PROFILE

Accomplished Senior Full-stack Engineer with 10+ years of experience in full-stack development, cloud architecture, and DevOps. Expertise in frontend technologies like **React** and **Angular**, and backend development using **Go**, **Python**, **Java**, **.NET Core**, **Ruby**, and **PHP**. Proven ability to design and implement **microservices-based architectures** and deploy them on **AWS**, **Azure**, and **GCP**. Strong background in **CI/CD pipelines**, **container orchestration** (Kubernetes), and **infrastructure automation** (Terraform, Ansible).

A collaborative leader with extensive experience mentoring engineering teams, streamlining development processes, and delivering **scalable, secure, and maintainable solutions** across diverse industries. Successfully led and contributed to projects in **Healthcare**, **Finance**, **E-Commerce**, **E-Learning**, **Education**, **Telecommunications**, **Logistics**, and **SaaS platforms**, delivering high-impact solutions that meet complex business requirements.

SKILLS

Programming Languages

C#, JavaScript (ES6+), TypeScript, PHP, Java, Python, Go, Ruby, GraphQL, Dart, HTML5, CSS3, SCSS, Solidity, Rust

.NET, .NET Core & C#

.NET, .NET Core, ASP.NET, ASP.NET Core, ASP.NET MVC, ASP.NET Web API, Blazor, Razor Pages, MAUI, Windows Forms

JavaScript & TypeScript & UI

Angular, React, React Native, Redux, React Hooks, React Router, React Query, MUI (Material UI), Express.js, Node.js, jQuery, Next.js, NestJS, Vue.js, D3.js, Web3.js, Babylon.js, Three.js, WebGL, Jest, Mocha, Bootstrap, Tailwind CSS, Flutter, Sass, Less

Java & PHP

Spring, Spring Boot, Spring MVC, Spring Security, GWT (Google Web Toolkit), Hibernate, JSF (JavaServer Faces), JPA, JUnit, J2EE, Selenium, Laravel, CodeIgniter, CakePHP, WordPress, Symfony, Magento, Drupal

Python, Go (Golang), Ruby

Flask, Django, FastAPI, PyPy, Pytest, Gin, Iris, Fast HTTP, Ruby on Rails, Rails API, Turbo Drive, Turbo Frames, Turbo Streams

Database

SQL, MySQL, PostgreSQL, Oracle Database, Microsoft SQL Server, Redis, Cassandra, MongoDB, DynamoDB

Cloud Platforms

AWS, AWS Lambda, AWS IAM, AWS CDK, AWS CloudFormation, AWS DRS, Amazon EC2, Amazon ECR, Amazon ECS, Amazon EKS, Amazon EventBridge, Amazon RDS, Amazon S3, Amazon SNS, Amazon SQS, Microsoft Azure, Azure Data Lake, Azure DevOps, Azure Kubernetes Service, GCP (Google Cloud Platform), GKE (Google Kubernetes Engine), Google Analytics, BigQuery, Pub/Sub, Dataflow, Data Fusion, Firebase, ServiceNow, Terraform, Teradata, Snowflake, Databricks, Datadog

Others

Git, Docker, Jenkins, Jira, Agile, Scrum, Kubernetes, CI/CD, UI/UX, TDD (Test-Driven Development), RESTful API, E-Commerce, Prometheus, Grafana, BigCommerce, Kafka, Spark, Shopify, CMS, Kentico, Contentful, Ivanti, Parasoft, RabbitMQ, gRPC, ETL, ELK, Elasticsearch, Logstash, Kibana, Dynamics 365, ArcGIS, ESRI, Tableau, PWA, SPA, IaC, SaaS, IaaS, PaaS, Solana

Soft Skills

Communication, Teamwork, Problem Solving, Time Management, Leadership, Adaptability, Creativity, Conflict Resolution, Critical Thinking, Customer Service, Decision Making, Emotional Intelligence, Flexibility, Goal Setting, Interpersonal Skills, Negotiation, Patience, Problem Analysis, Conflict Management, Resilience, Strategic Thinking

