

JAMES HUGHES

Leoma, TN 38468 | 9312019852 | jameshughes0516@gmail.com | <https://www.linkedin.com/in/james-hughes-1234567abc/>

SENIOR SOFTWARE ENGINEER

Senior Software Engineer with 7+ years building scalable Python platforms, AI features, and cloud-native APIs. Core stack: Python, Django, FastAPI, LangChain, RAG pipelines, PostgreSQL, AWS. Delivered backends that cut processing time 70%, improved uptime to 99.9%, and increased engagement 20%+. Experienced leading small teams and modernizing legacy systems into microservices. Comfortable integrating OpenAI/LLM endpoints, vector DBs, and async services.

Software Design | Python Development | Front End Development | Back End Development | Mobile Development | Planning
Microservices | Agile & Scrum Methodologies | Full Stack Development | Python Ecosystem | AI & Machine Learning
Cloud Computing | API Development | Scalable Systems | DevOps & CI/CD | Innovation | Amazon Web Services | Analytical
System Performance Gains | Scalable Platform Engineering | User Experience Transformation | Cross-Platform Innovation
Full-Stack Versatility | High-Impact Software Solutions | Team Leadership & Development | Technical Strategy & Architecture
Effective Communication & Cross-Functional Collaboration | Scheduling

TECHNICAL SKILLS

Languages & Frameworks:	Python, Django, Flask, FastAPI, LangChain, JavaScript, TypeScript, React.js, Next.js, Angular, Vue.js, Node.js, Express.js, C/C++ (supporting), C#, .NET Core (secondary), PHP/Laravel
APIs & Backend:	Python (Django, FastAPI, Flask), REST APIs, GraphQL, Webhooks, Async I/O, Node.js, Ruby on Rails
Databases & Messaging:	PostgreSQL, MySQL, MongoDB, MS SQL Server, Redis, Firebase, DynamoDB, RabbitMQ
Cloud & DevOps:	AWS (EC2, S3, RDS, Lambda, CloudFront, DynamoDB), Microsoft Azure, Google Cloud Platform (GCP), Docker, Kubernetes, Jenkins, GitHub Actions, GitLab CI/CD
Monitoring & Logging:	Prometheus, Grafana, ELK/EFK
AI/ML & Data Science:	LangChain, OpenAI GPT APIs, RAG pipelines, NLP, Generative AI, Transformers, HuggingFace, PyTorch, TensorFlow, Keras, Scikit-learn, Pandas, NumPy, Data Extraction, Vector Databases (Pinecone, FAISS), ML Pipelines, Model Optimization
Version Control & Collab:	Git, GitHub, GitLab, Bitbucket, Agile/Scrum Methodologies, Jira, Confluence, Kanban
Other Tools:	Firebase, RabbitMQ, Entity Framework, Laravel, LAMP stack, MERN stack

PROFESSIONAL EXPERIENCE

CUBIX, Orlando, FL	
Senior Software Engineer – Team Lead (Remote)	01/2022 – Present
- Led AI-based backend modernization for a distributed Python team, improving release reliability and documentation coverage to 95%. - Designed and deployed a Python microservices ecosystem that reduced manual verification from 3 hours to 2 minutes (65% efficiency gain). - Built and productionized a RAG pipeline (PostgreSQL + Pinecone/FAISS + GPT-4) that raised document-retrieval accuracy to 88%. - Implemented a GraphQL API gateway that increased feature delivery speed by 18% and simplified client integrations. - Rebuilt the eCommerce UI with React + Django API, raising user engagement 20% and conversion 12%. - Deployed an AWS ML inference service processing 1.2M+ monthly API calls at 99.9% uptime with autoscaling and cost alerts.	

AGRO AI, Pittsburgh, PA

JAMES HUGHES

Page 2 | 9312019852 | jameshughes0516@gmail.com

Full Stack Engineer (Hybrid)

01/2019 – 12/2021

- Developed Django and FastAPI backends that increased system throughput by 32% for AI products.
- Produced React Native apps supporting 50K+ monthly users, reusing backend serializers and authentication flows.
- Trained and served TensorFlow/Scikit-learn models for recommendations, increasing user retention 18% and cutting inference time 30%.
- Refactored SQL and Redis caching layers, reducing average page-load time by 24% and stabilizing spikes during campaigns.
- Built DeFi-style modules (staking, lending, rewards) that grew platform revenue by 130% and were exposed via secure REST APIs.

ACTOWIZ SOLUTIONS LLP, Walnut, CA

Python Developer (Hybrid)

10/2017 – 12/2018

- Engineered enterprise Django MVC applications that improved usability metrics by 25% and reduced support tickets 30%.
- Modernized legacy WPF / desktop components by exposing new Python REST APIs, increasing internal productivity 40%.
- Tuned SQL queries and indexes, reducing latency 45% and improving uptime for reporting jobs.
- Delivered mobile modules with Xamarin used by 1K+ enterprise employees for field reporting.

EDUCATION

HODGES UNIVERSITY, Fort Myers, FL

Bachelor of Science in Computer Science

CERTIFICATIONS

AWS Certified Solutions Architect – Associate • Microsoft Azure Developer Associate • TensorFlow Developer • Certified ScrumMaster (CSM)
