoint** Online sites, ensuring seamless integration with the Microsoft ecosystem. This enhanced team collaboration and productivity by streamlining document management, automating workflows, and enabling secure, real-time information sharing.
- Expertise in **.Net security features, Entity Framework, Language-Integrated Query (LINQ), XML Web Services (SOAP/REST), and JSON-based Web API.**
- Hands-on experience with **REST API** Documentation using **Swagger.**
- Experience in working with **Angular JS and Angular 8/10/12, ReactJS and VueJS.**
- Experience in **Vue.JS** for building apps and declarative templates with data binding, created some custom directives in the application. Working experience in Development and Programming using **SQL Server** and **Oracle.**
- Strong database skills including database design, query optimization, and performance tuning using SQL Server.
- Good Hands-on experience in using **jQuery UI** Controls for creating rich and fast user interface.
- Knowledge of Object-Oriented Design Methodology (OOPS) using MS Visio and business objects reports using **Crystal Reports** and **SQL Server Reporting Services.**
- Proficient in writing Unit Test Cases for business logic and Web Services, performed Unit Testing using **NUnit** Testing Framework.
- Experience in setting up company version policies, build schedule using **Team Foundation Server (TFS), Git, GitHub** and **Bitbucket.**

TECHNICAL SKILLS:

Languages	C#, .NET Core 6/5/3.1/3, VB6, VB.NET, C, C++, SQL, PL/SQL, and T-SQL, Python
.Net Technologies	Microsoft .NET Framework 3.0/3.5/4.0/4.5.1/4.5.2/4.6/4.7/4.8 (CLR, CLS, CTS), C# VB.NET, ASP.NET, ASP, ADO.NET, XML Web Services, Web Forms, SOAP, LINQ, N Unit, WCF, WPF, AJAX, Entity Framework, MVC, Web API
Web Technologies	DHTML, XML, Figma, CSS3, HTML5, JavaScript, Power Shell Scripting, Angular JS, Blazor, React JS, Node.JS, Vue JS , Angular, Typescript
CMS	Sitecore 7.5,8.2, SharePoint Enterprise Content Management
Database	MS-SQL Server 2005/2008/2008R2/2012/2016, MYSQL, PL/SQL, MS Access 2007, DB2, MongoDB
Cloud Technologies	Azure, GCP
Middleware	Web services, WCF Services, SQL Server Integration Services.
Reporting Tools	Crystal Reports, SQL Server Reporting Services, SSIS Databases
Design pattern	MVC, MVP, MVVM.
Testing Tools	NUnit

PROFESSIONAL EXPERIENCE:

Ally Financial - Detroit, Michigan

Dec 2022 to Present

Sr. .Net Full Stack Developer

Responsibilities:

- Designed and developed new features for the application using **C#** within .NET framework.
- Developed web pages using **ASP.NET MVC 5, Entity Framework 6, C#, HTML5, Bootstrap, CSS3, JavaScript, jQuery, React with Redux, PL/SQL.**
- Implemented **ASP.NET MVC 5** strongly typed views, partial views, and attribute routing.
- Involved in **Azure Infrastructure Management (Azure web role, Worker role, Azure Storage).**
- Worked on **Queues, Blobs, and Containers** to persist data on **Azure.**
- Utilized **Oracle DB** for storing the data related to the recruitment and wrote efficient queries and stored procedures that saved the manual efforts of cleaning the data and efficient data handling and sanitized data.
- Developed an **Azure-based high-performance compute environment** to support the massive computational requirements of client congressional redistricting Azure application.

