

Gowrisankari Somasundaram

Bellevue, WA | (425) 638-3270 | gowri.sankari@live.com

SUMMARY

Business Intelligence Engineer with 8+ years in AWS-based data engineering and BI, bridging product and GTM teams to deliver accurate metrics. Designed and managed multi-step ETL pipelines with Airflow and Python, automating processes that reduced runtimes by 90% and ensured SLA adherence. Developed self-serve dashboards and canonical datasets for cross-functional insights and strategic decision-making.

CORE COMPETENCIES

- **ETL & Data Pipelines:** End-to-end pipeline development, Automation, Workflow optimization, ETL Jobs, Apache Airflow
- **Programming & Scripting:** Python, SQL, R, Python-based automation
- **Cloud & Data Engineering:** AWS (Redshift, S3, Glue, Lambda, Athena, IAM, CDK), Azure SQL
- **Databases:** Azure SQL Server, Oracle, Teradata, PostgreSQL
- **Business Intelligence & Data Visualization:** Tableau, Power BI, Amazon QuickSight, MicroStrategy, SSRS, IBM Cognos, Data reporting, Data Visualization
- **Data Architecture & Governance:** Data modeling, Security, IAM roles, KPI standardization
- **Stakeholder & Program Management:** Cross-functional collaboration, Executive reporting, Requirement gathering, Presenting reviews
- **Microsoft Tools:** Advanced Excel, PowerPivot, Power Query

EXPERIENCE

Amazon

May 2020 - Present

Business Intelligence Engineer

Bellevue WA

- Built scalable ETL jobs on AWS using Redshift, S3, Glue, Lambda, Athena and dbt to transform terabytes of raw logs into canonical datasets in near real-time.
- Orchestrated ETL jobs with Apache Airflow DAGs and Python, leveraging Lambda and SNS to automate workflows and reduce execution time from 8 hours per week to 30 minutes.
- Developed a Streamlit UI for seamless user uploads and real-time pipeline monitoring.
- Led migration from a legacy Excel model to an automated, Git-managed data pipeline, supporting 40+ dashboards for weekly and monthly business reviews.
- Standardized KPIs across teams, ensuring consistent reporting and alignment with leadership metrics.
- Collaborated with cross-functional stakeholders, translating reporting requirements into technical designs, presenting design documents, and hosting weekly status meetings between product, science, and BI teams.
- Optimized QuickSight dashboards to deliver self-serve insights with visualization standards, reducing refresh schedules from daily to 15 minutes.
- Implemented IAM security, SNS notifications, and real-time workflow monitoring for data governance.

Amazon

Jan 2019 - May 2020

Business Analyst

Bellevue WA

- Partnered with finance, engineering, and operations to define business KPIs and build interactive dashboards in QuickSight & Tableau.
- Automated reporting workflows, reducing manual effort by 40%.
- Led deep-dive analytics projects, providing insights to optimize operations and staffing.
- Conducted dashboard training sessions, increasing self-serve adoption among business users.

Microsoft

Feb 2018 - Jan 2019

HR BI Analyst

Redmond WA

- Developed HR analytics dashboards to track hiring metrics and workforce trends.
- Led workforce forecasting models, improving headcount planning accuracy.
- Migrated Excel-based reporting to Power BI, integrating SQL, SSIS, and SSAS cubes for a scalable reporting solution.
- Developed DAX queries, improving analytics capabilities for HR teams.

Blueprint Consulting Services

Jan 2017 - Feb 2018

Business Intelligence Analyst

Bellevue WA

- Led BI framework development, collaborating with senior leaders to define data infrastructure needs.
- Built SQL & Power BI solutions, supporting 8+ dashboards for weekly business reviews.
- Automated reporting, increasing efficiency from 50% to 90%, enabling faster decision-making.
- Developed predictive analytics models for workforce planning, improving forecasting accuracy by 25%.

Microsoft

May 2016 - Sep 2016

BI Developer

Redmond WA

- Developed key BI features including Stored Procedures, Views, and User Defined Functions to improve data querying efficiency.

- Created SSIS packages for large-scale data migration projects and designed Power BI reports, improving data accessibility for business users.
- Managed end-to-end User Access Logging for SSAS, SSRS, and SSIS, enhancing security and monitoring capabilities.

Tata Consulting Services

Aug 2011 - Sep 2012

Database Analyst

Chennai, India

- Executed database test cases, led troubleshooting efforts, and ensured data integrity.
- Developed SQL-based solutions for end-to-end data warehouse projects.
- Created database objects (Procedures, Functions, Triggers) to streamline data processes and optimized testing workflow charts, improving database performance.

EDUCATION & CERTIFICATIONS

PSG Tech, India

2011

Master of Engineering, VLSI

Anna University, India

2009

Bachelor of Engineering, Electronics & Communication

CERTIFICATION

- Big Data for AWS (2021)
- Teradata – Data Warehousing (2018)
- Data Science – UW Seattle (2016)
- Microsoft SQL Server & Querying (2014)
