PROFILE

- **Senior Full Stack Engineer** with expertise in **Python, Django, Flask, Golang, Nodejs, and modern frontend frameworks** (React, Angular, Vue.js).
- Experienced in **microservices architecture, cloud computing (AWS, GCP), and DevOps best practices**.
- Proficient in **designing and optimizing scalable, high-performance backend systems**.
- Skilled in **AI-driven analytics integration**, improving system intelligence and efficiency.
- Strong background in **event-driven architectures** (Kafka, RabbitMQ) and **containerized deployments** (Docker, Kubernetes).
- Experienced in **CI/CD pipeline development**, ensuring seamless deployment and automation.
- Proven leader in guiding cross-functional teams, mentoring engineers, and fostering technical innovation.
- Committed to **delivering enterprise-grade software solutions** that enhance performance, security, and compliance (e.g., HIPAA).

EMPLOYMENT HISTORY

Senior Python Full Stack Engineer, Cognizant Teaneck, New Jersey

Sep 2023 — Feb 2025

Tech Stack: **Python, Django, Flask, FastAPI, Golang, PostgreSQL, MySQL, RESTful APIs, gRPC, AWS (EC2, S3, Lambda), Kubernetes, Docker, Terraform, Redis, React.js, GraphQL, CI/CD (Jenkins, Gitlab CI/CD), Microservices Architecture, Unit & Integration Testing, RabbitMQ, Kafka, Prometheus & Grafana for Monitoring**

- Engineered **high-performance RESTful APIs** using **Python (Django, FastAPI)**, optimizing **latency by 30%** and efficiently handling **50,000+ concurrent requests**.
- Utilized Python's **asyncio and multiprocessing** capabilities to enhance **backend performance**, ensuring **high throughput and low-latency API responses**.
- Architected **scalable microservices** using **Django, SQLAlchemy, and Kafka**, ensuring **modularity, resilience, and efficient inter-service communication**.

- Integrated **AI-driven analytics** into the **ERP system** via **FastAPI-based APIs**, improving **predictive accuracy and real-time data processing by 25%**.
- Teamed up with **data scientists** to deploy **machine learning models as microservices**, leveraging **Python's robust ecosystem (TensorFlow, PyTorch)** for **efficient inference and scalability**.
- Implemented **robust security measures**, including **OAuth2 and JWT authentication**, ensuring **compliance with HIPAA and industry security standards**.
- Designed and managed **cloud infrastructure** using **AWS services (EC2, Lambda, S3)** to optimize **cost, availability, and scalability**, reducing **operational expenses by 20%**.
- Led **CI/CD pipeline automation** with **GitLab CI/CD, Jenkins, Docker, and Kubernetes**, streamlining **deployment workflows and enhancing system reliability**.
- Partnered with **frontend teams** to ensure **seamless integration of React-based UIs with Django APIs**, enabling **real-time data synchronization**.
- Employed **PyTest, unittest, and TestContainers** for **comprehensive unit and integration test suites**, ensuring **high code quality and system reliability**.

Senior Full Stack Engineer (Python/Golang), Mountain View, CA
Google

Jul 2020 — Aug 2023

Tech Stack: **Python (Django, FastAPI), Golang, Google Cloud Platform (GCP), Node.js, Redis, Angular, Vue.js, Git, BigQuery, Firebase, WebRTC, Elasticsearch, CQRS, Istio Service Mesh, Sentry, WASM**

- Spearheaded the development of **scalable, microservices-based architectures** using **Python (Django, FastAPI)**, optimizing backend systems to handle high data volumes and ensure real-time processing.
- Played a key role in evolving **Google Analytics**, designing and implementing advanced features that improved data tracking, real-time insights, and reporting for millions of users.
- Leveraged **Python** to develop **performance-critical backend services**, reducing latency by **40%** and improving overall system efficiency, while collaborating with frontend teams using **Angular and Vue.js** for seamless UI integration.
- Drove continuous improvements within Google Analytics by creating custom data pipelines, optimizing **RESTful APIs**, and enhancing the reporting system, boosting **user engagement by 20%** and **customer satisfaction by 15%**.
- Built and maintained robust backend services in **Python (Django, FastAPI)**, ensuring smooth integration with other systems and providing high availability for mission-critical applications.
- Collaborated with cross-functional teams to design and implement new features for **Google Analytics**, improving **user experience** through intuitive dashboards and custom reporting tools, resulting in a **10% increase in active users**.
- Implemented distributed caching with **Redis** and **Elasticsearch**, enhancing query performance and reducing system load for high-traffic applications.

- Used **Google Cloud Platform (GCP)** services, including **BigQuery, Firebase, and Istio Service Mesh**, to optimize cloud-based deployments, improving scalability and system resilience.
- **Mentored** junior engineers, conducted code reviews, and promoted best practices in backend development, fostering a culture of continuous improvement.

Full Stack Developer, Xerox

Norwalk, CT

May 2017 — Jun 2020

Xerox is a company known for its **printing** and **document management** solutions, offering products like **printers, copiers**, and **scanning** technologies for businesses.

Tech Stack: **Python, Golang, MySQL, React.js, Angular, CI/CD (Jenkins, GitLab CI/CD), MongoDB, Swagger, OpenAPI, Bash Scripting, GraphQL Federation, PDF Processing, Apache Kafka**

- Developed and maintained high-performance **document management systems** using **Python(Django, Flask), Golang, Node.js**, and **React** to improve business processes.
- Built scalable backend services with **Python, Golang**, optimizing performance and reducing system downtime.
- Cooperated with frontend teams to create seamless user interfaces with **Angular** and **React**, enhancing the overall user experience.
- Worked on building **cloud-based applications** for document storage, retrieval, and printing, improving efficiency and reliability.
- Helped improve **operational efficiency** for clients by streamlining document workflows and reducing processing time.

EDUCATION

Bachelor, University of New Haven

West Haven, CT

Apr 2017

Computer Science

SKILLS

- **Backend Technologies:** Python (Django, Flask, FastAPI), Golang, Node.js (Express), REST APIs, GraphQL, gRPC, Event-Driven Systems (Kafka, RabbitMQ)
- **Frontend Technologies:** React.js, Angular, Vue.js, Redux, Vuex, Angular Services, WebRTC, WASM
- **Cloud & DevOps:** AWS, GCP, Docker, Kubernetes, Jenkins, Terraform
- **Databases:** MySQL, PostgreSQL, MongoDB, Redis
- **Version Control:** Git (GitHub, GitLab)
- **CI/CD:** Jenkins, GitLab CI/CD, CircleCI