- Worked with **ASP.NET** Web Forms, Web Services, and State Management, caching features, configuring optimizations, and securing the web application.
- Created & hosted **WCF Services** and used different bindings to make it available to different types of clients.
- Fixed issues on the legacy applications which was developed using **VB6 components**.
- Developed the business layer with LINQ to Objects using **LINQ Connect** to Oracle.
- Leveraged **.NET Core** features in building APIs using **Microservices** pattern implementation using Azure storage queues. Implemented the **Rest APIs** by using **ASP.NET Web API 2.0**.
- Implemented **RESTful API's** with **Azure Service Fabric** stateless **Microservices** using **ASP.NET Core**.
- Developed loosely coupled applications using **WPF, C#, MVVM Pattern, LINQ, dependency Injection container unity container, and NHibernate**.
- Strong Knowledge of building world-class **UX** in Expression **Blend 4.0/3.0/2.0** using **Silverlight 4.0/3.0** and **WPF 4.0/3.0**.
- Used various **WPF controls**, and **Telerik controls**, and **developed user controls** to design custom **UI** to meet the requirements and to increase the ease of use for customers.
- **Developed and customized low-code business applications** using **Microsoft Power Apps** to automate workflows and enhance productivity.
- Used **ASP.NET Web API** and worked with different Http verbs such as Get, Post, Put, and Delete and returned JSON format.
- Managed **Azure Virtual Networks, Storage Containers, and Load Balancers** for optimal performance.
- Implemented **Azure Blob** for storing unstructured data and deploying web applications.
- Implemented **JWT Token** based authentication to secure the **ASP.NET Web API** and provided authorization to different users. Used **Swagger** to test ASP.NET CORE WEB APIs.
- Implemented Data Access Layer (DAL) of Web API using **Entity Framework 6**.
- Used **GIT** for the version control for check-in, branch merging and creating build definitions.
- Configured report server and report manager scheduling, worked on giving permissions to different level of users in **SQL Server Reporting Services (SSRS)**.
- Authorized API's using **OAuth2**
- Deployed **ASP.Net Core** web application using an **Azure DevOps pipeline**.
- Developed distributed and scalable web applications using **Visual Studio 2019**.
- Wrote T-SQL queries, views, functions, stored procedures, and triggers in SQL Server for data manipulation and management.
- Utilized **GIT** for version control and Jenkins for continuous integration, ensuring code quality and reliability.
- Managed project workflows, collaboration, and software development tasks using **Jira and Azure DevOps**, facilitating efficient project management and communication.
- Wrote and executed the test cases using **NUnit testing framework** to test functionality. Performed **Nunit** testing on the developed modules according to the requirement

Environment: .Net 4.8, Visual Studio Code, C#, VB.NET, .Net Core, VB6, ADO.NET, Entity Framework, SQL Server 2016, PL/SQL, ASP.NET MVC 5, XAML,WPF, HTML5, CSS3, JavaScript, ES6, Bootstrap, ReactJS, Redux, Microsoft Azure, Power Apps, RESTful services using ASP.NET WEB API, ASP.NET CORE, Microservices, Swagger, Windows Service, VSTS, TFS, NUnit, Azure DevOps

Texas Capital Bank, Dallas, TX

Sep 2020 to Nov 2022

Sr. .NET Full Stack Developer

Responsibilities:

- Designed and developed the **Reusable UI Components** like **MVC Master Pages Layouts** and Nested Layouts, View Start and MVC User Controls Partial Views.

- Worked on **Entity Framework** generating ORM Models and integrating them thru **Repositories** and **LINQ** to Entities to massage the data and to Add Migrations, Update database.
- Implemented **ASP.NET MVC security** Views to enable fast coding workflow and quickly integrate server code into HTML markup with minimum of keystrokes.
- Used **ASP.NET MVC framework** to support the use of Dependency Injection to inject objects into a class instead of relying on the class to create the object itself.
- Build **Data Sync job** on **Windows Azure** to synchronize data from SQL 2012 databases to SQL Azure.
- Implemented Security in Web Applications using Azure and Deployed Web Applications to Azure.
- Used **Microsoft Azure Web jobs** for batch processing job which can do resource intensive tasks like sending emails, listen to a queue, etc.
- **Deployed and maintained Power Apps solutions** in **Microsoft Azure and Dataverse environments**, ensuring scalability and security and low code.
- Implemented high availability with **Azure Classic** and **Azure Resource Manager** deployment models.
- Designed **Network Security Groups (NSGs)** to control inbound and outbound access to **network interfaces (NICs), VMs and subnets**.
- Setup **Azure Virtual Appliances (VMs)** to meet security requirements as software-based appliance functions (firewall, WAN optimization and intrusion detections).
- Delivered project by using **Agile methodologies** which allows us to adapt quickly for changing the requirements.
- Used Agile methodologies for delivering success
- Created fully automated deployment of infrastructure in Azure using **Azure DevOps Pipelines**
- Involved in mentoring new and existing staff on **WPF, XAML, Silverlight, and WCF**.
- Developed the **Microservices** using **.Net Core** and followed the standards for DDD (Domain Driven Development).
- Involved in developing frontend systems with **JavaScript, Bootstrap, HTML5, Kendo UI, CSS3, MVC Frameworks** such as **Angular JS** and **Node JS** as a platform for web applications.
- Improved **.NET web services (.asmx)** to achieve robust & seamless data transfer from external agency. Published and consumed new **WCF services (.svc)** for inter-apps data transfer.
- Used VUE.JS front-end framework that was built to organize and simplify for web development.
- Implemented global error handling by extending Error Handler class using **Angular 8**.
- Created Single page application with the help of **Angular 8** router module and used template routing for bread crumb using Restful web services with **AJAX** and used **Webpack** for bundling the modules.
- Upgraded an existing **Angular 8/10** application project to **Angular 8**. Initially used **Angular 8/10** CLI but later switched to Angular 8.
- Created **VB6.0** windows client which uses windows services and asmx web services.
- Applied Restful Web API to implement repository pattern to achieve separation of concern principle and Connected Web API with controllers using HTTP protocol such as GET, POST, PUT, and DELETE.
- Created JIRA Workflows for multiple projects according to business needs.
- Created and consumed **WCF services** in the application, created WCF client proxy to communicate with services, made synchronous and asynchronous WCF service calls.
- Designed and Developed **Unit** and Integration Tests using **NUnit and MOQ** framework to test the individual pieces of the functionality.
- Used **Git Flow and Bitbucket** to manage source control of new features, releases, and hot fix enhancements.
- Implemented authentication for **NO SQL DB** through **Cassandra** connector scripts for enabling the scripts to run.
- Managed project repository and versioning control using **GIT**, implementing continuous integration with **Jenkins**.
- Developed enterprise reports by extracting data from various sources and presenting them in **SQL Server**

