LINKEDIN.COM/IN/ALBERT-KRUEGER-III

PROFESSIONAL SUMMARY

Accomplished military veteran with 10 years of service, including six years specializing in cyber offensive and defensive operations. Proven expertise in managing 24/7 Security Operations Centers and leading teams to secure and monitor complex networks, as well as designing Wi-Fi network topologies to facilitate advanced training simulations in penetration testing techniques. Certified in CompTIA Security+, CySA+, Network+, and A+, with hands-on proficiency in Wi-Fi equipment, protocols, and tools such as Wireshark for network traffic analysis and Security Onion for intrusion detection and vulnerability assessment. Dedicated to leveraging leadership and technical expertise to enhance organizational security and drive mission success. Holds an **active Top Secret//SCI clearance**.

CORE COMPETENCIES

Risk Management
Attention to Detail
Team Leadership

Critical Thinking
Data Analysis and Interpretation
Interpersonal Communication

Complex Problem Solving
Strategic Planning
Decision Making

CERTIFICATIONS AND TECHNICAL SKILLS

CompTIA CySA+
CompTIA Security+
CompTIA Network+
CompTIA A+

Threat Detection
Incident Response
Risk Management Framework
Vulnerability Management

Security Onion Suite
Wireshark
Google Rapid Response
Windows and Linux

PROFESSIONAL EXPERIENCE

United States Marine Corps

February 2015 – Present

Cyber Warfare Operator

March 2019 – Present

- Managed 24/7 Security Operations Center (SOC) operations within a Defensive Cyber Operations unit, streamlining shift transitions, optimizing task prioritization, and ensuring accurate operational reporting.
- Led teams in monitoring and securing tactical field networks, performing vulnerability assessments, and implementing RMF processes to exceed DoD cybersecurity standards.
- Developed and delivered dynamic training programs on Computer Network Exploitation (CNE), equipping personnel with skills in Linux fundamentals, virtualization, wireless security, traffic analysis, and advanced penetration testing.
- Designed and implemented Wi-Fi network topologies to simulate realistic traffic patterns for training in site surveys, heat mapping, and direction finding. Utilized Wireshark to analyze network traffic and identify vulnerabilities, providing students with practical skills in understanding and exploiting wireless network operations.

Data Collection Manager

March 2022 – December 2022

- Supervised 21 data collection assets producing tens of thousands of SIGINT-based events daily, ensuring timely and actionable intelligence for partner agencies.
- Organized and standardized data from central repositories, transforming raw inputs into structured reports for mission-critical operations.
- Solely responsible for conducting high-level analysis, identifying trends, and directing teams to adjust collection strategies for improved accuracy.
- Enabled successful combat operations by mapping and presenting critical data to intelligence agencies, influencing strategic decisions.
- Directed intelligence oversight activities, ensuring compliance with SIGINT policies and managing over 1,000 database queries.
- Supported 30+ combat operations, resulting in the elimination of high-value targets and seizure of illicit materials.

Administrative Supervisor

April 2021 – December 2024

- Led a diverse team of over 30 personnel, implementing systems to streamline daily schedules, track training requirements, and ensure operational readiness across the unit.
- Coordinated and executed multiple field exercises, managing all logistical requirements, operational planning, and administrative tasks to secure and optimize designated training environments.
- Streamlined access to mission-critical systems by managing Marine Corps Enterprise Network accounts, access requests, and training certifications, improving compliance and operational efficiency.
- Developed and deployed tracking tools to improve administrative accuracy, resulting in enhanced accountability and a significant reduction in scheduling conflicts.

Radio Transmission Systems Operator

February 2015 – February 2019

- Coordinated with cross-functional teams to integrate tropospheric transmission systems into larger operational frameworks, ensuring seamless communication across multiple units.
- Implemented and enforced TRANSEC and COMSEC protocols to safeguard classified information during transmission.
- Assisted in the design and deployment of communication infrastructures during field exercises, enabling real-time command and control for military operations.
- Trained junior operators on system setup, troubleshooting, and best practices, improving team proficiency and reducing error rates.
- Monitored and analyzed transmission signals to identify and resolve issues in communication pathways, ensuring uninterrupted network performance.

EDUCATION AND TRAINING

Western Governors University – Associate of Science in Cybersecurity and Information Assurance

March 2025

Focused on developing skills in cybersecurity policy, software assurance, network defense, and scripting through a certification-based curriculum. Program completion includes earning six industry-recognized certifications, demonstrating a strong foundation in cybersecurity principles and practices.

DOD Cyber Crime Center – Discovery and Counter Infiltration Course

December 2023

Advanced training in detecting and mitigating unauthorized network intrusions through real-world scenarios. Focused on threat hunting, malware analysis, and network forensics, with hands-on experience using tools like Google Rapid Response, FTK Imager, Sysinternals, Security Onion Suite, and Wireshark to enhance cyber incident response capabilities.

Information Warfare Training Command – Joint Cyber Analysis Course

May 2020

Comprehensive program in advanced cyber operations, covering programming, enterprise networking, and protocol analysis. Specialized in digital forensics, malware analysis, and defensive cyber operations. Gained practical experience with spectrum analysis and virtualization tools, preparing for key roles within the Department of Defense cyber mission force.

AWARDS

Navy and Marine Corps Achievement Medal

Awarded for exceptional leadership and technical expertise as Data Collection Manager. Coordinated a team across multiple sites to process high-volume data critical to mission success. Oversaw compliance, optimized workflows, and provided actionable intelligence, directly contributing to the elimination or capture of 40 high-value targets, the surrender of 200+ terrorist affiliates, and the seizure of \$20M+ in illicit contraband, 50+ electronic devices, and 40 IEDs. Ensured team readiness through effective training, operational oversight, and adherence to the highest standards of performance.
