SUMMARY

Software Engineer with 7 years of experience in designing and developing scalable, high-throughput distributed and event-driven systems.

SKILLS

Frontend Development: Angular, React, Vue, HTML5, CSS, GraphQL, TypeScript.

Backend Development: Node.js, Java, Spring Boot, JavaEE, PHP, ASP.Net, Python, Express, Adonis, REST APIs, Microservices, WebSocket's, MongoDB, MySQL, Postgres, RabbitMQ, Kafka, Third-party Integrations

Cloud & Tools: AWS (S3, Lambda), Firebase, Docker, Kubernetes, CI/CD (GitHub Actions), Postman, GitHub, MongoDB Compass.

Project Management: Agile & Scrum methodologies.

WORK EXPERIENCE

Senior Full stack developer | Autoleap – Toronto, Canada

Oct 2022 - PRESENT

- Developed an automated **marketing module** to manage campaign calculations and templates, eliminating manual tasks. This led to improved efficiency, reduced client effort, and a **25%** boost in system performance.
- Reduced deployment **costs** and boosted performance by **35%** through CI/CD, query optimization, time trigger API, Queue Implementation, and caching, while **automating** client onboarding, cutting process time by **15%**.
- Integrated **third-party services** (Manual Order, PartsTech, TireConnect, SpeedDial) with Angular and Node.js, MongoDB saving **45%** of client time automation by streamlining order management into one platform
- Enhanced the feature by implementation cloud front leading to improved load time of **2 seconds**.

Senior Software Engineer | OPTIMYSE – Estonia

Nov 2021 – Oct 2022

- Created automated testing pipeline, reducing production bugs and ensuring **100%** uptime during high-traffic periods.
- Implemented automated unit tests and end-to-end tests, ensuring code quality and reducing production bugs.
- Designed a queue system to optimize import/export of **millions** of user records without impacting performance.
- Monitored technical aspects and system health during online orders with high traffic of **10K+** daily orders, ensuring **100%** availability and **0%** downtime, creating a significant advantage for the business.

FULL STACK DEVELOPER | Cubix – United States

Dec 2020 – Oct 2021

- Worked on various projects, including customer-facing web applications using Angular and Node.js, delivering user-friendly and efficient solutions.
- Implemented automated unit tests and end-to-end tests**, ensuring high code quality and stability.
- Developed an efficient architecture for the product, resulting in a faster and smarter way of ordering, increasing the overall product efficiency by **15%** in designing personalized plans for customers.

Software Engineer | 5cube – Karachi, Pakistan

Feb 2019 – Mar 2020

- Developed REST APIs using Python and Node.js, and successfully deployed them on the cloud for scalable solutions.
- Designed and deployed admin dashboards, integrating payment gateways and improving KPI tracking systems
- Enhanced product efficiency by **5%** by optimizing backend architectures and implementing robust APIs.
- Designed and integrated front-end pages with Node.js through RESTful APIs, creating seamless user experiences.

EDUCATION

BS in Computer Science and Information Technology

Jan 2015 – Feb 2019

Hamdard University – Karachi, Pakistan

Certification

Cisco Network Academy: Computer Hardware Certification. [Link](#)

AWS for SAP Fundamentals : [Link](#)

AWS cloud Economic for Banking : [Link](#)