Reporting Service (SSRS).

- Managed project workflows and task assignments using **Jira**, ensuring timely delivery of features and milestones.
- Created automated unit test plans and performed unit testing with **NUnit**, ensuring code reliability and adherence to requirements.

Environment: C#, ASP.Net Core, ASP.NET Framework 4.7, .Net Core, Visual Studio 2017, Dapper, Entity Framework, WEB API Core, Microservices, WPF, Docker, Redis, Postman, Azure cloud, Power Apps, CI CD, Jenkins, Auto mapper, NHibernate, Unit Testing, NSubstitute, N Unit, WCF, LINQ, T-SQL, Vault, Kubernetes, JSON, XML, GitHub, SQL Server 2018, Trello, React JS, Angular 8, Webpack, NUnit, Azure DevOps

Delta Airlines, Georgia, AL

Feb 2018 to Aug 2020

.NET Developer

Responsibilities:

- Designed and developed application using jQuery on client side and **ASP.NET MVC** in Service oriented architecture (SOA).
- Developed front-end using **ASP.NET MVC**. Involved in building a rich web experience using **MVC** and extensively used **Web grid**, **MVC** controls and many other controls with Paging and Sorting for displaying various data on the page.
- Developed **ASP.NET Core Web API** based on departmental requirements and specifications.
- Worked with advanced concepts of **ASP.NET Core MVC** such as Models and Providers, Filters used for developing backend technology.
- Designed **ASP.NET Web API** to serve hundreds of users simultaneously.
- Designed and developed dynamic **CSHTML** web pages using **C#, ASP.Net MVC, JSON, HTML5, Java Script and jQuery** and also used **Figma** for better style and appearance of the webpages.
- Developed dynamic responsive web application by integrating **Angular** with **Bootstrap** which is further integrated with web services and **VUE.JS**.
- Implemented the security reasons using **ASP.NET controls**, Authentication and Authorization.
- Made changes in webcomic file according to the requirements to configure **ASP.NET MVC application**.
- Handled both client-side State Management (view state, cookies, and Query string) and Server-side State Management (Sessions).
- Used **XML and REST microservices** to exchange structured and typed information with help of web service over the Internet.
- Hosted Windows Web APIs and ASP.NET applications in **IIS**, deploying cloud instances using **AWS** for production environments.
- Managed and expanded **AWS S3** infrastructure, incorporating **AWS SNS and SQS** for enhanced functionality.
- Defined **AWS Security Groups** to control traffic to **AWS EC2 instances**, ensuring secure access.
- Implemented monitoring and alerting of production and corporate servers/storage using **AWS CloudWatch**.
- Utilized **ASP.Net** web server controls like Grid View, List View, and Repeater, integrating Kendo UI for customized user interface components.
- Analyzed **Angular JS** for doing validations but went with J-Query as per the requirement.
- Client-Side code was written in **React JS, Backbone JS** and **Server-Side Code** were developed using **MVC4**.
- Developed **SOAP WCF Services** upon a core architecture that is scalable, distributable, heavily multi-threaded and batch compatible and designed to serve hundreds of users simultaneously.
- Converted **.NET** objects into XML by using Data Contract as main mechanism in **WCF**.
- Extensively used Entity Framework code first for creating the stores to improve the performance.
- Developed Queries, stored procedures, triggers, and functions for **PL/SQL**.

