

EXPERIENCE

- Selkirk Sport LLC

Data Analyst

Dallas, TX

Aug 2024 - December 2024

- Developed a product performance analysis solution using SQL and Power BI, leveraging SQL functions like COALESCE, CASE, RANK(), and CTEs to aggregate sales, inventory, and customer feedback data, and created Power BI dashboards with KPIs, heatmaps, and trend analyses to track top-performing products, sales trends, and stock levels.
 - Automated an end-to-end workflow for 'Return and Refund' requests of products using Power Automate. Integrated PowerApp and Dataverse to record return requests. This solution reduced return resolution time from 1 week to 3 days.
- Commscope

Data Analyst Intern

Dallas, TX

May 2023 - Aug 2023

- Developed "Supply Chain Tower", a Power BI solution with interactive dashboards for supply chain KPIs, integrated with PowerApps for mobile access and Power Automate for automated low-stock alerts. Enhanced decision-making efficiency, reduced stockout incidents by 20%, and streamlined supplier communication, improving overall supply chain performance.
- Office of Information Technology (UT Dallas)

Data Analyst

Dallas, TX

Aug 2022 - May 2023

- Prepared 50+ customized Excel reports monthly for individual helpdesk agents, showcasing key performance metrics such as idle time, on-call time, tickets resolved, etc. Consolidated data from multiple sources using advanced Excel tools, including pivot tables, VLOOKUPS, and macros, to streamline report generation and ensure accuracy.
 - Analyzed Google Analytics data in Tableau to assess key website metrics such as click-through rates and popular content. Generated actionable insights that led to an additional 15,000 monthly visitors and improved user engagement.
 - Built and maintained workflows for Ticket Routing, Account Provisioning/Deactivation, and Password Resets by integrating Power Automate with ticketing systems like ServiceNow and account management tools such as Azure Active Directory.
- Ernst and Young (EY)

Business Intelligence Analyst

Pune, India

May 2018 - July 2022

- Developed interactive Power BI and Tableau dashboards for financial services clients, providing real-time insights into key business metrics such as revenue, risk exposure, and fraud detection.
 - Designed and optimized data models using DAX (Time Intelligence, Aggregation, Relationships), Power Query (Custom M Scripts), and SQL (Indexing, Query Optimization), ensuring efficient data retrieval and high-performance reporting.
 - Integrated SQL Server and REST APIs to ingest financial data from multiple sources, implementing Stored Procedures and Functions to improve data consistency and reliability.
 - Managed Power BI Service (Workspaces, Deployment Pipelines, Gateway Configuration) and Tableau Server (Sites, Users, Extract Schedules) ensuring smooth operation and optimal performance.
 - Automated ETL workflows using Python (Pandas for Data Cleansing, API Calls for Data Extraction) and Power Automate (Scheduled Flows, Automated Email Alerts, Approvals), reducing manual reporting efforts by 50%.
 - Built custom Canvas and Model-driven PowerApps integrated with Power BI and Dataverse, enhancing self-service analytics and automating CRUD operations.
 - Led migration projects from Tableau to Power BI, standardizing reporting frameworks for dashboard design.
 - Provided consulting and training to financial analysts and business teams, enabling them to use DAX, Power Query, Tableau.
 - Implemented Row-Level Security (RLS) in Power BI and User Permissions in Tableau, ensuring data governance and compliance with financial regulations.
 - Conducted performance tuning and optimization for large-scale dashboards, improving Power BI Dataset refresh times, SQL Query execution, and Tableau Extract Performance by 40%.

EDUCATION

The University of Texas at Dallas MS - Information Technology and Management	Dallas, TX Aug 2022 - May 2024
Visvesvaraya National Institute of Technology B.Tech - Chemical Engineering	India July 2015 - May 2019

SKILLS & CERTIFICATIONS

Technical Proficiency:	R , Python, SQL, Machine learning, Excel, Javascript, SAS, Airflow DAG, Jenkins
Platforms:	Power Platform, AWS, Azure, Microsoft Fabric, Snowflake
Certifications:	Tableau Certified, AWS Certified Cloud Practitioner, Microsoft Power Platform Fundamentals

PROJECT

Automated Targeted Marketing Campaigns for Oscar Health - As a part of my Masters' practicum project, I collaborated on developing an automated system to segment potential customers and launch targeted marketing campaigns for Oscar Health. - Designed an ETL and automation pipeline to process customer data, segment users, and trigger personalized emails. - Built an Airflow pipeline to extract and preprocess customer data from Snowflake, applied KMeans clustering for segmentation, and integrated Power Automate to trigger marketing workflows. - Automated customer segmentation and marketing workflows, improving campaign engagement rates by 30%.
