OBJECTIVE

Seeking a full-stack engineering role to leverage 6 years of experience in DevOps, AWS, and back-end development with Python and Typescript. Passionate about distributed systems and API-driven platforms; AWS ML certified and studying emerging AI trends.

EDUCATION

Bachelor of Computer Science - UIC (University of Illinois at Chicago)

2019

TECHNOLOGIES

- **Languages:** Python, Typescript, Ruby, PHP, JavaScript, C, Java, Terraform, HTML, CSS, SQL, Bash, OpenGL
- **Technologies:** CDK, Kubernetes, Docker, Linux, AWS, Web Protocols, GitLab, MySQL, MongoDB, RabbitMQ, ThreeJS, Vue3

WORK EXPERIENCE

Dashboard, LLC

DEC 2020 – Current

Web Developer / DevOps (full-time to part-time)

Chicago, IL

- Utilized Infrastructure as Code via CDK and Terraform to spin up Kubernetes via AWS EKS, MySQL RDS, Redis, Lambda functions, SNS topics, S3 CloudFront CDNs, custom Log Insight queries, etc., to support multiple web environments.
- Built Vue3 front-ends with PHP Blade and Vite, following RESTful MVC design.
- Integrated Mailgun, Mailcoach, and Unlayer for mailing and WYSIWYG editing. Supported with various ETL auto-fill processes.
- Cut pod deployment time by 50%+ via multi-staged Docker builds and CICD optimizations on the GitLab pipeline process.
- *Tech Stack:* CDK, LAMP, PHP Laravel, Vue3, Typescript, AWS, EKS Kubernetes, MySQL, Python Lambda functions

Protagona

JUN 2023 – APR 2025

Cloud Engineer (full-time)

- Deployed AWS cloud infrastructure with Serverless, CDK, and Terraform, adhering to industry linting standards, e.g. checkov.
- Provided observability, failover, and replication to various infrastructure pieces, including 3rd party Confluent Kafka integration.
- Automated Confluence documentation workflows with ETL scripts fetching data from GitLab and other sources.
- *Tech Stack:* AWS cloud, Python lambda functions, Kubernetes, Kafka

Versay Solutions

SEP 2019 – MAR 2020

IVR Developer (full-time)

Chicago, IL

- Expanded IVR across teams to implement call-flow and vendor business logic, including international production releases.
- Performed breadth & depth debugging across Internet Protocol suite; involving W3C open standards such as VoiceXML.
- *Tech Stack:* Ruby on Rails framework running on JRuby; containerized through Docker and Kubernetes.

Optics Planet

MAY 2018 – AUG 2018 | DEC 2018 – JUL 2019

Intern (full-time) & Jr. Software Developer (full-time)

Northbrook, IL

- Eliminated bugs from B2B APIs across FTP, SOAP, RabbitMQ, and REST APIs to front-end CSS.
- Audited MySQL schemas and tuned Elasticsearch-to-Doctrine ORM query paths by isolating outlier scenarios.
- *Tech Stack:* LAMP stack with PHP Symfony framework with databases MySQL and SQL Server.

SCC (Schafer Condon Carter)

FEB 2017 – AUG 2017

Web Developer Contractor (part-time)

Chicago, IL

- Conducted cross-browser web quality assurance through functional testing (Selenium) and load testing (Python Locust Library).
- Created ETL processes for AEM and mapped how AWS traffic flows from Route53 → VPC → AEM and Magento services.
- *Tech Stack:* Groovy/Java development in docker containers; Python scripting.

Federal Reserve Bank of Chicago

JUN 2015 – JAN 2016 | JUN 2016 – DEC 2016

Intern (full-time) & Contractor (part-time)

Chicago, IL

- Saved time for Scrum masters by creating a process to automate generating weekly Jira reports.
- Converted Spring4 framework-based Java projects to be built with Maven instead of the previous build-tool Ant.
- *Tech Stack:* Java, Jenkins, and Jira RESTful API.

PAST EXPERIENCE

Three Person Startup/Venture

JAN 2016 – MAY 2016

Programmer (part-time)

Chicago, IL

- Setup historical logging for solar panel data by utilizing Arduinos to forward digitized readings to running Node.js processes.
- Prototyped websites for back-testing financial data. Stack composing Python's Django, SQLite3, jQuery, and hosted on Ubuntu.

Abbott Laboratories

JUN 2013 – AUG 2013 | JUN 2014 – AUG 2014

Summer Intern (full-time)

Waukegan, IL

- Learned VBA to automate Excel data work that required synchronization against internal web sources. Visited data centers!
