- **Reports:** ALV Reports, List Reports, Interactive ALV reports
- **Interfaces:** ALE IDOCs, BAPI, Web service
- **Conversions:** BDC programs, LSMW
- **Enhancements:** BADIs, Customer exits, User exits, Implicit and Explicit enhancements
- **Forms:** Adobe Forms, Smart Forms, and Scripts
- **ABAP Areas:** OO ABAP, Module pool programming, Data Dictionary Objects (DDIC), Function Modules, RFC, Debugging, Background Jobs, Workflows
- **Webdynpro ABAP:** Webdynpro ABAP, FPM Applications
- **Performance Tuning:** ST05, SCI - Code Inspector, SAT, Runtime Analysis, ATC and Extended program checks
- **Systems:** S/4 HANA, SAP ERP ECC, SAP NetWeaver Gateway
- **Tools and Software's:** Eclipse, Visual Studio Code, Git, Jira, Postman, Slack, Java JDK, JavaScript, HTML, CSS, XML, Yaml, Python, SQL, NodeJS, GitHub

Certifications

SAP Certified Development Professional - ABAP with SAP NetWeaver 7.0 (ID: S0012301650)

Work Experience

Bosch Global Software Technologies (BGSW)

March 2011 to April 2025

ABAP Technical Architect / Lead Developer

Client: Robert Bosch GmbH, Germany (Sep 2020 to April 2025)

Project: NGTM (New Generation Transport Management)

Responsibilities:

- Package owner for NGTM package.
- Extensively worked on interfaces from SAP S4 HANA to Eurolog.
- Interfacing with clients for gathering business requirements, and finalizing configuration, custom developments, contributing to the design, development troubleshooting and debugging of the solutions.
- Designed and developed DDI (Digital Document Interface).
- Developed interface (INTF19) to update delivery date in inbound delivery by Eurolog.
- Designed and developed Container Cockpit for Pre-Booking Order Creation.
- Developed report to display prebooking using Restful ABAP Programming Model
- Developed custom IDoc (INTF 17) for transmission of LOAD/TO data from Eurolog to SAP S4 HANA.
- Developed Interface (INTF16) to exchange route date between Eurolog and SAP S4 HANA.
 1. Interface 16A: SAP Calling Eurolog – send information needed to calculate routes i.e., plant, source location, destination location, shipping type and address data to Eurolog.
 2. Interface 16B: Eurolog provides feedback to SAP: route information i.e., ETA, ETD, FPA dates based on Schedule agreements/purchase orders.
- Designed and developed report to transfer packing instructions to SupplyOn by calling SupplyOn webservice.
- Developed CDS view - calculating Estimated time of Arrival based on Estimated date of Delivery using INTF16 data.
- Designed and developed Interface (INF26): Carrier determination via API

SAP Technical Lead / Consultant

Client: Alfuttaim Logistics, Dubai (Jun 2019 to Aug 2020)

Project: ENSEMBLE – SAP Cloud Platform and SAP YL implementation

Responsibilities:

- Responsible for delivery of technical objects.
- Managed full cycle implementation and production support and consulting for digital enterprise transformation with S4 HANA and SCP Cloud Platform.
- Worked as Technical Co-Ordinator and Full Stack Developer.
- Customer co-ordination and managing the requirements for Alfuttaim Logistics.
- Build team in RBEI for supporting Alfuttaim Logistics.
- Communication and Collaboration (Alfuttaim Logistics - RBEI).
- Integrated IS-Auto system with SAP S4 HANA system.
- Collaborated with SAP YL product owner as part of innovation and CoE (Centre of Excellence).
- Requirement gathering for SAP YL (Yard Logistics) requirements and Implementation.
- SAP Cloud Platform and SAP YL integration.
- SAP Yard Logistics functional.
- Configured SAP YL for creating Yard graphical layout user interface.
- Designed and developed OData Services and SAP Fiori/UI5 reports.
- Designed and developed Embedded Analytics reports using CDS Views.
- Developed Fiori mobile apps and deployed on Zebra devices.
- Extensively used CDS views in all developments.
- Worked on custom code performance testing with ST05 and Run time analysis.
- Built custom catalogs, custom groups, and custom tiles for SAP Fiori Launchpad.

Project Co-Ordinator - Managed Services

Client: Robert Bosch GmbH, Germany (July 2017 to May 2019)

Project: MSS (Maintenance Support System)

Responsibilities:

- Global ADOBE labels Linear systems DC.
 - Nameplate label 64 x 18 - Linear systems with rotary drive - QR code
 - Nameplate label 64 x 18 - Linear systems with linear drive - QR code
 - Nameplate label 45 x 10 - Linear systems with rotary drive
- Customer co-ordination and managing the requirements for MSS (Maintenance Support System) Rollouts.
- Info Sessions with User departments.
- Requirement gathering for SAP All requirements and Implementation.
- Interface's implementation and test the inbound interfaces.
- Transfer master data through implemented interfaces between ATMO and SAP systems: equipment, functional location, equipment BOM, personal numbers, and work centers.
- Transactional data: create notification, change/release plant maintenance (PM) order; Push order and push notification.
- Local Customization and transfer of master data with UD.
- Provided trainings to end users.

SAP Technical Specialist

Client: Robert Bosch GmbH, Germany (July 2016 to June 2017)

Project: Industry 4.0

Responsibilities:

- Responsible for understanding and implementing the requirements for I4.0.
- Responsible for design and Implementation of Webservice for FBS4 solution.
- Coordinating meetings with Module owners for getting the requirements and delivering the tasks and Integration of SAP All and SAP LE.
- Requirement gathering and implementation of HATVAN requirements.
