

POOJITHA GODALA

SQL Server Database Administrator

✉ poojithagodala99@gmail.com ☎ 682-376-0947 📍 Plano, Texas

SKILLS

Databases and Data Engineering

- SQL Server (2008-2022), Azure SQL Database, Azure Managed Instance, T-SQL, RBAC, SQL Audit, SOX & SOC Compliance, Backup & Recovery, Database Mirroring, Indexing & Partitioning, Query Store, Execution Plan Analysis, Performance Tuning, SQL Upgrades, SSRS Upgrades

Tools and Platforms

- SQL Server Management Studio (SSMS), Azure Portal, ServiceNow, JIRA, SQL Sentry Plan Explorer, SSIS, SSRS, SQL Audit Logs, Azure DevOps (ADO), PowerBI

Programming Languages

- C, C++, Python

EXPERIENCE

SQL Database Administration Analyst, NTT Data Americas, Inc

10/2025 – Current

- Implemented RBAC-based database security controls by developing T-SQL audit scripts that identified over 300 direct ADID logins, 450 elevated access permissions, and multiple unauthorized entries across enterprise SQL Server instances.
- Running audit and entitlement validation queries to identify orphaned users, excessive permissions, and non-compliant access mappings, followed by remediation
- Supporting SOX compliance activities by generating SQL-based access reports, control evidence extracts, and assisting in access certification cycles
- Assisted SOC monitoring workflows by developing and executing security event log queries, correlating anomalies across SQL Server instances, and generating audit-ready compliance outputs. Standardized access control procedures, enforced audit trail integrity, and aligned database configurations with SOX, SOC1, and SOC2 regulatory requirements.
- Manages daily SQL Server operational tasks through ServiceNow, including incident resolution, access requests, change management workflows, and ticket triage for 200+ database-related cases per month

SQL Server Database Administrator, United Parcel Service

06/2024 – 09/2025

- Contributed to a comprehensive security audit initiative targeting SQL instance and database infrastructure by centralizing permission data from thousands of servers as part of cooperative education. Created Power BI reports to track remediation progress.
- Collaborated with application teams to remove redundant access privileges as part of the server and database-level security initiative-resulting in a 67% application compliance rate. Achieved login compliance across 919 applications.
- Participated in the upgrade of SQL Server instances from 2016 to 2022 as part of an End-of-Life (EOL) infrastructure modernization project, ensuring system continuity and compliance.
- Designed and implemented custom database security scripts and tools to improve transparency and oversight of the security deployment
- Contributed to a SharePoint site redesign, adding quick links and intuitive navigation-leading to a 0% increase in user traffic within the first month post-launch.
- Provided comprehensive support for SQL Server environments, including performance tuning, and monitoring, ensuring high availability and reliability.

Systems Engineer, Tata Consultancy Services Limited

07/2021 – 06/2023

- Led 90% of legacy file format transitions in the Payment Manager project, working closely with the project manager to convert multiple legacy file types into standardized formats-ensuring seamless integration across phases and reducing transition errors.
- Defined and executed data-driven test strategies for a payment management interface, ensuring smooth and accurate file transitions across 3 major deployment phases.
- Spearheaded QA efforts for the HOBBS Payment Reconciliation app, leveraging SQL to reconcile financial records with bank statements, improving reconciliation accuracy by over 95%.
- Supported end-to-end testing of the Commissions application, validating complex commission logic across PAYM and PAYG models. Reduced manual calculation errors through well-structured SQL queries and scenario-based test validation.
- Designed and executed 300+ test scenarios for bug fixes and regression testing in Octane, collaborating with cross-functional teams to ensure 100% functional requirement coverage.
- Streamlined QA workflows and enhanced test traceability by creating clear documentation, resulting in a 25% reduction in defect leakage during UAT.

Product Manager Associate, Caarya

10/2020 – 05/2021

- Engaged in client collaboration for Camba, Divyanga Mitra Yojna, Sportzi, and Zunavish projects, leveraging SQL-based data tracking and JIRA for progress monitoring, while executing Unit and Load Testing to validate data performance. Additionally worked on placement support analytics, event coordination, and cross-institution collaboration initiatives to expand Caarya's community presence

PROJECT EXPERIENCE

Smart Garbage Monitoring System

Designed a Smart Garbage Monitoring System using TinkerCAD, Arduino UNO, Ultrasonic sensors, LED, and Buzzer, implementing JAVA code within Arduino IDE to activate the buzzer reaching container limits.

Inventory Management System for Retail Stores

Designed an IoT-based inventory system using RFID sensors and real-time cloud sync to automate retail stock tracking. Improved inventory accuracy by 35% and reduced stockouts by 25% through data-driven optimization and user feedback.

Hotel Management System

Engineered a Hotel Management System using HTML, CSS for front-end, Netbeans IDE, PHP, Xampp, Apache, and MySQL for efficient customer workflow automation.

Cryptography with Neural Networks

Utilized steganography and neural networks in Python with Tensorflow and Keras to conceal messages within images, enhancing security and encryption processes.

EDUCATION

Master of Science, Information Studies, TRINE UNIVERSITY, DETROIT-MICHIGAN

05/2025

Bachelor of Technology in Computer Science Engineering, GITAM UNIVERSITY

07/2021

CERTIFICATION

- Microsoft Certified: Azure Database Administrator Associate
- Microsoft Certified: Azure Fundamentals
- Oracle : AI Vector Search
- Oracle: Cloud Database Services
- Artificial Intelligence Workshop-IIT Hyderabad-Vidyavilla Foundation
- Data Analytics and Visualization Virtual Experience - Forage Accenture
- Cloud Platform Job Simulation - Forage Verizon
- Hadoop Platform and Application Framework-University of San Diego, Coursera
- Introduction to Big Data - University of San Diego, Coursera

ACHIEVEMENTS

On the spot Award-TCS, TCS appreciation of outstanding contribution to the project	02/01/2023
On the Spot Team award -TCS, TCS for teamwork, dedication, and commitment	09/01/2022
Team Appreciation Award-TCS, TCS for test deliveries	08/01/2022
On the Spot Award-TCS, TCS for Hosting the Royal Clusters Agile 2-day event	02/01/2022
