

Abdallah Ammar

(754)274-3902 | abdallahmaher04@gmail.com

Address: jacksonville,Florida

Motivated Quality Assurance Engineer with over 8 years of experience in software quality assurance for trading ,Telecommunication and financial industries. Expertise in advanced testing methodologies, SDLC, STLC, and test automation. Proven ability to deliver high-quality software solutions and collaborate effectively with cross-functional teams. Seeking to excel in a challenging Quality Assurance Engineer role.

PROFESSIONAL SUMMARY:

- Excellent working knowledge of Software Development Life Cycle (**SDLC**) and Test Development Life Cycle (**STLC**) strategies using **Agile and Waterfall** methodologies.
- Proficient in preparing Test Scenarios, Test Plans, Test Cases and Test Reports by analyzing Business Requirements Document (**BRD**), System Required Specification (**SRD**), and other user requirement documents.
- Hands-on experience of Performing **Smoke, GUI, Functional Testing, Back End, System Integration Testing, API Testing as well as UI/UX and UAT Testing** of complex financial applications with large data set.
- Expert in identifying and reporting application issues, quality weak points, with clear reproducible steps and collaborate on quick resolutions **in JIRA, Microfocus (HP) ALM and Qtest**
- Experienced creating and performing **Automation tests for UI Functional with Selenium WebDriver and Integration API tests with Postman or scripted REST calls.**
- Windows desktop application testing using UFT .
- Excellent analytical skills dealing with **Reporting data sets** in the application and **verify Data flow** in **ETL Testing**.
- Proven ability in designing and creating **Automation Frameworks** using **Java, Selenium WebDriver, Page Object design pattern,Junit, CI/CD pipeline, Git, and GitHub** tools.
- Excellent troubleshooting and problem-solving skills in working experience with **SQL** queries and **Linux** commands to run **Back-End** testing for data verification.
- Great communication skills in working with Business and Technical stakeholders in delivering quality products.
- Dedicated, highly motivated result oriented in delivering quality software solutions and strategies to achieve a high level of software quality that exceeds business objectives.

TECHNICAL SKILLS:

- **Platforms:** Windows, Unix/Linux, MAC OS,IOS,Android
- **Testing Tools:** JIRA, Qtest, Excel, Zephyr, Confluence, Figma, (HP) ALM, Azure Devops ,UFT, Postman, SoapUI,Rest Assured, Selenium WebDriver, BDD, DDT, Git/GitHub, Jenkins, AWS, Litmus, BitBucket,
- **Database:** MS SQL Server, MySQL, Oracle,MongoDB
- **Languages:** Java, VB Script, HTML, SQL, XML

EDUCATIONS

- associated degree in software engineering
- Bachelor degree in management information systems
- Certified Tester from ISTQB with 3 certifications FL,AT &MAT Credentials IDs (**220914017,210303011,200929001**)

PROFESSIONAL EXPERIENCE:

VOIS, QA Engineer, (10/2022 to 11/2023)

06/2019 – 011/2023

- Followed fast-paced **Agile/Scrum Development lifecycle in continuing delivering electronic trading platform.**
- Created comprehensive test plans in Azure DevOps, ensuring alignment with project requirements and stakeholder expectations.
- Collaborated with cross-functional teams to define test strategies, scope, and objectives using Azure DevOps boards and pipelines.

