Summary

Frontend Developer with 3 years of experience in development, specializing in designing responsive and dynamic web applications. Proficient in JavaScript, React, HTML, CSS, and Agile methodologies. Strong background in collaboration, requirement gathering, and frontend testing using Jest and React Testing Library. Adept at creating reusable components, optimizing performance, and ensuring a seamless user experience. Focused on delivering high-quality products via continuous learning and application of industry, best practices.

Technical Skills

- Frontend Development:** HTML5, CSS3, JavaScript, React, JSX, Media Queries, Responsive Design, Tailwind CSS
- Frontend Testing:** Jest, React Testing Library
- Version Control:** Git, GitHub
- Tools & Technologies:** Visual Studio Code, Webpack, NPM
- Agile Methodologies:** Scrum, Sprint Planning, Jira, Confluence
- Collaboration:** Cross-functional team collaboration, Requirement gathering, Knowledge sharing
- Other:** API Integration (Email API), CSS Animations, React Hooks, Component-based Architecture

Professional Experience

- Frontend Developer, Capgemini

05/2024 – Present | Remote, USA

 - Worked on designing and developing a responsive personal portfolio website using HTML, CSS, and JavaScript, ensuring a seamless user experience across desktop, tablet, and mobile devices with media queries and responsive design principles.
 - Collaborated with a cross-functional team to gather requirements and ensure the website’s features aligned with user needs and personal branding objectives, focusing on clarity and engagement.
 - Developed reusable React components for various sections of the website, such as the navigation bar and contact form, optimizing the codebase for maintainability and scalability with JavaScript and React.
 - Integrated a functional contact form using React and JavaScript, enabling secure and real-time communication with an email API to streamline user inquiries.
 - Participated in Agile sprint cycles, adapting to evolving requirements, collaborating with team members, and delivering timely updates and features in a dynamic and fast-paced environment.
 - Conducted frontend testing using Jest and React Testing Library to ensure cross-browser compatibility, functionality, and responsiveness, delivering a polished and bug-free product to enhance user satisfaction.
- Associate Professional Software Engineer, DXC Technology

09/2021 – 05/2023 | Hyderabad, India

 - Spearheaded the implementation of a comprehensive unit testing framework, reducing software bugs by 40%, and contributing to a 20% reduction in support tickets and enhanced product stability.
 - Actively pursued continuous professional development through participation in workshops, webinars, and online courses, ensuring a consistent mastery of the latest technologies and industry best practices for improved software delivery.
 - Established and documented standardized testing procedures, ensuring a seamless software development lifecycle with consistent quality control and enhanced product reliability for all software products delivered.
 - Collaborated cross-functionally with developers and quality assurance teams to improve development workflows and troubleshooting processes, resulting in improved team productivity and faster time-to-market for key software releases.
 - Led knowledge-sharing sessions within the team to foster a culture of innovation and skill-building, empowering colleagues with the latest insights and contributing to overall team performance and collaboration.
- Content Associate, PRACTICALLY – An EDU App

03/2021 – 08/2021 | Hyderabad, India

 - Developed and curated high-quality educational content for Practically mobile app, producing over 20 pieces per month covering a broad range of academic levels and subjects to enhance user learning experiences.
 - Utilized a mix of visual aids, interactive simulations, quizzes, and gamified content elements, leading to a 25% increase in student engagement and an 18% improvement in comprehension and retention.
 - Collaborated with the marketing team to design and implement targeted content strategies, including email campaigns, blog posts, and promotional materials, contributing to a 30% increase in user acquisition.
 - Played a key role in improving user retention by developing content that resonated with students, contributing to a 25% increase in long-term app engagement and user satisfaction.

Education

- Master of Science, The University of Texas at Dallas

Information Technology and Management

05/2023 - 12/2024 | Texas, USA
- Bachelor of Technology, ACE Engineering College

Computer Science and Engineering

08/2017 - 08/2021 | Hyderabad, India

Academic Project Experience

- Abode

05/2023 – 08/2023

 - Spearheaded a transformative digital product initiative focused on redefining the roommate search experience for users
 - Applied user-centered design principles to ideate, design, and execute a platform streamlining the identification of compatible roommates through shared interests, preferences, and lifestyle factors
- Emotion-Based Music Player

08/2020 – 11/2020

 - Developed an emotion-based music player using Python, OpenCV, and Machine Learning, achieving an 85% accuracy in facial expression recognition for personalized music categorization
 - Enhanced user experience with tailored music recommendations, resulting in a 30% increase in user satisfaction and a 20% rise in user engagement based on emotional alignment with the suggested music

Leadership And Organizational Experience

- Student Platform for Engineering Education Development

10/2018 – 11/2018

 - Volunteered at a Run for Cause Event for 1000 people held by Street Cause India. Participated in a social cause teaching about health care benefits to rural areas. Educated people about healthy birth control safety and childcare by conducting campaigns
