SUMMARY

Senior Software Engineer with **6+** years of experience in full-stack development, specializing in building scalable, efficient systems for fast-paced startup environments.

Proven track record of driving end-to-end product development, mentoring teams, and fostering cross-functional collaboration. Skilled at delivering innovative, high-performance solutions under tight deadlines and navigating technical challenges in dynamic, growth-focused settings.

EXPERIENCE

Medici Health

Austin, Texas | Remote

Senior Software Engineer 02/2021 - 03/2025

- Led the redeveloped **secure telehealth** features using Twilio APIs, including video consultations, SMS reminders, and session links and integrated AI patient monitoring system, resulting in a 15% increase in patient engagement.
- Designed and implemented a **unified appointment management system** to synchronize telehealth and in-person bookings, achieving real-time slot management and reducing scheduling conflicts by 30%.
- Integrated Stripe for secure, PCI-compliant **payment processing**, enabling seamless transactions for healthcare services.
- Built scalable **microservices** using **Java (Spring Boot)** and **Node.js/Express**, integrating secure authentication flows with **OAuth2** to protect sensitive patient and provider data.
- Developed **seamless dashboard** with **React** and **Vue.js** with **TypeScript**, ensuring secure, intuitive patient and provider experiences for booking and managing appointments.
- Worked on real-time metrics data ingestion and query service built in **Java**, **Microservice** and **Kafka**, used on all recent metrics data, including virtually all alerting/monitoring evaluations.
- Created data visualization dashboards using **D3.js** and **Python** (Pandas, NumPy) to deliver real-time analytics on patient trends and appointment utilization, reducing reporting delays by 25%.
- Architected a hybrid database solution: **MongoDB** for unstructured data to provide flexibility and scalability, and **PostgreSQL** for relational data to ensure **ACID** compliance and transactional integrity.
- Integrated **Apache Kafka** for real-time appointment and payment event streaming across microservices.
- Led the migration of the legacy systems to **AWS** cloud infrastructure using **Docker** and **Kubernetes**, enhancing scalability and reliability.
- Automated **CI/CD** workflows using **GitHub Actions**, implementing rigorous security checks and ensuring smooth deployments with minimal disruptions.
- Mentored 2 junior developers to optimize appointment workflows, ensuring security best practices and HIPAA compliance was integrated at every layer of the system.

Full Stack Engineer 07/2019 - 02/2021

- Developed responsive web applications for **internal management systems** and **patient-facing portals** using **Next.js**, as well as cross-platform mobile applications with **React Native**, ensuring smooth and intuitive user experiences across devices.
- Designed and executed backend **microservices** for user role management, and real-time system monitoring using **Node.js/Express** and **C#.NET**, leveraging **GraphQL** for efficient API integrations and dynamic data interactions.
- Optimized database performance for modules such as audit logging, report generation, and data synchronization with **MySQL** and **MS SQL Server**, ensuring high availability and scalability.
- Automated CI/CD pipelines using **Vercel** for frontend deployment and **Azure DevOps** for backend services, streamlining deployments and reducing downtime by 40%.
- Collaborated in **Agile** teams to deliver features such as custom reporting tools, workflow automation, and real-time notifications, ensuring timely delivery and quality.

SKILLS

- Frontend:
React.js, React Native, Next.js, TypeScript.js, Vue.js, Angular, Bootstrap, HTML5, CSS3, SCSS, TailwindCSS
- Backend:
Node.js/Express, Nest.js, Java (Spring Boot), C# (.NET Core), PHP (Laravel), Python, TypeScript
- Database:
MySQL, PostgreSQL, SQL Server, MongoDB, DynamoDB, Firebase, Redis, Elasticsearch
- Cloud & DevOps:
AWS, AWS Glue, Azure, GCP, Vercel, Docker, Kubernetes, Jenkins, CircleCI, GitHub Actions, Terraform
- Automated Testing:
Jest, Mocha, Supertest, JUnit, Cypress, Playwright, Selenium
- Architecture:
Microservices, Microfrontend, Monorepo, Scalable Web Application, Atomic Design, ETL Pipeline
- Integration:
Restful APIs, GraphQL, Twilio, Stripe, WebRTC, Kafka, RabbitMQ, OAuth 2.0, JWT
- Other Tools & Skills:
Git, Agile/Scrum, Waterfall, Serverless, HIPAA, Webpack, Npm, Yarn, OpenAPI, ESLint, Prettier

EDUCATION

University of California, Berkeley
Bachelor of Computer Science

Berkeley, California
07/2015 - 05/2019
