

AAYUSH AGRAWAL

Data Analyst

Sacramento, CA | (202) 855-1763 | aayushagrawal585@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Impact-driven Data Analyst with 8+ years of experience leveraging SQL, Python, Tableau, and Excel in cross-industry experience in **e-commerce, manufacturing, and technology** sectors. Adept at using **SQL, Python, Tableau, Excel**, and **BI tools** to turn raw data into meaningful insights that drive business decisions. Proven track record of leading data-driven projects that reduced costs, and enhanced operational visibility. Strong communicator who collaborates across functions and translates data into strategic recommendations.

CORE SKILLS

- **Tools & Languages:** SQL, Python, Excel (Power Query, Pivot Tables, Advanced Formulas, VBA), Tableau, Power BI, SSIS, SSRS, Git, Jira, Microsoft Power Automate
- **Data Analytics Skills:** Data Cleaning, Exploratory Data Analysis(EDA), Dashboard Design & Data Storytelling, KPI Tracking & Monitoring, A/B Testing, Forecasting & Time-Series Analysis, Statistical Analysis, Data Modeling, ETL Development, Process Automation
- **Business & Strategic Skills:** Operational & Performance Analysis, Root Cause Analysis (RCA), Strategic Planning, Cost Optimization, Stakeholder Communication & Reporting, Requirements Gathering, Cross-Functional Team Collaboration, Project Management (Agile/Scrum)

CERTIFICATIONS & COURSES

- | | |
|--|------------------------|
| • Complete Guide to Power BI for Data Analysts – Microsoft Press, | Issued Apr 2025 |
| • Skill Up with Python: Hands-On Data Science and Machine Learning Projects – LinkedIn Learning, | Issued Apr 2025 |
| • Tableau Certified Data Analyst Cert Prep – LinkedIn Learning, | Issued Mar 2025 |
| • Six Sigma Foundations – LinkedIn Learning, | Issued Jan 2025 |
| • Artificial Intelligence Foundations: Machine Learning – LinkedIn Learning, | Issued Oct 2020 |

PROFESSIONAL EXPERIENCE

AMAZON – Sacramento, CA Data Analyst (Pathways Operations Manager role re-aligned) May 2023 – Present

- Analyzed performance trends across 200+ associates and 4 area managers to identify high-potential individuals, leading to internal promotions and strengthening operational leadership pipelines.
- Created cross-departmental data visualizations using Tableau to monitor defect rates, enabling a 35% reduction in Stow defects through insights that drove the implementation of a put backs check-in process.
- Led analytics for complex work streams using SQL and Excel, driving project efficiency through milestone tracking, forecasting delays, and aligning execution with strategic KPIs.
- Standardized quality audit metrics by developing dynamic checklists and Excel-based performance trackers that ensured 100% compliance across operational teams.
- Built dashboards to monitor cost performance and labor optimization, contributing to decision-making that met aggressive cost-saving goals set by regional leadership.

AMAZON – Somerset, NJ Data Analyst Intern (MBA Internship) Jun 2022 – Aug 2022

- Designed and rolled out a root cause analysis framework for defect data, reducing computer vision bypass rates to fewer than 3% and improving system accuracy across all shifts.
- Conducted deep-dive analysis on freight check-in error logs using SQL queries, identifying high-impact process gaps and reducing defect rates below network expectations.
- Built real-time, interactive dashboards using Tableau by integrating multiple raw datasets; enabled leadership to quickly assess supply chain KPIs and adjust strategies accordingly.

PRIMAYU IMPEX – Greater Noida, India Senior Data Analyst, Strategy & Operations Feb 2017 – Jul 2021

- Developed and maintained Excel-based data models to track inventory levels, vendor performance, and procurement costs—resulting in a 9% reduction in manufacturing expenses.
- Analyzed production workflows and vendor data to scale daily assembling capacity by 33% during COVID-19 disruptions while maintaining product quality standards through predictive quality control models.
- Created financial models to evaluate underused machinery assets, leading to a 2x increase in resale value by providing data-backed ROI insights to global buyers.
- Used data reconciliation and deadline alignment models to negotiate a \$20K annual rental agreement while avoiding lease penalty fees, contributing to improved asset utilization.
- Implemented operational dashboards to identify inefficiencies in packaging and QA, reducing in-house labor requirements by 40% through vendor quality analysis and outsourcing recommendations.

Operations Analyst**Jan 2015 – Jul 2015**

- Performed time-series analysis on unloading/loading durations, reducing goods handling time by 60% through data-driven improvements and resource planning.
- Built Excel models to evaluate energy usage trends, enabling a 50% drop in electrical expenses via contract renegotiation and load optimization.

Junior Analyst – Operations**Dec 2011 – Jul 2012**

- Automated inventory tracking using Excel formulas and pivot tables, leading to a 40% increase in order accuracy and fulfillment from key vendors.
- Conducted cost-benefit analysis of assembly methods, justifying investment in semi-automatic equipment that improved productivity by 33%.

L&T INFOTECH – Chennai, India Business Intelligence Analyst**Aug 2012 – Jan 2015**

- Designed and deployed ETL pipelines using SQL Server Integration Services (SSIS), delivering critical QA performance reports that guided strategic decisions by QA leadership.
- Built resource utilization reports using SQL and SSRS that revealed inefficiencies in workforce deployment—resulting in a 4% reduction in staff costs.
- Collaborated with cross-functional teams to define KPIs, identify data anomalies, and enhance report automation for better visibility into scheduling and defect trends.

PROJECTS

Market Basket Analysis – Aramark (Food Services Company)

- Analyzed customer purchase behavior using Python and the Apriori algorithm to identify frequent itemsets and associations.
- Developed product bundling strategies that improved upselling efforts and contributed to an estimated 8–10% increase in average order value.
- Delivered insights through interactive dashboards for category and marketing managers.

Employee Fraud Detection – Internal Compliance Initiative

- Built decision tree classification models using Python (Scikit-learn) to identify anomalies in employee expense reporting.
- Achieved over 95% precision in flagging unusual claims, aiding early fraud detection and compliance enforcement.
- Integrated model outputs with Power BI dashboards to enable real-time risk monitoring.

COVID-19 Logistics Management – Local Government Initiative, India

- Created a centralized Excel-based tracker to manage the real-time distribution of medical supplies across regional centers.
- Automated stock level updates from 10+ warehouses to streamline reporting and inventory planning.
- Helped reduce delivery turnaround time by 30%, ensuring timely distribution during pandemic-driven supply chain disruptions.

EDUCATION

Georgetown University – Washington, DC*Master of Business Administration (STEM), Major: Management Science***May 2023****Rutgers University – Camden, NJ***Master of Science in Computer Science***Feb 2017****AKGEC (U.P. Technical University) – India***Bachelor of Technology in Computer Science & Engineering***Dec 2011**
