PROFESSIONAL EXPERIENCE

Senior Database Developer

Denver, CO

MGMA(Medical Group Management Association)

Feb 2024 – Present

- Engineered and deployed an Azure Pipeline solution for integrating National Provider Identifier (NPI) data into our system, streamlining a monthly process that loads approximately 10 million records.
- Optimized website performance by implementing index fragmentation and creating an archive table, reducing load time from 1 minute to 8 seconds with 44 million records.
- Served as the primary stakeholder for Higher Logic integration, independently managing the end-to-end setup of a PUSH API to transfer contacts, membership, and demographic data from MGMA to Higher Logic.
- Integrated Marketo APIs with Azure Synapse to automate the retrieval of form submissions and new leads data, enhancing the marketing team's ability to gain actionable insights and optimize campaigns.
- Played a key role in designing, developing, analyzing, and maintaining an integrated system architecture that includes both Azure Synapse and on-premises SQL database environments.
- Collaborated with business stakeholders, marketing teams, and product owners to gather requirements and oversee the design, development, testing, and maintenance of solutions, enhancing overall efficiency.
- Led the automation of multiple manual processes, partnering with the Marketing team to identify and integrate key data requirements into our system, significantly improving operational efficiency and data accessibility.

Graduate Teaching Assistant

Denver, CO

University of Denver

Sept 2021 – Nov 2023

- Conducted interactive teaching sessions, including labs and workshops, for undergraduate Computer Science courses such as Programming languages, DBMS, Data Structures, and algorithms.
- Demonstrated coding and debugging techniques, guiding students through challenging topics.
- Collaborated with faculty to develop and deliver effective teaching strategies that catered to diverse student needs.

Senior Data Engineer

Mumbai, India

JP Morgan Chase

Oct 2019 – Aug 2021

- Saved \$110k annual license cost by leading the migration of mission-critical operations from the SAS server to Pentaho.
- Automated data ingestion procedures and improve overall reporting efficiency by 40% with the introduction of custom-built data views and reports.
- Collaborated with cross-functional teams, including business analysts, to assess data requirements, and design scalable solutions, resulting in increased operational efficiency and a 20% reduction in processing time.
- Orchestrated and implemented ETL processes, achieving a 25% improvement in data flow efficiency and a 15% increase in overall data accuracy by extracting, transforming, and loading data into the data warehouse.
- Conducted performance tuning and optimization of SQL queries, reducing query execution time by 20% and enhancing overall system efficiency.
- Developed and maintained robust shell scripts in a Linux environment to automate system tasks, enhance operational efficiency, and streamline routine processes.
- Leveraged Python for data manipulation, analysis, and visualization, and to automate complex financial calculations, resulting in improved accuracy and reduced processing time.

ETL & Database Engineer

Pune, India

Barclays

Aug 2016 – Sept 2019

- Leveraged Informatica to design, develop, and maintain ETL (Extract, Transform, Load) processes, ensuring 40% increase in operational efficiency and accurate movement of data from source systems to target databases.

- Reconciled investment and banking data from HDFS for all the accounts, transactions, and holdings to be in sync using Big Data tools such as Hive and Python scripts reducing processing time by 80%.
- Designed complex SQL, T-SQL, and PL/SQL queries for developing Views, Stored Procedures, Functions and Triggers to handle database manipulation and performance.
- Engineered and implemented a high-performance SOAP and REST web service in Java, achieving notable results with a 40% improvement in data retrieval speed and a 25% increase in service reliability, ensuring swift and accurate delivery of financial data.
- Played a key role in making technical decisions aligned with Business requirements, collaborating with Business Analysts, Client teams, and Development teams for migrating RedHat Linux 5 to RedHat Linux 7.
- Proposed and designed various reports/dashboards to provide insights and data visualization using BI/ETL tools like SAS, SSRS, Tableau.

TECHNICAL SKILLS

- **Programming Language:** Python SQL, Java, R, Haskell, JavaScript, Hadoop, Hive, Scala, Sqoop, Spark, PySpark, Shell scripting (Bash), SAS
- **Frameworks:** Flask, Django, SpringBoot, Apache Kafka, Rest, SOAP
- **Database:** Oracle, MySQL, MS SQL Server, MongoDB, DB2
- **Data lake:** Snowflake
- **AWS:** Lambda, EC2, EMR, RDS, S3, SQS, CloudFront, IAM, VPC, Dynamo DB, Kinesis, Glue,
- **Azure:** Blob storage, Data Lake storage, Synapse Analytics, DevOps
- **ETL Tools:** Informatica (PowerCenter), Abinitio, Pentaho, Alteryx, SSIS
- **SDLC:** Agile (SCRUM), Waterfall
- **Build/Deployment:** Maven, Bit Bucket(git), SVN
- **Scheduling:** Autosys, Jenkins, Control-M
- **Data Visualization:** Tableau, Microsoft Excel, Grafana

EDUCATION

Master of Science in Computer Science
University of Denver

Denver, CO
Nov 2023

Bachelor of Engineering in Information Technology
Sardar Patel Institute of Technology

Mumbai, India
May 2016

ADDITIONAL INFORMATION

- **Certifications:**
 - **AWS-Certified-Cloud-Practitioner:** Udemy
 - **Alteryx Designer Core Certified:** Alteryx
- **Awards & Achievements:**
 - Recipient of the **Graduate Teaching Assistant of the Year** award for outstanding contributions in the Computer Science department at the **University of Denver**.
 - Received **WiCys scholarship** to present my research on security and privacy evaluation of mental health services in the **United States**.
 - Participated in the **U.S. Department of Energy's Cyberforce Competition**, gaining hands-on experience in defending critical infrastructure against cyber threats.
 - Received **KIHA Summer grant** for research on Mental Healthcare Chatbots for Aging Population.
 - Recognized by **JP Morgan leadership** for effectively migrating critical business processes, leading to a significant cost-saving of \$110k in license fees.
