

**Ajay Kesari**  
**Oracle Integration Cloud developer**  
**901-493-4841**  
**ajay.soadeveloper@gmail.com**

**PROFESSIONAL SUMMARY:**

**12 years of IT experience in providing enterprise integration solutions using technology products like Oracle Integration Cloud (OIC), Oracle FMW (SOA12c and OSB12c), Oracle ESB, Oracle ERP and MuleSoft.**

- Designed, developed and implemented integration solutions using **Oracle Integration Cloud (OIC)** to connect to various enterprise applications and systems.
- Hands on experience in providing Integration solutions with **Oracle ERP, Oracle HCM and Salesforce using OIC.**
- Hands on experience in using the OIC API platform for **designing, exposing and Monitoring** of the APIs.
- Hands on experience using the **Pre-built Adapters of OIC**, i.e. Oracle ERP, Oracle HCM, REST, SOAP, FTP, Database and Salesforce etc.
- Hands on experience in developing **App- Driven** Orchestrations and **Scheduled based** orchestrations.
- Developed and deployed integration based on **Orchestration** flows, **Publish-Subscribe** frameworks and **Point-to-Point** Connections.
- Having Functional knowledge on Oracle ERP Module of Financials, P2P (procure-to-pay), Order-to-cash modules.
- Implemented OIC integration solutions for Oracle Financials and O2C using Oracle ERP adapter, REST/SOAP APIs.
- Implemented integration solutions for analytics by sending the data to salesforce using the **salesforce adapter.**
- Experience using **Oracle Visual Builder** for web development.
- Extensively used **FTP adapter** and **File server** Integration for File Handling.
- Extensively used **Integration Insight, Activity Stream, Error Hospital and Fault policies** to provide the best Monitoring and error handling framework for the integrations.
- Implemented API led connectivity approach to expose and manage APIs, facilitating reusability and agility in Integration projects.
- Strong expertise in building integrations using Oracle SOA Suite12c and Fusion middleware 11g.

**TECHNICAL SKILLS:**

|                                 |                                                                                                                                                                                                                                        |
|---------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Oracle Integration Cloud</b> | <b>Integration Designer, Adapters, Mapper (XSLT), Connection wizard, Expression Builder, Test Integration, Fault Handling framework, Error Hospital, Monitoring dashboard, Scheduler, Visual Process builder, Oracle Process cloud</b> |
| <b>Languages</b>                | RAML, SQL, PL/SQL, XML, XSLT, Java                                                                                                                                                                                                     |
| <b>CI/CD</b>                    | GIT, Microsoft TFS, SVN, JIRA, Jenkins                                                                                                                                                                                                 |

|                                 |                                  |
|---------------------------------|----------------------------------|
| <b>Cloud Services knowledge</b> | AWS, GCP, Salesforce, Servicenow |
|---------------------------------|----------------------------------|

## PROFESSIONAL ENGAGEMENTS:

|                 |                                  |
|-----------------|----------------------------------|
| <b>Client</b>   | <b>McKesson Corp</b>             |
| <b>Duration</b> | <b>November 2021 – Till date</b> |
| <b>Role</b>     | <b>Sr. OIC Developer</b>         |

### Projects:

- Implemented OIC Integration solutions for 2 critical projects for **McKesson which are DSCSA and Titanium projects.**

### Responsibilities:

- Designed and developed an **end-to-end** integration between external financial system to automate the upload of GL journal entries **into Oracle Cloud ERP.**
- Developed **end-to-end-integrations** using design center to Automate invoice data processing from external vendors **into Oracle Accounts Payable.**
- Developed **end-to-end integrations** and created reusable APIs for Quote details, Price retrieval, Price verification and Price reupload.
- Developed **end-to-end integrations** using **design center** for Ordering, return status, Invoicing and Item loads.
- Designed and deployed business processes using **Oracle Process Cloud** within OIC for DSCSA project.
- Implemented the integrations using the OIC pre-build adapters Oracle ERP, Oracle HCM, REST, SOAP, FTP, Database, Salesforce, etc.)
- Implemented FTP adapter and storage integrations for file handling integrations.
- Configured OAuth, Basic Authentication and API key security for APIs.
- Managed SSL certificates for secure connections.
- Implemented **data mapping between CSV/JSON formats.**
- Configured API integrations using **REST and SOAP protocols** for seamless communication between systems.
- Mapped and transformed data formats (JSON to XML)** to ensure compatibility between systems.
- Extensively used data transformation tools **XSLT mappings** and **Expression Builder** to transform and map data between source and target systems.
- Set up error-handling workflows** to manage integration failures and log issues for troubleshooting.
- Created** monitoring **dashboards** using **Integration Insight, Activity stream and ELK** to track the **KPIs** and to identify any **bottle necks** in the integrations.
- Collaborated with HR and IT teams to gather requirements and validate workflows during User Acceptance Testing (UAT).
- Documented integration workflows, technical configurations, and system changes for future reference.

|                 |                                     |
|-----------------|-------------------------------------|
| <b>Client</b>   | <b>Hertz</b>                        |
| <b>Duration</b> | <b>October 2019 – November 2021</b> |
| <b>Role</b>     | <b>Integration Developer</b>        |

