

# Ali Yasir

**Visa:** Green Card (GC)  
**ADD.:** Jersey City, New Jersey - 07302, USA  
**PH.:** +1 (929) 997-5148 | **EMAIL:** yasir.ali@pyramidci.info

## Summary

- **4+ years of** Progressively responsible experience as **Data Analyst** in Data Engineering, Data Analysis, ETL, and Data warehousing, Business Intelligence background in Designing, Developing, Analysis, Implementation, and post implementation support of DWBI applications.
- Worked on architecting, designing, and implementation of large-scale data and analytics solutions on Snowflake Cloud Data Warehouse.
- Efficient in preprocessing data including Data cleaning, Correlation analysis, Imputation, Visualization, Feature Scaling and Dimensionality Reduction techniques using Machine learning platforms like Python Data Science Packages (Scikit-Learn, Pandas, NumPy).
- Well-Versed in analyzing data using Python, R and SQL. Demonstrated expertise in relational databases, with a proven track record of creating complex queries and performing optimizations using SQL.
- Skilled in extracting, cleaning, and transforming large datasets from various sources using SQL, Excel, and Python to ensure data accuracy and integrity. Strong technical and quantitative background, coupled with exceptional digital analytical skills.
- Proficient in synthesizing complex scenarios to develop impactful solutions, actionable options, and strategic action plans. Recognized for driving notable efficiency improvements and delivering significant business enhancements.
- Proficient in data visualization tools such as Tableau or Power BI to create compelling visualizations, dashboards, and reports.
- Understanding of Data Warehousing concepts, Data Analysis, Data Warehouse Architecture, and Designing.
- Collaborates effectively with cross-functional teams to understand business requirements and translate them into data analysis tasks.
- Strong attention to detail, ability to manage multiple projects and meet deadlines, while maintaining data integrity and quality standards.
- Highly skilled in Tableau Desktop for data visualization, utilizing various chart types such as Cross Map, Scatter Plots, Geographic Map, PieCharts, Bar Charts, Page Trails, Heat Map, and Density Chart.
- Good knowledge of designing stunning visualizations using Power BI software and publishing and presenting dashboards, Storyline on web and desktop platforms.
- Collaborated with cross-functional teams to design interactive Tableau dashboards, facilitating real-time performance tracking, and achieving a 30% reduction in reporting turnaround time.
- Working knowledge of Python Libraries like TensorFlow, Keras, Pandas, Scikit, NumPy, SciPy, Matplotlib, Seaborn, and OpenCV.
- Working knowledge of Amazon Web Services (AWS) and Cloud Data Management.
- Proficient in developing machine learning models like Regression, Random Forest, Association Rules, Support Vector Machine, Logistic Regression, kMeans, Clustering, Classification, SVM, and KNN.
- Utilized advanced Excel functions and VBA scripts for automated reporting, saving 10 hours per week and streamlining data-driven decision processes.
- Responsible for designing and building new data models and schemas using Python and SQL.
- Involved in developing python scripts, SSIS, Informatica, and other ETL tools for extraction, transformation, loading of data into the data warehouse.
- Building the Tableau dashboards to provide the effectiveness of weekly campaigns and customer acquisition.
- Responsible for loading the tables from the azure data lake to azure blob storage for pushing them to snowflake.
- Worked in all stages of Software Development Life Cycle (SDLC).

## Experience

### Data Analyst- Barclays | NJ, USA | OCT 2023 - PRESENT

- Implemented a predictive maintenance model using Azure Machine Learning to reduce equipment downtime by 25%.
- Experienced in statistical analysis using R and RStudio.
- Proficiently comprehended, extracted, and normalized large-scale advertising campaign datasets using SciPy, ensuring data consistency and quality.
- Conducted A/B tests and hypothesis testing to drive data-driven decision-making, leading to a 15% improvement in conversion rates. Created clear Power Point with data visualization results from R and Tableau and presented to customer service team
- Designed and implemented automated data workflows using Alteryx, improving data processing efficiency and accuracy. Reduced manual data processing time by 40% and minimized errors in reporting.
- Created interactive dashboards using Qlik Sense to visualize key business metrics, allowing stakeholders to make data-driven decisions.
- Migrated on-premises data to Google Cloud Platform, utilizing BigQuery for scalable data storage and complex queries.
- Conducted complex data analysis using BigQuery and SQL to identify trends, forecast financial outcomes, and optimize marketing strategies.
- Used Confluence to document project requirements, track progress, and collaborate with cross-functional teams. Built QlikView dashboards to visualize claims data, customer demographics, and sales performance.
- Experience in developing complex store procedures, efficient triggers, required functions, creating indexes and indexed views for performance.
- Excellent Experience in monitoring SQL Server Performance tuning in SQL Server.
- Expert in designing ETL data flows using SSIS; creating mappings/workflows to extract data from SQL Server and Data Migration and Transformation from Access/Excel Sheets using SQL Server SSIS.
- Developed a customer churn prediction model (logistic regression, SVM, Decision tree, Naïve bayes) using Python, PCA with 0.84 accuracy.
- Design, develop and execute high-impact analytics solutions.
- Experience with high volume, structured & unstructured data sets to help clients make better fact-based decisions.
- Involved in Application of various machine learning algorithms and statistical modeling like Regression, Random Forest, Association Rules, Support Vector Machine, Logistic Regression, k-Means, Clustering, Classification, SVM, KNN using python, and R.
- Flexible, enthusiastic, and project-oriented team player with excellent written, verbal communication and leadership skills to develop creative solutions for challenging client needs.
- Developed business metric dashboards on Looker by extracting terabyte-sized advertising datasets from Big Query. This enabled real-time tracking of key performance indicators (KPIs) and facilitated actionable insights to enhance mean time to resolution (MTTR) for research and production projects.

