

YETUNDE ZOLLNER

PROFESSIONAL SUMMARY

ServiceNow Developer

Experienced ServiceNow Development with a strong background in platform management, customization, and automation. Skilled in configuring and optimizing ServiceNow modules, including Incident, Problem, Change, and Service Catalog. I am proficient in scripting with JavaScript and Glide to enhance workflows, UI policies, and business rules. Expert in system integrations using APIs and web services for seamless communication between enterprise applications. Strong understanding of CMDB management for accurate IT asset tracking and configuration control. Adept at troubleshooting and resolving ServiceNow issues to ensure platform stability and efficiency.

Well-versed in Agile methodologies, collaborating with cross-functional teams to implement ServiceNow solutions aligned with business objectives. Experienced in maintaining security protocols, role-based access controls, and compliance with internal policies. Passionate about process automation, Virtual Agent development, and optimizing ITSM workflows for improved operational efficiency. Skilled in creating dashboards, reports, and analytics to support decision-making. Committed to providing end-user training and support for maximum ServiceNow adoption and usability.
