

ASHIME ASHIME

CLOUD SOLUTIONS ARCHITECT | AWS | DEVOPS | KUBERNETES | INFRASTRUCTURE AUTOMATION

Tampa, FL · +1 813-317-0065 · ashimeashime60@gmail.com

SUMMARY

Cloud Solutions Architect with **10+ years of experience** designing, securing, and optimizing **AWS-based cloud infrastructures** for enterprise-scale applications. Specializes in **Kubernetes (EKS), Docker, Terraform, CI/CD, microservices, and cloud security**, with a proven record of improving deployment speed, reducing cloud spend, and enhancing resilience. Known for partnering with cross-functional teams, translating complex requirements into scalable architectures, and driving modernization initiatives that enable **high availability, observability, and automation** across environments.

CORE SKILLS

Cloud & Platforms: AWS (EC2, S3, EKS, ECS, Lambda, RDS, DynamoDB, CloudWatch, CloudTrail, Route 53, ELB/ALB, SQS, SNS, Kinesis, AWS Backup, Systems Manager)

Containerization & Orchestration: Docker, Kubernetes (EKS), Helm

Infrastructure as Code (IaC): Terraform, AWS CloudFormation, Ansible

CI/CD & DevOps: Git, GitLab CI/CD, Jenkins, AWS CodeBuild, AWS CodePipeline, GitHub, Artifactory

Security & Governance: IAM, Security Groups, NACLs, VPC, AWS Security Hub, GuardDuty, AWS Inspector, Shield, KMS, encryption, least privilege

Monitoring & Logging: CloudWatch, ELK Stack, Prometheus, Grafana, SNS alerts, centralized logging

Scripting & Automation: Bash/Shell, Python, YAML, JSON

Methodologies: Agile, Scrum, DevOps, cloud migration, cost optimization, high availability, disaster recovery

PROFESSIONAL EXPERIENCE

Senior Solutions Architect | Docker – Tampa, FL | Feb 2022 – Present

- Architected and deployed highly available, fault-tolerant cloud infrastructures leveraging AWS (EC2, S3, RDS, Lambda, Step Functions, Route 53), improving scalability, resilience, and operational efficiency for enterprise workloads.
- Designed end-to-end serverless architectures using Lambda, Step Functions, API Gateway, and EventBridge, automating business workflows and **reducing operational overhead by 40%** across multiple customer environments.
- Integrated Docker, EKS, and AWS native services to streamline CI/CD workflows, accelerate deployment cycles, and improve developer velocity through automated image builds, scanning, and EKS rollouts.
- Conducted cloud security assessments leveraging AWS Inspector, GuardDuty, Shield, IAM, and SCP-based guardrails, strengthening security posture and aligning customer environments with industry best practices and compliance frameworks.
- Built interactive **Docker Labs (Docker Test Containers, CE Labs, Docker Desktop Labs)** to train TSEs, significantly enhancing internal technical proficiency and improving customer support delivery quality.
- Developed a **ChatGPT-powered onboarding assistant** that automated knowledge delivery and learning workflows, **cutting new-hire onboarding time by 50%+** and standardizing training for distributed teams.
- Leveraged **generative AI** (ChatGPT, Bedrock, OpenAI APIs) to automate architecture documentation, proposal generation, and playbook creation, improving delivery speed, quality, and consistency across engineering outputs.
- Built **AI-driven cost optimization models** using AWS usage and billing data to identify compute, storage, and scaling inefficiencies, enabling customers to reduce cloud expenses across multiple deployments.
- Collaborated with pre-sales, solutions engineering, and customer success teams to design and present secure, cost-optimized, and scalable Docker–AWS hybrid architectures aligned to customer transformation roadmaps.
- Delivered hands-on technical workshops, architecture deep-dives, and enablement sessions for customers and internal teams to drive adoption of container platforms, DevOps automation, and cloud-native best practices.
- Led post-sales implementation, Kubernetes tuning, observability setup, troubleshooting, and optimization for Docker-based microservices on AWS, ensuring compliance, performance, and operational reliability.
- Authored and maintained **AI-assisted internal knowledge bases, training modules, and documentation** to scale organizational learning and accelerate technical onboarding for new engineers.