- Developed real-time **email notification integrations** for Salesforce and Oracle ERP.
- Integrated **Salesforce Marketing Cloud** to automate personalized email based on mobile app events, using **Marketing Cloud Transactional Messaging API** to send dynamic emails.
- Designed and implemented **transformations** using **XSLT mappings** and **Expression Builder**.
- Designed scheduled based integrations between Hertz legacy systems and Oracle ERP using Oracle ERP Adapter.
- Implemented **error handling** and **retry mechanisms** including handling API timeouts, data inconsistencies, and retrying failed operations.
- Deployed the APIs to both **Cloud hub and RTF environments**.
- Developed integrations related to payments with Oracle ERP **and implemented B2B integrations using EDI**.
- Extensively used other mule connectors such as **SOAP adapter, HTTP and REST adapters, database adapter, MQ adapter** as part of the integrations with other third party systems.
- Performing end to end testing for all the integrations and APIs developed.
- Maintaining and managing the CI/CD pipelines and making sure that the code is ready for the production deployment.
- Created dashboards using Integration Insight for monitoring of the KPIs and identifying any bottlenecks.

|                 |                                               |
|-----------------|-----------------------------------------------|
| <b>Client</b>   | <b>Exelon - Baltimore MD, Philadelphia PA</b> |
| <b>Duration</b> | <b>July 2018 – September 2019</b>             |
| <b>Role</b>     | <b>Senior Software Engineer</b>               |

#### **Projects:**

- Worked on 3 different projects “BGE- Prepaid Power Project”, “RNI Upgrade” and “oneMDS” between different source systems and target systems.
- For BGE Oracle (CCB) is source and PayGo is target, for RNI Upgrade Oracle BPM, MDR are source systems and RNI is target and for oneMDS IBM as source and MDS is target systems
- As an Oracle Fusion Middleware developer and Architect handling the design and development, testing the interfaces both in INT and PROD environment and maintaining the code bases in GIT repository

#### **Accomplishments:**

- Designed and **Implemented different OSB, SOA related integrations Enrollment, Unenrollment, Connect, Disconnect, Account Summary etc.** using Oracle Service Bus 12c, oneMDS projects with BPEL and OSB 12c

- Used pipeline to develop the internal logic and used **different technology adapters like HTTP, REST, JMS, DB adapters and Oracle ERP cloud adapters.**
- Designed POCs to design integrations using Salesforce cloud adapter and ERP cloud adapter and Mock services to test them using SoapUI.
- **Designed and Implemented 3 more Payments related integrations such as Payments and adjustments, customer update and readings in Oracle SOA.**
- Used UC4 mechanism for triggering the daily jobs and oracle MFT for file transfers.
- Used BPEL for orchestration in the integrations and made SOAP to communicate to target systems, designed DB adapters to query and fetch data from other MDM systems.
- Used CLEH-3 for error handling, this mechanism consists of Logging and exception handling.
- Build Jenkins URLs for deploying the code from one environment to another both for integration projects and MFT services.

|                 |                                                      |
|-----------------|------------------------------------------------------|
| <b>Client</b>   | <b>Archer Daniels Midland (ADM),<br/>Decatur, IL</b> |
| <b>Duration</b> | <b>January 2016 – May 2018</b>                       |
| <b>Role</b>     | <b>Senior Software Engineer</b>                      |

**Environment:** OFMW 12c, SOAP, REST, Microservices, XML, XPath, JMS, DB, WebLogic server, Postman, SOAPUI

#### **Responsibilities:**

- Involving in business requirement gatherings to design, develop and deploy enterprise integration solution for trucking application and back end systems, using complex business orchestration flows using BPEL and OSB.
- Interacting with the McLeod Transportation software and with the IBM.DB2.
- Developing enterprise data integrations using SOA Suite, BPEL, Web Services, and OSB.
- Handling over all major set of integrations from end to end i.e. from requirement gathering to dev testing.

#### **Accomplishments:**

- Handled the project from scratch, as the whole project is on Oracle SOA Suite 12c, created the documents based on the new environment which is little challenging.
- Designed 30 SOA and 7 OSB Technical documents gathering from requirement documents and code development, deployment and testing for all 37 integrations.
- Created Functional design, technical design, unit test and migration documents for all the 37 integrations.
- Successfully implemented file based MDS for all SOA integrations.
- Implemented REST adapter for calling the destination APIs and making all the service calls.
- Extensively used REST, SOAP, JMS, MQ, DB in the integrations.
- Implemented REST adapter for interacting with the web applications, MQ adapter to interact with the IBM DB2 server and extensively implemented JMS adapter.
- Effectively used Microsoft Team foundation server for version control for code check-in, creating work items during testing.

|                 |                                    |
|-----------------|------------------------------------|
| <b>Client</b>   | <b>Accenture, Hyderabad, India</b> |
| <b>Project</b>  | <b>Multiple Projects</b>           |
| <b>Duration</b> | <b>June 2011 – December 2013</b>   |
| <b>Role</b>     | <b>Software Engineer</b>           |

**Environment:** Oracle SOA Suite 12c, 11g, Weblogic Server

**Responsibilities:**

- Designed and Implemented integrations using FTP, SOAP, REST, Salesforce, ERP
- Developed 14 OSB services, used REST, Http and DB adapters. All OSB services are REST calls calling the pipeline and with the DB adapter call the EBS database.
- Oracle Application adapter which triggers the business event and JMS adapter for the message queue and REST calls to create and update cache in coherence.
- Continuously supporting the QA team and troubleshooting the issues immediately.
- Testing with EM, SOAPUI, Postman and Boomerang.
- Hands on experience with SVN, JIRA.

**EDUCATION:**

|                                                                              |                                                               |
|------------------------------------------------------------------------------|---------------------------------------------------------------|
| Bachelor of technology in Computer Science and Engineering (2007 – 2011)     | Gandhi Institute of technology and management – Visakhapatnam |
| Master of Science in Computer Science and Software Engineering (2014 – 2015) | University of Houston – Houston, TX                           |