- Developed test driven development strategy guiding use of the **NUnit** testing framework.
- Used **GitHub** and **TFS** for the purpose of version controls.

Environment: Visual Studio 2015, SharePoint Server .NET Framework 4.5, ASP.NET MVC, .Net Core, Microservices, C#, ASP.NET Core 2.0, ASP.NET Core WEB API, Entity Framework Core 2.0, Windows Services, Web Services, XML, XAML, GitHub, TFS, Master Pages, CSS, WCF, SOAP, PL/SQL, Bootstrap, AngularJS, Kendo UI, JavaScript, SSIS, SSRS jQuery, Entity Framework 5.0, NUnit, Jira

Mutual Mobile, Hyderabad, India

Apr 2015 to Oct 2017

.NET Developer

Responsibilities:

- Actively participated in framework coding and test logging activities on all the tool features.
- Involved in requirements gathering, analysis, design, and code review and development stages.
- Communicated with business analysts, project managers and testers, to understand detailed business requirements at all stages of the development lifecycle.
- Created custom Reports using **SSRS**.
- Worked on validating Anti Forgery attacks using custom and inbuilt validation facilities in **ASP.Net MVC environment**.
- Handled run time and execution time errors by implementing appropriate Error Handlers.
- Used **jQuery** for DOM manipulations and client-side validations.
- Used **LINQ** to Entities and LINQ to objects for CRUD operations.
- Designed and developed an integrated n-tier web application using **C#, ASP.NET 4** and **ADO.NET**.
- Designed web UI using **ASP.NET, HTML, JavaScript, CSS, Web Forms** and **AJAX controls**.
- Used **jQuery** to implement user interface controls to validate client-side validation.
- Extensively worked on develop T-SQL in SQL Server 2012.
- Created Synchrony and Asynchrony Event Handler in designing and Building the Web Server Architecture.
- Customized Service using **WCF**, sending **JSON** format data packets between front-end and middle-tier controller.
- Created database tables, stored procedures, triggers, views, and functions in SQL Server.
- Involved in Preparation of Test Cases and Unit testing for the developed functionalities.
- Used Team Foundation Server for source control, data collection, reporting and project tracking.
- Involved in code review process and performed **NUnit testing** before deploying the project through IIS for local servers.

Environment: .Net 4, Visual Studio 2015, SQL Server2008, Oracle, SSRS, WCF, ASP.NET MVC 4.0, Entity Framework, C# 4.0, JavaScript, jQuery, Bootstrap, AJAX, NUnit

Linkfields Innovations, Hyderabad, India

Jun 2014 to Mar 2015

.NET Developer

Responsibilities:

- Implemented CRUD functionality with Entity framework in **ASP.NET MVC**.
- Responsible for developing the reusable Components on UI(Views) by developing the Partial Views, View starts, and reusable components for implementing the business rules.
- Responsible for making **AJAX** Calls for the UI Interactions to the Controller Actions using **jQuery** and getting Data back as **JSON** and parsing it onto the UI.
- Designed and developed the **C#** components for implementing business logic which is used to do the transactions on database using **ADO.NET**.
- Worked on applications software development efforts from deployment through the maintenance support

process.

- Designed Graphical User Interface (GUI) using **Master Pages, HTML, JavaScript, and CSS classes & Angular JS.**
- Responsible for designing and developing the database objects like Tables, Views, and Complex T-SQL Store Procedures involving Joins and using Temporary Tables, UDF (User Defined Functions).
- Implemented **CRUD functionality** with Entity framework in **ASP.NET MVC** and implemented sorting, filtering, and paging with Entity framework in MVC.
- Responsible in created and consumed **WCF (Windows Communication Foundation) using C#.**
- Written Stored Procedures, Triggers and Functions for Database Applications.
- Used LINQ to SQL extensively for extracting data from the database using Entity Framework.
- Created **SSIS Packages** as per **ETL Specification.**
- Developed Reports using **SQL Reporting Services** and implemented Optimized SQL Stored Procedures.
- Used **Team foundation Server (TFS)** for version control and shelve pending changes of the source code along with the maintenance of the builds and the relevant documents of the same.

Environment: ASP.NET 3.5, C#.NET, MVC 4, LINQ, XML, SSIS, WCF Services, HTML, JavaScript, jQuery, SQL Server 2008, Entity Framework, Enterprise Library, Windows XP