- Developed and maintained test cases and test suites within Azure DevOps, ensuring they were up-to-date with evolving project specifications.
- Managed test execution and tracked progress using Azure DevOps' Test Plans, identifying and documenting issues as they arose.
- Reviewed functional and design specifications to ensure full understanding of validated deliverables. Identify test requirements from specifications, map test case requirements, and design test coverage plan.
- Developed, documented, maintained, executed, and evaluated manual or automated test cases and report test results.
- Performed **UI Functional, End to End Integration (external and internal systems), Back End validation, Load, API for Market data calls and Automate** scripts for Full regression suites.
- Facilitated test plan/case reviews with cross-functional team members. Isolate, replicate, and report defects and verify defect fixes in the test management **tool (JIRA, HP ALM)**.
- Test Functionalities and Data flow throughout Trade life cycle: Initiate Equity orders from the UI to validate functions and trade data capture, verify the status and other trade fields (based on status) in each step of the trade life cycle (pre-trade, trade, post-trade).
- Identify any potential quality issues per defined process and escalate potential quality issues immediately to the assigned project team members, Senior BSA, and Manager of Software Development.
- Created and maintained Gherkin end to end scenarios, create/enhance reusable methods in Java to use in scenarios files, Identify Page element locators and functions in Page Factory files.
- Designed and created **Automation** Frameworks from scratch using **Java, framework, Selenium WebDriver and Page Object Modeling design pattern**.
- Created and maintained Gherkin end to end scenarios, create/enhance reusable methods in Java to use in scenarios files, Identify Page element locators and functions in Page Factory files.
- Maintained and enhanced the framework using **Object Oriented Programming Concepts, BDD (cucumber) implementation** and other **Open source** libraries.
- Maintained and Executed automated tests in **CI/CD** flow in **Jenkins (using AWS EC2 instance for windows)**, analyze failed tests and fix issues in the automation code.
-
- Verified integration within a **Platform, create REST Assured API calls and tests (timeout, performance, status) in Postman**, automate the scenarios and validation of the **Request/Response in these Calls (GET/POST/PUT/DELETE) using REST Assured Request library**.
- Performed backend database testing in **RDBMS** environment using complex **SQL** data manipulation queries. Analyzed data sets and validate netting, aggregating and filtering functionalities in Reporting pages.
- Conducted exploratory testing to evaluate the robustness and functionality of products prior to releases.
- Built, maintained test environments, monitored, troubleshooted, and triaged, resolve issues.
- Co-ordinated code deployments, maintenance upgrades, and project testing across numerous environments on various technology platforms.
- Performed **Functional, Smoke/Sanity, GUI, Integration, Back-End, and Automated Regression testing**.
- Constantly validate back-end trade data and calculations on the system with SQL queries and functions.
- Participated in production support issues; recreate defects reported by the **Client-Support team** and assist in testing.
- Participated in **daily stand-up meetings** to discuss progress, modification requests, and blocker issues. Participated in audit reviews of test artifacts, ensuring they meet standards and audit requirements.
- Assisted with the development of e-learning and training materials and conducted knowledge transfers to new QA team members.

TestPRO, QA Analyst

09/2017 – 05/2019

- Worked closely with software developers, business analysts, and other project management personnel involved in the Software Development Life Cycle (SDLC).
- Develop and execute detailed UAT cases Telecommunication system, ensuring they meet business requirements and regulatory standards
- Member of the **Agile/Scrum QA Environment** testing team focused on **Fixed Income**.
- Involved in team meetings with representatives from Development, Configuration Management, and Requirements Management to identify and correct defects.
- Analyzed System Requirements Specification (SRS) to prepare necessary Test plans and Test cases for UI, Functional, and Regression testing.
- Involved in writing Manual Test Cases for checking the functionality of the application and tested the GUI of the application comparing it to the standards.

- Ran **SQL** queries for data validation and verify the back-end data while processing the transactions and generating the fees, application calculations based on business logic.
- Testing databases like Oracle,MongoDB,MySQL
- Performed Smoke, Sanity, Functional, Back-End, and Regression testing
- Created test cases, linked requirements with test cases, executed test cases, reported bugs, and created the Test Analysis Report (TAR) using HP Quality Center.
- Created Requirement Traceability Matrix to make sure that all requirements are covered with test cases.
- Communicated with developers through all phases of testing to prioritize bug resolution.
- Assisted Engineers in handling Production Issues by reproducing Issues and proving possible analysis.
- Helped in deciding which tasks should be automated.
- Performed root cause analysis after each iteration.

Korashi Group, QA Tester

01/2016 - 08/2017

- Reviewed Functional Requirement Specifications and created test cases based on test scenarios drawn from functional requirements.
- Member of the **Agile/Scrum QA Environment** testing team.
- Executed Manual Test Cases for checking the functionality of the software.
- Performed Smoke (Sanity), GUI, Functional, and Regression Testing of the software.
- Reported and assigned the bugs through Modification Request using HP ALM/Quality Center, re-tested the fixed bugs to ensure that the reported problem worked according to requirements.
- Performed Back End Testing using SQL queries to retrieve the data from **MS SQL database and SQL**.
- Developed Test Strategy and Test Plan for multiple projects, which followed the agile methodology.
- Led Smoke, Regression Testing, Performance Testing, and Web service testing for the financial business layer.
- Developed test cases from user stories for specific functional requirements
- Participated in the status meeting to report issues
- Communicated with developers through all phases of testing to prioritize bug resolution.
