- **Programming Languages:** Python, C#, SQL, JavaScript, TypeScript, HTML, CSS
- **Database Management:** Oracle, Microsoft SQL Server
- **Software Tools/ Technologies:** VMWare, Docker, Jira, Power BI, Figma, Git, Microsoft Office Suite
- **Operating Systems:** Windows 10/11, Linux

EXPERIENCE

Quality Assurance Tester

Swiftly Software

Apr 2023 – Apr 2024

Calgary, AB

- Conducted meticulous testing of software to identify bugs and ensure functionality, leveraging problem-solving skills and attention to detail.
- Documented findings and collaborated with developers, showcasing strong listening and communication abilities.
- Prioritized tasks efficiently, reflecting excellent judgment and organizational skills.

VOLUNTEER EXPERIENCE

Front-End Developer

Empowered Futures

Apr 2024 – Present

Calgary, AB

- Collaborated with cross-functional teams to design and implement responsive web applications using JavaScript, TypeScript, and React.
- Provided technical support and troubleshooting for web applications, ensuring smooth integration and compliance with internal IT standards.
- Worked closely with backend developers to implement PostgreSQL for efficient database management and integration.
- Utilized Docker to containerize front-end applications, ensuring consistency across different development and deployment environments.

PROJECTS

Token Picker: Crypto Investment Navigator

Personal Project

December 2024 – Present

Calgary, AB

- Designed and developed a Python-based Crypto Token Analysis Engine to recommend investment opportunities by evaluating cryptocurrencies based on market cap, liquidity, volatility, and token age using real-time data from the CoinMarketCap API.
- Implemented advanced filtering algorithms with dynamic risk profiles (low, medium, high) to analyze stability and performance, providing an interactive user experience via a terminal-based interface.
- Deployed the application on AWS, ensuring scalable, reliable access while leveraging cloud infrastructure for optimal performance and availability.

Bug Reporting and Testing For Web Applications

Personal Project

October 2024

Calgary, AB

- Conducted detailed bug reporting and testing for a web application, utilizing JIRA for efficient issue tracking and documentation.
- Designed and executed comprehensive test cases to identify functionality gaps and improve user experience.
- Strengthened skills in Quality Assurance, defect tracking, and Agile project management.

Hammerhead Energy Petrophysics Analysis Tool (Capstone Project)

Hammerhead Energy

September 2023 - April 2024

Calgary, AB

- Developed a lithology prediction model using Python and GPT-4 AI to enhance data interpretation and improve accuracy in geological analysis.
- Collaborated with a cross-functional team, applying Agile methodology to iterate on the model and integrate feedback, enhancing the tool's functionality.
- Presented the project to industry leaders, receiving positive feedback for delivering a solution that aligned with both business and technical objectives, achieving a perfect grade.
- Gained a strong understanding of the oil and gas industry and sparked a passion for applying technology to solve real-world challenges, while also learning the full Software Development Life Cycle (SDLC) and Agile methodologies.

EDUCATION

Software Development

Southern Alberta Institute of Technology (SAIT)

September 2022 - Apr 2024

Calgary, AB

Bachelor of Arts: Multidisciplinary Studies

University of Calgary

September 2016 - Apr 2021

Calgary, AB
