Professional Summary

Senior QA Analyst with 13+ years of experience in functional/regression testing, SQL-based validation, XML testing, and enterprise workflow quality. Strong background designing test plans, writing SQL queries, validating XML payloads, and supporting UAT teams. Experienced with ALM/Quality Center workflows, Agile environments, and cross-functional communication.

Technical Skills

- Testing Tools: ALM / Quality Center, JIRA, TestRail/Zephyr, Verifix
- Data Testing: SQL (complex joins & validation), XML validation, data mapping
- Technologies: C#, Python, REST/SOAP APIs
- QA Expertise: Functional Testing, Regression Testing, Data-driven Testing, UAT Support, Test Design & Execution, Defect Management
- Industry Experience: Financial Services, Trading Systems, Property & Casualty Insurance (exposure)
- Soft Skills: Communication, facilitation, requirement clarification, stakeholder coordination

Professional Experience

Senior Quality Analyst | Linedata – Boston, MA (2017–2025)

- Performed extensive data-level testing using SQL queries to validate business rules and integrations.
- Executed and validated XML-based test scenarios, including schema validation and payload mapping.
- Authored requirements, test cases, and defects following ALM/Quality Center workflows.
- Supported UAT by preparing test data, sharing test results, and coordinating issue resolution.
- Transformed requirements into clear, testable acceptance criteria.
- Led functional, regression, and integration testing across complex workflows.

Quality Analyst | Linedata – Tunis, Tunisia (2011–2017)

- Conducted end-to-end testing involving data transformations, XML messaging, and multi-tier components.
- Designed SQL-based validation test cases ensuring consistency across system layers.
- Managed test execution and defect lifecycle following structured ALM-like processes.
- Prepared detailed test data and documentation for UAT teams.
- Produced clear test summaries, defect reproductions, and requirement clarifications.

Technical Support | Orange / France Telecom – Tunis, Tunisia (2009–2011)

- Diagnosed and resolved network and application issues for enterprise users.
- Logged and documented incidents and workarounds to improve service quality.
- Collaborated with engineering teams to identify recurring issues.
