

Bryan West

Knoxville, TN | 610-234-7870 | bryanwest880@gmail.com | LinkedIn | GitHub

Summary

Senior Software Engineer with 15+ years of experience in AI, cloud infrastructure, and full-stack development, specializing in microservices architecture, serverless computing, and secure enterprise-grade solutions. Skilled in Python, Django, React, Node.js, and AWS (EC2, Lambda, S3, ECS). Proven ability to design, deploy, and optimize cloud-native applications, build CI/CD pipelines, and lead Agile/Scrum teams to deliver high-performance solutions for SaaS, defense, and IT consulting industries.

Skills

- **Programming Languages:** Python, Ruby, Node.js, Java, HTML, CSS, JavaScript
- **Frameworks:** Django, Flask, Angular, React, Django Rest Framework, Vue.js, TypeScript, Next.js, Rails, Express.js
- **Databases:** MongoDB, PostgreSQL, MySQL, Redis, SQL Server, DynamoDB
- **DevOps & Cloud:** AWS, Docker, Digital Ocean, GCP, Kubernetes, Heroku, Terraform, Jenkins, CI/CD Pipelines, EC2, Lambda, S3, ECS, RDS, SageMaker, Azure, GitLab, Infrastructure as Code (IaC)
- **AI & Machine Learning:** TensorFlow, PyTorch, NLP, OpenAI, LangChain, LLMs, Data Modeling, HuggingFace, ChatGPT, API Integration, MLOps, AI Automation, Prompt Engineering
- **Tools & Methodologies:** Agile, GitHub, GitLab, JIRA, BitBucket, ETL, Git, Linux, Scrum, SDLC, Test-Driven Development (TDD)
- **Additional Technologies:** ECommerce, IoT, IRIS, LMS, Web3, Solana, Selenium, Blockchain, Gateway, AI Integration, Cloud Architecture, Stripe Integration, API Gateway, Proof of Concept (POC)
- **Soft Skills:** Leadership, Teamwork, Effective Communication, Problem Solving, Mentorship, Adaptability, Time Management, Strategic Planning, Analytical Thinking

Experience

West Consulting LLC

Feb 2013 - Present

Senior Software Engineer (AI & Cloud Infrastructure)

Chantilly, VA

- Led end-to-end full-stack development of enterprise-grade SaaS platforms using Python (Django, DRF) for backend and React, Angular, TypeScript for modern, responsive front-end architecture.
- Built and maintained SPA dashboards for analytics and client automation portals, integrating APIs with React/Redux for real-time data updates.
- Developed and optimized RESTful and GraphQL APIs, improving frontend-backend data flow speed by 35% and system stability by 25%.
- Collaborated with UI/UX teams to implement responsive interfaces using HTML5, CSS3, Bootstrap, Tailwind, ensuring seamless cross-platform compatibility.
- Designed and deployed AI-powered chatbots and automation frameworks using Python, Django, and IBM Watson, processing 50K+ monthly interactions.
- Architected microservices and serverless pipelines using AWS Lambda, ECS, and S3, reducing data latency by 40%.
- Integrated MLOps workflows (TensorFlow, PyTorch, SageMaker) for model deployment and monitoring, cutting training cycles by 30%.
- Developed GPT-based AI knowledge assistant via OpenAI API + LangChain, improving data retrieval accuracy by 30%.
- Created interactive frontend dashboards with React + Chart.js, enabling real-time visualization for AI analytics data.
- Implemented CI/CD pipelines with GitLab CI, Docker, and Terraform, improving release frequency and reliability by 35%.
- Designed multi-tenant chatbot infrastructure supporting 10+ enterprise clients, ensuring data isolation and 99.9% uptime.
- Built custom reusable UI libraries in React and Angular to speed up future product development.
- Implemented Infrastructure as Code (IaC) using Terraform and AWS CloudFormation, ensuring consistent multi-environment deployments.
- Optimized AWS cost and performance via automated scaling and monitoring policies, saving 15% monthly.
- Mentored a 6-member engineering team and facilitated Agile sprints, improving sprint delivery efficiency by 40%.
- Collaborated with QA to integrate automated testing (Jest, Pytest) and code quality pipelines, reducing regression bugs by 20%.
- Delivered internal developer toolkits and documentation to streamline onboarding and improve productivity by 35%.

