PROFILE

Experienced Full-Stack Engineer with over 10 years of expertise in software development, specializing in the creation of robust and scalable web applications. Proficient in a diverse range of technologies and frameworks including **C#, Javascript, TypeScript, .Net, Angular**, and **React**.

Proven track record in delivering innovative and creative solutions, adept problem-solving, and adapting to diverse frameworks. Demonstrates strong communication, collaboration, leadership, and teamwork skills, contributing to project success through strategic planning and execution.

PROFESSIONAL EXPERIENCE

Red74, Senior Software Engineer

Aug 2021 – Current | Pennington, NJ

- Developed and maintained web platforms specializing in **E-COMMERCE** and **HEALTHCARE** sectors.
- Employed **Angular, React, Blazor** for frontend tasks, **ASP.Net Core, Web API** for backend operations.
- Utilized **NgRX** and **Redux-Toolkit** for efficient global state management.
- Translated **Figma** designs to pixel-perfect interfaces using **TailwindCSS, Material UI** and **StyledComponents**, boosting user satisfaction by 20%.
- Achieved 95% test coverage using **XUnit, NUnit, Jest, Jasmine**, and **Cypress** efficiently.
- Advanced data retrieval efficiency by designing **GraphQL** schemas for the backend and implementing frontend **GraphQL** integration.
- Enhanced data management and query performance using **PostgreSQL** and **Oracle** databases.
- Worked on backend using **ASP.NET Core** and **Web API**, developing **RESTful APIs** and microservices, ensuring scalability and performance of backend systems.
- Experienced with data accessing, including using Data Adapter, Data Reader and Dataset in **ADO.NET** and **LINQ** Providers for data manipulation.
- Used **Dapper** for efficient data access and mapping in .NET applications.
- Implemented **SOA** (Service-Oriented Architecture) to design and deploy scalable, loosely coupled services.
- Used **Blazor** hosting methods, including **Blazor Server** and **Blazor WebAssembly**, to deliver responsive, client-side applications with seamless real-time updates.
- Actively took part in continuous integration and continuous deployment (**CI/CD**) pipelines using **Github actions, Jenkins, Docker** and **Kubernetes**, which reduced deployment times by 30%.
- Utilized **Azure** for cloud infrastructure, leveraging **Blob Storage, Azure Functions** and **AKS**.
- Enhanced team collaboration and bridged the development-product gap during **Agile** ceremonies.
- Fostered team growth and improved code quality by 15% through mentorship and pair programming among junior and senior engineers.

Nine Energy Service, Senior Full Stack Developer

Jan 2018 – Jul 2021 | Ulster, PA

- Developed and optimized **E-COMMERCE** platforms using various client-preferred tech stacks, including

Javascript/Typescript (React and Angular) and C# (.Net, ASP.Net Core).

- Architected the database design with **MongoDB, MySQL** and **PostgreSQL** to build **RESTful APIs**.
- Developed complex data streams and handled asynchronous events using **RxJS**.
- Built and optimized backend systems using **ASP.Net**, including **ASP.Net Core** and **ASP.Net MVC**.
- Utilized **LINQ** to perform efficient data queries and transformations in ASP.Net applications.
- Implemented **Entity Framework** for data access in ASP.Net applications, streamlining database interactions and improving overall development efficiency.
- Developed high-performance mobile applications for iOS and Android using **.NET MAUI**, enabling a seamless cross-platform experience.
- Possess a strong understanding of **API security** and **OAuth** for secure authentication and authorization.
- Leveraged **RabbitMQ** and **Kafka** for efficient message queuing and real-time data processing.
- Employed **Git** for version control and **Jenkins** for **CI/CD** pipeline management.
- Experienced in **Kubernetes** for containerized app deployment, alongside using **Terraform** for **AWS** automation, ensuring scalable, reliable, and streamlined operations.
- Developed scalable and resilient systems using **Azure** services like **AKS, Blob Storage**, and **Azure Functions**, enabling more efficient operations.
- Covered enough testing cases including integration, unit, and snapshot testing using **NUnit, XUnit, Jest, Mocha, Chai, Enzyme**, and **react-test-renderer**, achieving a 95% test coverage.
- Applied **Agile/Scrum** methodologies, conducting regular sprint planning sessions and retrospectives to streamline project management.
- Experienced with various **IDE** like **Visual Studio, IntelliJ IDEA, Eclipse**, etc.
- Demonstrated strong problem-solving skills by quickly adapting to various frameworks, showcasing my ability to navigate and excel in diverse technical environments.
- Collaborated with cross-functional development teams to customize and deploy API solutions tailored to specific client requirements, improving service efficiency and client satisfaction.

