WoodBridge, VA, USA

WORK EXPERIENCES

SENIOR IOS DEVELOPER

03/2022 - Present

Horizon

- Developed and optimized a real-time video processing feature using AVFoundation and Core Image, achieving a consistent 60 FPS on iPhone X and newer models.
- Pioneered the implementation of SSL pinning and secure Keychain storage, successfully passing third-party security audits with zero critical vulnerabilities.
- Diagnosed and resolved complex memory leaks and background state management issues using Instruments, improving app stability and reducing crash rates by 75%.
- Managed the entire App Store release lifecycle using Fastlane, executing over 20 successful production and beta releases to a user base of 500k+.

IOS DEVELOPER

06/2020 - 02/2022

Contech Systems

- Implemented a suite of reactive user interfaces using UIKit and Combine, ensuring seamless adaptability across all iOS device screen sizes.
- Integrated RESTful APIs for data synchronization, implementing Core Data for offline storage and ensuring a seamless user experience without network connectivity.
- Authored comprehensive unit and UI tests using XCTest, increasing code coverage from 55% to 75% and significantly reducing regression bugs.
- Liaised with backend and QA teams to define API contracts and test plans, accelerating the feature development cycle.

MOBILE DEVELOPER

04/2018 - 05/2020

Horizon

- Built and maintained key application modules using Swift and Objective-C, adhering to MVC patterns and contributing to 4 major application updates.
- Assisted in performance profiling and bug-fixing efforts, identifying and resolving bottlenecks.
- Participated in agile scrum ceremonies and documented technical specifications for new features.
- Supported the adoption of Git flow for version control, ensuring a streamlined and conflict-free feature branch workflow.

SUMMARY

Senior iOS Developer with 7+ years of expertise in architecting and delivering high-performance, secure, and scalable native iOS applications for complex system-level and hardware-integrated environments. Proven mastery in Swift, Objective-C, and iOS internals, with deep specialization in BLE protocols, performance tuning, and end-to-end CI/CD lifecycle management using Azure DevOps. A strategic technical leader adept at bridging cross-functional teams, including hardware, backend, and design.

SKILLS

Languages: Swift | UIKit | SwiftUI | Objective-C

Frameworks & APIs: AVFoundation | Core Data | Combine | Core Animation | Geolocation/Geofencing

Architecture & Patterns: TCA | MVVM | MVVMC | MVC | Reactive Programming

Tools & DevOps: Azure DevOps | AWS | Firebase | Fastlane | Git | App Store Connect

Security: Keychain Services | SSL Pinning | Biometrics | Data Encryption

Testing: XCFramework | XCTest | XCUITest | Mocking | SonarQube

Performance Tuning: XCode Instruments (Time Profiler, Allocations, Leaks, consumption) | Memory Management | Battery Optimization

Version Control & CI/CD: Git | Github | GitBucket | Microsoft Azure | Jenkins | Bitrise | CircleCI | FastLane Github Actions

Hardware Integration: Core Bluetooth (BLE/GAT) | Local Network | Camera | Sensors (Accelerometer, Gyroscope) | NFC

Methodologies: Agile/Scrum, CI/CD, Automated Testing

PROJECTS:

My DayApp

A smart personal planner that helps users organize schedules, appointments, and daily tasks. Functions fully offline with seamless background sync and silent push updates when reconnected. Features a custom calendar view with conflict detection, reminders, and cancellation support.

Transcribe App

A productivity tool that turns voice notes into precise text using on-device speech recognition and AI. Works offline with automatic background sync and keeps a searchable note history. Offers editing, tagging, and export options for effortless daily use.
