

Yohanes Mesafint

Cary, NC | (571)-279-3137 | [LinkedIn](#) | ymesafin@gmail.com

Summary

Result-driven Cloud Engineer with three years of IT experience through full-time positions and freelancing. Certified in AWS & GCP with a strong drive to explore other cloud platforms. Skilled in Terraform, Kubernetes, Bash, Python, and SQL with a passion for scalable and secure cloud solutions. Actively seeking a dynamic role in Cloud Computing such as DevOps, SRE, or Big Data, to contribute to impactful and challenging projects.

Work Experience

Deutsche Bank

Cary, NC

Cloud Engineer

April 2022-Present

- Pioneered application debugging and leveraged GitHub actions & ArgoCD for Kubernetes deployment, reducing deployment cycle times by 40%.
- Rotated and renewed certificates & secrets within PKI/SM, reducing production security incidents by 30%.
- Contributed to the ongoing OpenShift migration (OCP 3 to OCP 4), focusing on service and secret migration, developing PoCs for certificate management and Helm secrets, and managing the infrastructure agent. Achieved 90% of service deployment, ensuring steady progress toward completion.
- Developed and modified Terraform scripts to automate the creation of GCP resources and role binding for service accounts, reducing manual efforts by 60%.
- Streamlined project management by employing Jira and documenting processes in Confluence, aligning with agile and kanban methodologies, resulting in a 30% increase in project delivery speed.

Fiverr/Upwork

Arlington, VA

Cloud Specialist (Freelance)

January 2022-January 2023

- Authored detailed technical documentation on cloud services and guided clients through AWS Solutions Architect exam preparation, achieving a client success rate of over 90%.
- Designed and presented architectural diagrams, clarifying service functionalities and benefits, resulting in 30% of enhanced client understanding as well as satisfaction.
- Configured and migrated on-premise databases to Amazon's RDS, ensuring seamless cloud integration and reducing operational costs by 30%.
- Facilitated the storage and management of massive data volumes in Amazon S3, Glue, and Redshift, increasing data processing performance by 50%.
