

JOHN WANG

Senior Full-stack Engineer – React, Node.js

wjohnwang92@gmail.com / Fremont, CA 94536 / (858) 356-2387

PROFILE

Experienced Software Engineer with a decade of expertise in building and optimizing web applications. Skilled in **JavaScript**, **TypeScript**, **React**, **Node.js**, and **Python**. Proven ability to lead development projects, enhance system performance, and create user-focused solutions. Dedicated to implementing best practices in agile environments and continuous integration for reliable and scalable software delivery.

EXPERIENCE

Atlassian

Senior Software Engineer, Remote / Mar 2022 – current

- Developed a scalable microservices architecture to support real-time video processing and storage, utilizing **Kubernetes**, **Docker**, and **Kafka**.
- Implemented robust API endpoints for third-party integrations with **Salesforce** and **Slack** using **Node.js** and **Express**.
- Enhanced application security by integrating **OAuth** and **JWT** for identity management and secure API access.
- Optimized Loom's video encoding and streaming algorithms, improving performance by 30% using **Python**.
- Spearheaded the **migration of the legacy monolith system to microservices**, reducing downtime and improving maintainability.
- Designed and implemented a **CI/CD** pipeline using **Jenkins** and **Terraform**, which reduced deployment time by 40%.
- **Conducted code reviews** and **mentored junior developers**, focusing on best practices in code quality and test-driven development.
- Collaborated with **UX/UI** teams to revamp the user interface, increasing user engagement by 25%.
- Constructed a robust design system by integrating design tokens provided by designers, and authored unit tests (**Jest**, **enzyme**, **Mocha**) and stories for these reusable components (**Storybook**).
- Integrated **GitHub CI/CD** pipelines to automate testing and deployment, significantly reducing manual efforts and speeding up our development cycle.

Used tech: React, Node.js, AWS, Kubernetes, Jest, Mocha, Storybook, Docker, Kafka, Python, OAuth, JWT, Express, Jenkins, Terraform, Git, Jira, Slack, Postgres, Elasticsearch, Redis, CSS, HTM

Torus

Senior Software Engineer, Remote / Jan 2018 – Feb 2022

- Implemented **RESTful APIs** to connect with various payment gateways and third-party logistics APIs, enhancing operational efficiency.
- Architected and implemented a microservices architecture using **Docker** and **Kubernetes**, enhancing **scalability**, **fault tolerance**, and simplifying application deployment.
- Employed **NX** and **Lerna** to manage mono-repo structure and streamline code sharing across projects.
- Enhanced **SEO** and initial page loading speeds by implementing **Server-Side Rendering (SSR)** and **Static Site Generation (SSG)** for **Single-Page Applications (SPAs)** using **Next.js**.
- Developed custom data analytics tools with **Python** and **MySQL** to provide real-time business insights and customer behavior analytics.
- Improved page rendering speeds and search engine discoverability by leveraging the Next.js framework to generate **pre-rendered HTML** on the server.
- Enhanced the site's **SEO** capabilities and implemented **A/B testing** scenarios to optimize user acquisition strategies.
- Automated the rollback of **Docker** containers through **GitHub CI/CD** pipelines, ensuring rapid response to any issues post-deployment and maintaining high availability of web services.
- Adhered to **Test-Driven Development (TDD)** principles to achieve 95% automation test coverage, ensuring superior code quality and minimizing the risk of regressions.

Used tech: JavaScript, AWS S3, CloudFront, Python, MySQL, React, SEO, A/B Testing, Docker, NX, Lerna, Next.js, HTML, CSS

Sourcebits

Software Engineer, California /Oct 2013 – Dec 2017

- Developed multiple mobile-responsive web applications from scratch using **HTML**, **CSS**, **JavaScript**, and **React**.
- Built and maintained server-side applications using **Python** and **Django**, interfacing with **MySQL** and **MongoDB** databases.
- Implemented features for a project management tool, enhancing collaboration across remote teams.
- Contributed to the development of a real-time chat application, using **WebSocket** for instant messaging capabilities.
- Automated repetitive tasks and processes using **Python** scripts, reducing manual effort by 50%.
- Ensured **cross-browser compatibility** and performed extensive testing to maintain high-quality software standards.
- Participated in daily scrum meetings, providing updates and collaborating on problem-solving.
- Assisted in the migration of legacy applications to modern technology stacks.
- Conducted **unit testing** and debugging to ensure software quality and performance.

Used tech: HTML, CSS, JavaScript, AngularJS, Python, Flask, MySQL, MongoDB, WebSocket, Scrum, Legacy Migration

Overall Tech Stacks and Technologies

JavaScript, TypeScript, Python, Storybook, Jest, Vitest, PHP, React, Node.js, AWS, Kubernetes, Docker, Kafka, OAuth, JWT, Express, Jenkins, Terraform, Git, Jira, Confluence, Slack, Postgres, Redis, CSS, HTML, PHP, Laravel, Vue.js, AWS S3, CloudFront, GDPR Compliance, SEO, A/B Testing, Machine Learning, AngularJS, Flask, MongoDB, WebSocket, Scrum.

EDUCATION

JUNE 2009 – JUNE 2013, The Hong Kong University of Science and Technology (HKUST), BA IN COMPUTER SCIENCE