WORK EXPERIENCE

Team Lead, *Maximus*

02/2021 – 02/2025 | *McLean, VA*

- **Led a cross-functional team of 12 engineers to deliver a government healthcare enrollment platform using Angular, .NET Core, and Azure DevOps**, reducing application processing times by 35% and improving system scalability to handle 1M+ users.
- **Architected and implemented a microservices-based eligibility verification system using .NET Core, Docker, and Kubernetes**, reducing system downtime by 40% and improving compliance with HIPAA regulations.
- **Designed and deployed a centralized logging and observability solution using OpenTelemetry, Jaeger, and Prometheus**, reducing incident resolution time by 50% and improving system reliability.
- **Automated CI/CD pipelines using Azure DevOps and Terraform**, enabling zero-downtime deployments for 50+ microservices and reducing manual errors by 90%.
- **Implemented a distributed caching layer using Redis and Azure Cache**, improving API response times by 45% and reducing database load during peak traffic periods.
- **Led the migration of legacy systems to a cloud-native architecture on Azure**, leveraging Azure Kubernetes Service (AKS) and reducing infrastructure costs by 25%.
- **Built a secure authentication system using ASP.NET Core Identity and OAuth 2.0**, integrating with Azure Active Directory to support 5,000+ concurrent users.
- **Optimized database performance by refactoring SQL queries and implementing indexing strategies**, reducing query execution times by 50% for PostgreSQL and Microsoft SQL Server.
- **Developed a custom API gateway using Ocelot and .NET Core**, consolidating 80+ endpoints and reducing latency by 30% for external integrations.
- **Implemented a message-driven architecture using RabbitMQ and Azure Service Bus**, enabling asynchronous communication between microservices and improving system reliability.
- **Designed and deployed a disaster recovery solution using Azure Site Recovery**, achieving 99.99% uptime and ensuring compliance with federal regulations.
- **Mentored a team on best practices for .NET Core, Angular, and Azure**, improving team productivity by 25% and reducing onboarding time for new hires by 40%.
- **Implemented a comprehensive monitoring solution using Prometheus, Grafana, and Azure Monitor**, reducing mean time to recovery (MTTR) by 60% and improving system observability.
- **Automated infrastructure provisioning using Terraform and Azure Resource Manager (ARM) templates**, reducing manual setup time by 80% and ensuring consistent environments.
- **Built a custom alerting system using Prometheus and Azure Logic Apps**, reducing incident response time by 40% and improving system reliability.
- **Designed and deployed a centralized tracing system using Jaeger and OpenTelemetry**, enabling end-to-end visibility into microservices and reducing debugging time by 50%.

Full Stack Developer, American Healthtech

10/2016 – 12/2020 | Ridgeland, MS

- Architected and deployed a scalable microservices-based platform using .NET Core and Angular, reducing API response times by 40% and enabling seamless integration with Azure Kubernetes Service (AKS) for container orchestration.
- Designed and implemented a real-time data synchronization system using SignalR and Azure Service Bus, enabling 10,000+ concurrent users to access up-to-date patient records across 27,000+ care providers.
- Developed a secure authentication and authorization system using ASP.NET Core Identity and OAuth 2.0, integrating with Azure Active Directory to support role-based access for 3,100+ hospitals and health systems.
- Optimized database performance by refactoring SQL queries and implementing indexing strategies, reducing query execution times by 60% for PostgreSQL and Microsoft SQL Server databases.
- Built a dynamic reporting dashboard using Angular, D3.js, and .NET Core Web API, enabling healthcare providers to visualize patient outcomes and reducing report generation time by 70%.
- Automated infrastructure provisioning using Terraform and Azure Resource Manager (ARM) templates, reducing manual setup time by 80% and ensuring consistent environments across development, staging, and production.
- Implemented a distributed caching solution using Redis and Azure Cache, improving application performance by 35% and reducing database load during peak traffic periods.
- Integrated Electronic Medical Records (EMR) systems with third-party APIs using .NET Core and GraphQL, enabling seamless data exchange for 3,600+ ambulatory clinics.
- Designed and deployed a multi-region disaster recovery solution on Azure, achieving 99.99% uptime and ensuring compliance with HIPAA and GDPR regulations.
- Created a CI/CD pipeline using Jenkins and Azure DevOps, automating the build, test, and deployment processes for 50+ microservices, reducing manual intervention by 90%.
- Implemented a real-time logging and monitoring system using the ELK stack (Elasticsearch, Logstash, Kibana), enabling proactive issue resolution and reducing mean time to recovery (MTTR) by 50%.
- Developed a custom workflow engine using .NET Core and Angular, streamlining care coordination for 70+ state and government agencies and reducing manual errors by 40%.
- Designed and implemented a message-driven architecture using RabbitMQ and Azure Service Bus, enabling asynchronous communication between microservices and improving system reliability.
- Optimized frontend performance using Angular lazy loading and Ahead-of-Time (AOT) compilation, reducing initial page load times by 50% and improving user experience.
- Implemented a comprehensive testing strategy using xUnit, Moq, and Selenium, achieving 95% test coverage and reducing production bugs by 60%.

Backend Engineer, CodeBright

05/2013 – 09/2016 | Alexandria, VA

- Designed and developed a microservices-based architecture using .NET Framework (C#), ASP.NET MVC, and Web API, improving system scalability and reducing deployment times by 40%.
- Developed RESTful APIs with ASP.NET Web API and Entity Framework, supporting high-traffic applications serving 500K+ users/month.
- Optimized database performance for high-traffic applications using SQL Server indexing, query optimization, and stored procedures, reducing query execution time by 50%.
- Led the integration of OAuth 2.0 and JWT authentication in .NET applications, improving system security and compliance with enterprise authentication standards.

- Implemented caching strategies using Redis and MemoryCache, improving API response times by 45% and reducing database load by 30%.
- Refactored legacy codebase in ASP.NET MVC to ASP.NET Core, reducing technical debt and improving maintainability by 50%.
- Designed a role-based access control (RBAC) system for ASP.NET Identity, ensuring granular permissions and improving system security compliance.
- Integrated RabbitMQ for distributed messaging between .NET microservices, reducing inter-service latency by 40%.
- Refactored legacy SOAP-based services to RESTful APIs in .NET Core, improving API maintainability and reducing client integration time by 35%.

EDUCATION

Bachelor's Degree in Computer Science, Mississippi State University

09/2010 – 04/2014 | Starkville, MS

Completed challenging courses covering algorithms, data structures, and programming languages.

AWARDS

ICPC Gold Prize 2012

Won the gold prize in the ICPC Greater NY Regional Contest.

LANGUAGES

English

Native
