

ARAVIND SUDULAGUNTLA

DevOps Engineer

Location: USA | Phone: +1 (203) 503-1000 | sudulaguntla05@gmail.com | [LinkedIn](#)

SUMMARY

- DevOps Engineer with 4 years of experience in cloud infrastructure, automation, and continuous integration/delivery pipelines.
- Proficient in AWS and Microsoft Azure, managing scalable, high-availability cloud environments.
- Expertise in containerization with Docker and Kubernetes, enhancing microservices deployment and scalability.
- Skilled in CI/CD tools like Jenkins and GitLab CI, optimizing and automating deployment workflows and reducing manual effort.
- Strong background in infrastructure automation using Terraform and Ansible, improving deployment efficiency.
- Experienced with monitoring and logging tools such as Prometheus and Grafana, ensuring system reliability and quick issue resolution.
- Adept at version control systems like Git and GitHub, promoting seamless collaboration and code management.
- Worked closely with cross-functional teams via Jira & Slack, improving team collaboration and reducing issue resolution time by 30%.
- Demonstrates strong problem-solving skills, effectively resolving complex deployment and infrastructure challenges in high-pressure situations.
- Knowledgeable in emerging technologies like Helm for Kubernetes package management, AWS CloudFormation, and serverless frameworks.
- Experienced in networking and security with VPN, Vault, and configuration of security groups and firewalls.

SKILLS

- **Programming Languages:** Python, Bash, Go
- **Cloud Platforms:** AWS, Microsoft Azure
- **Containerization & Orchestration:** Docker, Kubernetes, Helm
- **CI/CD Tools:** Jenkins, GitLab CI, ArgoCD
- **Version Control Systems:** Git, GitHub
- **Monitoring & Logging Tools:** Prometheus, Grafana, ELK Stack
- **Infrastructure Automation & Configuration Management:** Ansible, Terraform, AWS CloudFormation
- **Operating Systems:** Linux (Red Hat, Ubuntu)
- **Databases:** MySQL, PostgreSQL
- **Networking & Security:** VPN, Vault, Firewalls, Security Groups, AWS IAM
- **Collaboration & Agile Tools:** Jira, Slack
- **Other Skills:** Hybrid and multi-cloud management, Microservices architecture, Troubleshooting complex issues, Cost optimization

PROFESSIONAL EXPERIENCE

DXC Technology	(CI/CD pipelines, cloud environments, Agile, Git, Docker)	August 2023 – Present
-----------------------	---	------------------------------

DevOps Engineer

- Designed and implemented automated CI/CD pipelines using Jenkins, streamlining deployment processes across multiple cloud environments (AWS, Azure) and improving software delivery speed and reliability.
- Automated infrastructure provisioning and configuration management using Ansible, significantly reducing manual setup efforts and enhancing deployment consistency.
- Led the containerization of applications with Docker, optimizing the deployment and scalability of microservices while ensuring consistency in development and production environments.
- Integrated Prometheus for real-time system monitoring and logging, improving visibility of application performance and enabling quicker troubleshooting.
- Utilized AWS cloud services to manage scalable, high-availability infrastructure, ensuring application performance and fault tolerance.
- Collaborated with cross-functional teams using Jira and Slack, ensuring smooth communication and timely project completion in Agile environments.
- Managed version control and facilitated collaboration across development teams using Git, maintaining proper

branching strategies and code reviews.

- Optimized CI/CD pipeline processes, reducing deployment time by 40% through automation of testing, deployment, and monitoring for faster and more reliable releases.

VMware

(CI/CD pipelines, GitLab CI, Kubernetes, Azure, Terraform)

January 2020 – December 2021

DevOps Engineer

- Developed and maintained automated CI/CD pipelines using GitLab CI, increasing deployment reliability by reducing human errors and downtime.
- Automated provisioning, scaling, and management of cloud infrastructure using Terraform, enhancing resource allocation and performance.
- Managed container orchestration using Kubernetes, ensuring seamless deployment, scaling, and management of containerized applications.
- Integrated Vault for secure storage and management of sensitive information, ensuring security best practices.
- Designed and implemented hybrid cloud solutions using Azure, optimizing scalability and availability while ensuring cost efficiency.
- Established Grafana dashboards for proactive monitoring of applications, reducing mean time to resolution (MTTR) by 35%.
- Collaborated with development and operations teams using Slack for effective communication during deployment cycles.

PROJECTS

Cloud Infrastructure Automation for Hybrid Environment

- Automated provisioning and configuration of hybrid cloud environments using Terraform and Ansible, reducing manual setup time by 60%.
- Deployed Kubernetes-based containerized applications on AWS, reducing deployment failures by 40% and enhancing scalability for high-traffic applications.
- Integrated CI/CD pipelines with Jenkins for automated testing and deployment, streamlining software delivery processes.

Real-Time Application Monitoring with Prometheus and Grafana

- Implemented Prometheus for real-time monitoring of cloud-based applications and infrastructure, enabling faster issue resolution.
- Developed custom Grafana dashboards to visualize system health and performance metrics, optimizing troubleshooting efforts.
- Integrated monitoring tools into CI/CD pipelines to automate performance checks and alerts on critical issues before deployment.

Cost Optimization in Multi-Cloud Environments

- Conducted in-depth analysis of cloud usage patterns across AWS and Azure.
- Implemented cloud cost optimization strategies on AWS & Azure, cutting monthly cloud expenses by 20% while maintaining application performance.

EDUCATION

Master of Science in Computer & Information Sciences

January 2022 – May 2023

University of New Haven, USA

Bachelor of Technology in Electronics and Communication Engineering

August 2017 – May 2021

Lovely Professional University, INDIA

CERTIFICATIONS

- AWS Certified Solutions Architect – Professional (2023 - 2026)
- Azure Developer Associate (2023 - 2024)
- DevOps Beginners to Advance with Projects (Udemy, 2023)
- Python Programming (ITM EdTech)
- National Level Workshop on Data Science using R Programming
