

Anthony Wilson

Senior Software Engineer | 786.434.4599 | anthony.wilson.38847@gmail.com

<https://www.linkedin.com/in/anthony-wilson-16a48016/>

Senior Software Engineer with 12+ years of experience delivering high-impact, user-centric, and scalable systems across leading companies including Smartsheet, DocuSign, Centric Software, and Uber Eats. Specializes in building performant web applications, optimizing complex workflows, and driving measurable product growth through modern frontend engineering, thoughtful architecture, and cross-functional collaboration.

Known for producing results that directly enhance customer acquisition, onboarding, platform reliability, and engineering efficiency. Strong communicator and problem-solver who aligns technical decisions with business outcomes and consistently elevates both product quality and team execution.

Experience

Smartsheet | Senior Software Engineer

2021/10 – Present

Lead engineer in the Forms & Grid team, rebuilding critical form-management and submission workflows to improve usability, speed, and reliability. The redesigned experience directly contributed to a **200% increase in customer acquisition**.

- Re-architected form management using **React Hook Form + React Query**, cutting latency and improving submission reliability.
- Built interactive UI components that simplified data entry for enterprise users.
- Improved system stability by designing more predictable state management and optimized API integration patterns.
- Automated testing through custom **Python** tooling, **reducing manual QA effort by 40%**.
- Drove accessibility updates ensuring **WCAG-compliant form interactions**.
- Conducted A/B tests and user research to guide product decisions and feature enhancements.
- Partnered with product, design, and backend teams to deliver cross-platform consistency between form and grid functionality.

DocuSign | Senior Software Engineer

2019/08 – 2021/09

Transformed the user onboarding experience through improved UI/UX design, reusable component systems, and performance optimization which contributed to a 250% increase in user onboarding completion.

- Developed new onboarding experiences using **React**, improving engagement and reducing friction.
- Built and maintained a system of reusable **Storybook components** for consistent UI across teams.
- Delivered **Python microservices** for data processing and onboarding workflows.
- Increased backend reliability with expanded automated test coverage (+30%).
- Applied user feedback and testing insights to refine onboarding flows and reduce drop-off points.
- Collaborated with design, PM, and engineering to meet aggressive product deadlines during rapid growth.

Centric Software | Senior Software Engineer

2016/04 – 2019/07

Full-stack engineer improving performance and user experience for enterprise product management software.

- Improved product data load times by optimizing **ElasticSearch** retrieval and UI rendering which resulted in major performance gains.
- Designed a 3D product viewer enabling interactive product exploration for enterprise customers.
- Built **Python APIs** for efficient **ElasticSearch** queries and product data aggregation.
- Implemented internal performance monitoring tools, reducing downtime and improving diagnostics.
- Delivered modern, intuitive UI screens by unifying diverse data sources into clean workflows.
- Worked closely with product teams to ship functionality aligned with customer needs.

Uber Eats | Senior Software Engineer

2012/07 – 2016/04

Early engineer helping build the Uber Eats platform during its rapid expansion.

- Designed clean, scalable frontend architecture using **TypeScript** and modular CSS (SASS/SCSS).
- Implemented **LogRocket** + **Sentry** across frontend/backend, dramatically improving error visibility.
- Optimized webpack builds to improve dev environment speed during high-volume iteration cycles.
- Migrated **REST** endpoints to **GraphQL** across the stack to modernize data delivery.
- Integrated complex payment systems including **Stripe**, **PayPal**, and **Plaid**.
- Supported the build-out of core ordering flows impacting millions of users.

Education

University of South Alabama, BS Computer Engineering

2012

Skills

Languages: JavaScript, TypeScript, Python, SQL, HTML5, CSS3

Frontend: React, Next.js, Vue, Angular, React Native, Gatsby

Styling: SCSS, LESS, Styled Components, Bootstrap, Tailwind, Material UI, Ant Design

Backend: Node.js, Express, Nest, Django, Flask

Databases: PostgreSQL, MySQL, MongoDB, DynamoDB

Testing: Jest, Cypress, Playwright, Selenium, PyTest

DevOps: AWS, Docker, Kubernetes, GitHub Actions, Jenkins, CircleCI

Monitoring: Datadog, Grafana, Splunk

Documentation: Swagger, OpenAPI