Senior Cloud Systems Administrator | Moffitt Cancer Center – Tampa, FL | Jun 2021 – Mar 2022

- Designed and supported **secure, compliant AWS environments** for multi-tier healthcare applications using EC2, RDS, S3, ELB, and EFS, ensuring high availability and adherence to strict data protection and uptime requirements.

- Developed and enforced **IAM standards** (roles, policies, groups, and cross-account access) following least-privilege principles, reducing access risks and simplifying identity and permissions management for cloud resources.
- Conducted regular **cloud security assessments** using AWS Inspector, Security Hub, and AWS Shield, implementing remediation plans and hardening controls to reduce vulnerabilities across critical workloads.
- Automated provisioning of AWS infrastructure using **Terraform modules**, enabling consistent environment builds and reducing manual configuration time by approximately **40%** for dev, QA, and production stacks.
- Integrated **Ansible** for configuration management and patching of EC2-based workloads, standardizing system configurations and cutting configuration drift and manual intervention by nearly **50%**.
- Implemented **centralized logging and monitoring** using the ELK Stack, CloudWatch metrics, and SNS alerts, significantly improving root-cause analysis and reducing mean time to detect and resolve incidents.
- Supported and executed cloud **migration projects** from on-premises and legacy environments to AWS, ensuring data integrity, planning cutover windows, and validating application behavior post-migration with minimal disruption.

DevOps Engineer

Bavin Corp Consulting – Burtonsville, MD | Nov 2016 – Jun 2021

- Designed and implemented **CI/CD pipelines** with Jenkins, Docker, and Kubernetes to streamline build, test, and deployment of microservices, improving delivery speed by around **30%** and reducing manual deployment steps.
- Architected and managed secure **AWS VPC architectures** including public/private subnets, NAT gateways, route tables, NACLs, and Security Groups, ensuring network segmentation, secure connectivity, and compliance with internal security standards.
- Automated **disaster recovery strategies** using AWS Lambda, AWS Backup, S3 lifecycle policies, and scheduled snapshots, enabling reliable backup/restore processes and minimizing downtime risks for key applications.
- Monitored infrastructure and application performance using **AWS CloudWatch dashboards, metrics, custom alarms, and log insights**, enabling proactive issue detection and improving platform stability and responsiveness.
- Introduced and integrated **automated testing, code quality checks, and security scanning** tools into CI/CD workflows, which lowered production defects and strengthened overall code reliability.
- Optimized AWS resource utilization through **instance right-sizing, Auto Scaling Groups, and Spot/Reserved capacity strategies**, resulting in up to **20% reduction in monthly infrastructure costs** for several client environments.
- Led containerization initiatives, converting legacy applications into **Docker containers** and orchestrating deployments with Kubernetes/EKS, improving scalability, portability, and release consistency across environments.
- Built reusable scripts and automation tooling using **Bash and Python** to standardize environment creation, application deployments, log collection, and operational tasks, reducing repetitive work for the DevOps and operations teams.
- Worked closely with developers, QA, and product stakeholders in **Agile/Scrum** teams, participating in sprint planning, backlog refinement, and release planning to align DevOps practices with delivery goals.

EDUCATION

Bachelor of Science in Computer Science and Technology

University of Bamenda | Oct 2013 – Jun 2016

Graduated with Honors

CERTIFICATIONS

- AWS Certified Solutions Architect – Professional
- AWS Certified Solutions Architect – Associate
- AWS Certified Security – Specialty
- Certified Scrum Master (CSM)

PROFESSIONAL DEVELOPMENT

- Project Management: Building a Successful Product Roadmap – LinkedIn Learning (Nov 2021)
- Agile Project Leadership – LinkedIn Learning (Jun 2022)
- AWS Security and Compliance – Udemy (Nov 2022)
- Transformational Leadership – LinkedIn Learning (Jan 2022)