Amazon, Frontend Developer

Mar 2015 – Dec 2017 | Pittston, PA

- Developed web applications using **ASP.Net MVC, Entity Framework**.
- Worked closely with the design team to implement responsive web interfaces using **HTML5, CSS3**, and **JavaScript**, ensuring a seamless user experience across multiple platforms.
- Developed and maintained server-side logic in **ASP.Net MVC**, handling complex business rules.
- Applied data access layers using **Entity Framework**, optimizing database interactions and improving overall application performance.
- Conducted unit testing and automated testing using **NUnit** and **xUnit**, ensuring code quality.
- Developed dynamic web pages using **Razor** Pages in ASP.Net, improving maintainability and streamlining the development process.
- Collaborated with cross-functional teams to align technical implementations with business goals, highlighting teamwork and communication.
- Stayed updated with industry trends, committing to continuous learning and adaptability.

Brodart CO, UI Developer

May 2012 – Mar 2015 | Williamsport, PA

- Contributed to the development of **E-COMMERCE** website using **HTML, CSS**, and **JavaScript**.
- Experienced in developing and managing websites using **CMS** platforms such as **WordPress** and **Drupal**.
- Implemented responsive design for different browsers and devices using **Bootstrap**.
- Using modern CSS techniques such as **flexbox** and **grid** to improve the layout and design of the website.
- Involved in writing app-level code to interact with APIs, Web Services using **AJAX, JSON** and **XML**.
- Assisted in content management tasks, ensuring consistency and accuracy across web pages.
- Conducted basic testing and troubleshooting to identify and fix frontend issues promptly, showcasing problem-solving skills.

EDUCATION

Bloomsburg University Of Pennsylvania,
Bachelor's degree in Computer Science

2008 – 2012 | Bloomsburg, PA

SKILLS

Programming Languages

C#, Javascript, Typescript, Java, PHP, Python, Ruby, Go

Frameworks / Libraries

ASP.Net, React, Angular, Next, Node.js, Express.js, Nest.js, Laravel, Ember.js, Backbone.js

Mobile Technologies

React Native, Java, Swift, Flutter, Kotlin, Dart

Web Technologies

Blazor Server / WebAssembly, Redux, NgRX, GraphQL, HTML, CSS, SASS, LESS, SaaS, RxJS, RabbitMQ, Kafka

Cloud Services

AWS, Microsoft Azure, GCP, Firebase

Database

SQL (MySQL, PostgreSQL), NoSQL (MongoDB)

Styling Frameworks

TailwindCSS, Material UI, Semantic UI, Ant Design, Chakra UI, Bootstrap, Headless UI, Radix UI

Version Control Tools

Git, SVN

Automation Tools

GitHub Actions, Jenkins, Kubernetes, Terraform

Testing Tools

Jest, React Testing Library, Jasmine, Cypress, Mocha, Chai, Enzyme, Selenium, A/B Testing

AWS

Amazon EC2, S3, ECS, Lambda, Cognito, RDS, DynamoDB

Microsoft Azure

Virtual Machines, Blob Storage, SQL Database, AKS

Soft Skills

Mentoring, Leading, Communication, Time Management, Problem Solving, Adaptability