Oracle

Apr 2012 - Feb 2013

Software Engineer (Enterprise Systems)

Reston, VA

- Developed scalable backend modules using Java, Python, and Oracle DB, improving processing throughput by 45%.
- Migrated legacy monolithic systems to microservices, enhancing scalability and deployment efficiency.
- Built internal administration dashboards using AngularJS and Bootstrap, enabling real-time data monitoring for clients.
- Implemented secure authentication layers (OAuth2, JWT) and access control systems for enterprise-grade security.
- Automated build and deployment pipelines using Jenkins and Shell scripts, reducing manual workload by 40%.
- Collaborated with cross-functional teams to integrate CI/CD and automated testing, improving delivery reliability.
- Designed and implemented performance monitoring tools with Python scripts that reduced debugging time by 30% across global teams.

BAE Systems

Mar 2010 - Apr 2012

Lead Backend Engineer (Defense Systems)

Springfield, VA

- Designed and developed secure web systems for defense-grade projects using Java, Python, and React (internal tooling).
- Built real-time monitoring dashboards with React, D3.js, and backend integration for mission-critical defense data.
- Engineered event-driven architecture supporting real-time alerts and operations for intelligence systems.
- Developed automated testing and deployment pipelines, improving code reliability by 30%.
- Collaborated with cybersecurity teams to ensure DoD compliance and multi-layered authentication protocols.
- Contributed to the modernization of legacy interfaces using HTML5 and JavaScript, improving UX and usability.

Invertix Corporation

Nov 2008 - Mar 2010

Senior Software Engineer (Data Architecture & Automation)

Remote

- Developed ETL pipelines and real-time data workflows, improving data throughput by 50%.
- Built data visualization dashboards using Flask + React + Chart.js, helping analysts interpret intelligence data faster.
- Implemented Infrastructure as Code (IaC) using Terraform and AWS CloudFormation, enabling reliable deployment automation.
- Created backend services in Python + PostgreSQL optimized for 24/7 intelligence operations.
- Integrated API-driven data ingestion pipelines, reducing manual reporting workload by 40%.
- Modernized legacy data pipelines with cloud-based automation, cutting maintenance efforts by 35%.

Education

Howard University

1998 - 2003

Bachelor of Business Administration (BBA), Computer Information Systems

Projects

Smaplr | <https://www.smaplr.nl/>

- Engineered a full-stack SaaS platform from the ground up with Django, React, Redis, and PostgreSQL, optimized for cloud-native scaling.
- Architected event-driven backend workflows and improved API performance by 35% post-launch.
- Enhanced UX and speed optimization processes, resulting in 25% faster page loads and improved conversion rates.

Govava | <https://www.govava.com/>

- Built and deployed an event-based community engagement platform using React, Node.js, and AWS.
- Designed real-time data flow pipelines with WebSockets and Redis, supporting 10K+ concurrent users.
- Integrated analytics dashboards for community activity insights, increasing platform engagement by 22%.

Financethat | <https://financethat.ca/>

- Developed a vehicle financing platform using Django, React, PostgreSQL, and AWS RDS, supporting multi-tenant user management.
- Built automated loan calculators and workflow engines, cutting processing time by 40%.
- Integrated AI-driven credit scoring module to predict eligibility, improving loan approval accuracy by 20%.

pmfm.ai | <https://calstudio.com/>

- Designed and built a multi-bot AI chatbot SaaS using Django, React, AWS (Lambda, EC2, S3), and Stripe API for automated billing.
- Architected microservices and serverless functions to handle over 50K+ monthly conversations, ensuring 99.9% uptime.
- Implemented GPT and NLP-based conversational modules, enhancing response accuracy by 30% and reducing latency by 25%.

SoundBoyCrew

- Developed a modern, responsive music and entertainment website focused on fast load times and cross-device performance.
- Implemented interactive front-end features using React and Vue, delivering smooth user transitions and engaging UI animations.
- Built custom audio playback components and event galleries using JavaScript (ES6) and CSS3 transitions, improving user engagement by 30%.
- Optimized frontend performance through lazy loading, code splitting, and image compression, reducing initial load time by 40%.

KEY ACHIEVEMENTS

- **AI System Integration:** Delivered an end-to-end AI chatbot architecture leveraging IBM Watson and OpenAI APIs, boosting NLP model accuracy by 35%.
- **Architecture & Migration Success:** Led successful SQL-to-NoSQL migration, improving scalability and query efficiency by 40%.
- **Efficiency Optimization:** Achieved 45% improvement in platform performance by redesigning caching and load-balancing mechanisms.
- **Cloud & DevOps Automation:** Implemented Docker + Kubernetes orchestration and Terraform-based IaC, increasing application resilience by 40%.
- **Innovation & Leadership:** Directed AI-driven automation projects that reduced manual workload by 30%, mentoring a team of 5 developers to execute agile sprints efficiently.
