PROFESSIONAL SUMMARY

Results-driven **QA Automation Engineer** with 10+ years of experience designing, implementing, and executing automated and manual testing frameworks across **Agile** and **Waterfall** environments. Skilled in **Selenium WebDriver**, **Cucumber (BDD)**, **RestAssured**, and **Azure DevOps** pipelines for **API** and **UI automation**. Proven success in **CI/CD** integration, test data validation, and automation of invoice and data workflows. Adept in **SQL-based backend testing**, **data integrity validation**, and **cross-functional collaboration** with developers and analysts to drive quality excellence.

SKILLS

Languages: Java, SQL, C#, Groovy, JSON, XML, HTML

Version Control: Bitbucket, GitHub, GitLab, GitBash, Git

CI/CD: Jenkins, Azure DevOps, GitLab CI, Bamboo

Testing Tools: Selenium WebDriver, Cucumber, RestAssured, Karate API, Postman, SoapUI, ALM, Jira, Rally, Swagger API, QTP, Maven

Frameworks: JUnit, TestNG, BDD, TDD, Hybrid, Page Object Model (POM)

Databases: SQL Server, Oracle, MySQL, MongoDB, PostgreSQL

Operating Systems: Windows, Mac OS, Linux

Exposure: JavaScript-based automation using WebDriverIO

TECHNICAL STACK SUMMARY

Category	Technologies / Tools
Programming Languages	Java, C#, SQL
Automation Tools	Selenium WebDriver, Cucumber, RestAssured, Karate API
CI/CD & Repositories	Azure DevOps, Jenkins, GitHub, Bitbucket
Databases	SQL Server, Oracle, PostgreSQL, MySQL
Cloud / Data Platforms	Azure DataLake, DataBricks
Test Management	Jira, Rally, ALM, HP Quality Center

PROFESSIONAL EXPERIENCE

Publix Super Markets — Senior QA Engineer (Remote, Contract via LTI Mindtree)

June 2023 – June 2025

- Led QA and automation efforts for Publix's INCA System, ensuring accurate invoice processing and data flow validation.
- Developed automated **UI** and **API** test scripts using **WebDriverIO**, **Cucumber**, and **Postman**; leveraged **C#** for backend API automation.
- Performed SQL-based validation for **ChargeSubDept** assignments and invoice adjustments.
- Executed **API testing** for integrations between Dallas WMS, BizTalk, and INCA systems.
- Managed large-scale data validation using **Azure DataLake** and **DataBricks**.
- Mentored junior QA engineers on **automation frameworks** and **test strategies**.
- Achievements: Reduced invoice discrepancy resolution time by 30% via improved SQL validation automation.

The Hartford Insurance Company — QA Lead (Remote)

Jan 2022 – May 2023

- Led QA initiatives using **Rally** for defect tracking and progress monitoring.
- Delivered manual and integration testing for insurance workflows to enhance underwriting experience.
- Built SQL-based validation reports and used **Swagger API** and **Postman** for service verification.
- Delivered OCR automation solution to improve document processing accuracy.
- Ensured **HIPAA compliance** and regulatory adherence across testing operations.

Macy's — Sr. QA Software Engineer (Remote)

Feb 2020 – May 2021

- Developed hybrid automation frameworks integrating **Selenium**, **Cucumber**, **TestNG**, and **RestAssured**.
- Performed regression and cross-browser testing across web and mobile platforms.
- Integrated automation with **Jenkins** for nightly CI builds and reporting.
- Designed **SQL** queries to validate backend data integrity within **PostgreSQL** databases.

BestBuy — SDET

Nov 2017 – Jan 2020

- Automated API and UI testing using **RestAssured**, **Selenium**, and **Cucumber** frameworks.
- Used **Jenkins** and **TestNG** for continuous integration and automated test execution.
- Performed SQL-based backend validation across **Oracle** and **SQL Server** databases.
- Supported Agile sprint ceremonies and contributed to continuous delivery cycles.

US Bank — QA Software Engineer

Aug 2015 – Oct 2017

- Developed Selenium automation frameworks using **TestNG** and **Maven** for regression testing.
- Implemented cross-browser testing using **Selenium Grid** and backend SQL validations.
- Collaborated with stakeholders using **HP ALM** for defect tracking and test planning.

UPS — Jr. QA Software Engineer

Mar 2014 – Jul 2015

- Built Page Object Model (POM) frameworks with **Selenium WebDriver** and **TestNG**.
- Validated REST APIs using **RestAssured** and **Postman**; performed SQL-based backend testing.
- Used **HP ALM** for test case management and defect tracking to ensure quality delivery.
