WORK EXPERIENCE

SiriusXM

Senior Specialist

Oct 2021 - February 2024

- Generated and distributed daily reports to LSP partners, ensuring timely delivery to business teams.
- Conducted data analysis using MS Excel, Power BI, and Python, enhancing insights and visualization through geocoding.
- Merged and cleaned datasets from diverse sources, ensuring data consistency and reliability.
- Led the migration of operational processes from Access to Power BI, improving accuracy and efficiency.
- Collaborated with cross-functional teams to streamline operations and provided leadership with actionable insights through detailed presentations.

Avensia Technologies

Data Analyst

Aug 2019 - April 2021

- Utilized statistical tools (SAS, R, Python) to conduct regulatory report analysis, delivering actionable insights.
- Extracted and analyzed SQL data, presenting findings through Excel pivot tables and impactful visualizations.
- Developed data visualizations with Tableau and Power BI, enhancing decision-making processes.

EDUCATION

Oakland University

Masters in Information Technology Management, Business Analytics - 3.64

September 2019 - May 2021

PROJECTS

- Transitioned operational data systems from Access to Power BI, achieving a 30% reduction in data processing time and enhancing accuracy and consistency.
- Published research in BioMed Central, providing valuable insights into COVID-19 dynamics and mitigation strategies, contributing to global public health knowledge.
- Designed and implemented automated reporting systems at Sirius XM, increasing reporting efficiency by 25% and streamlining decision-making processes.

SKILLS

- Proficient in Python, SQL, and DB query languages (Microsoft SQL Server, HTML, CSS)
- Experienced in Agile Scrum, Kanban, and Waterfall methodologies
- Skilled in data analysis and visualization (Power BI, Google Analytics, Tableau, MS Excel, Oracle)
- Adept with MS Office, G-Suite, Windows OS, and Linux OS.