**Data Analyst- Humana | IL, USA | Remote | SEP 2022 – AUG 2023**

- Involved in complete Agile Requirement Analysis, Development, System, and Integration Testing.
- Worked on database design and query optimization, as well providing several periodic and custom reports, resulting in a 30% decrease in query execution time and improving database efficiency.
- Conduct ad-hoc data analysis requests and provide timely deliverables.
- Prioritize and manage multiple analytical tasks to meet project deadlines. Contribute to the development of data-driven strategies by providing insights and recommendations.
- Collaborated with team members to identify opportunities for leveraging data to drive business growth.
- Worked on architecting, designing, and implementation of large-scale data and analytics solutions on Snowflake Cloud Data Warehouse. Participated in collaborative team designing and developing a Snowflake data warehouse.
- Used visualization tools Power BI, Tableau, and SQL dashboard for the process of searching, exploring, and visualizing data.
- Analyzed spatial data to prepare an analysis report based on geographical regions.
- Actively stayed updated with the latest features and best practices in Tableau and PowerBI, to continuously optimize data visualization and reporting. Utilized NLP and DL techniques to obtain the medical code level vector embedding and converted the medical code vectors to patient level by probability-based weight averaging techniques.
- Provide training and support to users and stakeholders on Tableau and Power BI functionalities, enabling them to create self-service reports and dashboards.
- Stay updated on new features and best practices of Tableau and Power BI, implementing improvements to existing dashboards and reports.
- Ensured compliance with data governance policies, data security, and privacy measures while handling sensitive information within Tableau and Power BI.
- Collaborated with business stakeholders to provide ongoing monitoring status reports and enhancement recommendations for BI solutions. Created custom Tableau reports using SQL and advanced Tableau mapping techniques.
- Extensive experience in working with multiple data connections, blending data, and managing queries.
- Leveraged MS Azure cloud services to design and implement scalable and robust data solutions.

**Data Analyst – Vivma Software | Gujarat, India | JAN 2020 - JAN 2022**

- Collaborated with ETL developers, project managers, and QA teams, fostering effective communication and alignment throughout the development process.
- Delivered Tableau reports to stakeholders by automating jobs in Airflow and monitored performance.
- Built and deployed an NLP model for a virtual assistant using machine learning frameworks with large-scale medical datasets to predict symptoms. Designed and executed A/B testing on several models to analyze model performance.
- Applied advanced data visualization techniques and dashboard design principles, ensuring clarity and user-friendly experiences in BI reporting.
- Developed data wrangling through data gathering and querying process over SQL and implemented data cleaning process with Rand Python. Developed sales reports using the on-premises data on Microsoft Excel and Power BI.
- Utilized Power BI to create various analytical dashboards that help business users to get a quick insight into the data.
- Utilized RStudio for statistical analysis, data visualization, and exploratory data analysis (EDA).
- Assisted in the analysis and interpretation of data using R and RStudio, gaining hands-on experience in statistical modeling.
- Creating an aggregated report daily for the client based on the analysis of data given by the client and data available at the open data sources.
- Experiencing statistical methods, metrics, quantitative methods, and strategic project plans for data collection and later given the responsibility to validate the data integrity.
- Preparing scripts to automate the ingestion process using Python and Scala as needed through various sources such as API, AWS S3, Teradata and snowflake.
- Involved in developing and documenting the ETL (Extract, Transformation and Load) strategy to populate the Data Warehouse from various source systems.
- Developed & maintained statistical dashboards in Tableau to track bi-weekly sprint task progress based on KPIs (user stories, the accuracy of the products, resources, budget, etc.) increasing team efficiency by 20%.

**Education**

**Master of Science in Information Technology**  
Saint Peter's University, Jersey City, New Jersey, USA (February 2022 - August 2023)

**Bachelors of Electrical Engineering**  
Osmania University, Hyderabad, India (June 2017 - June 2021)

**Skills**

**Programming Languages and Platforms:** Python, R, C++, Java, Scala, SQL, Shell Script, FactSet, Bloomberg, Euro-monitor, Eikon, Merger Market, Dealogic, Factiva, S&P CapIQ, SNL, One Source and Zawya, Sublime, VS Code  
**Python Packages:** NumPy, Pandas, Matplotlib, SciPy, Scikit-learn, Seaborn, ggplot2, genism, NLTK, regex  
**Big Data:** Hadoop, HDFS, Yarn, Sqoop, Oozie, Hive, HBase, Spark, Kafka, Impala, Nifi, Cassandra, Apache Airflow, Databricks  
**ETL/ELT Tools:** SSRS, SSIS, SSAS, Informatica, Matillion, Azure Data factory, DBT  
**Databases:** MySQL, SQL Server, Snowflake cloud, SQL, NoSQL, MySQL, SQL Server DB2, PostgreSQL, Oracle, MongoDB  
**Tools/ IDE/ Build Tools:** PowerBI, Tableau, Talend Studio, Git, Git Bash, Eclipse, IntelliJ, Maven, ANT, Jenkins, GitHub, Jira, Snowflakes, Bitbucket, Data pipelines, QlikView, D3, Vega-Lite, Looker, Alteryx, QlikView, Qlik Sense, Alteryx Designer  
**Cloud Computing:** AWS (S3, CloudWatch, Athena, RedShift, EMR, EC2, DynamoDB), Azure (Azure Data Factory, Azure Blob, Azure Databricks), IAM, Secret Manager, S3, Lambda, CloudWatch, Messaging Queue (SNS & SQS), Azure - ADF, Blob Storage  
**Data Analytics Skills:** Data Cleaning, Data Masking, Data Manipulation, Data Visualization, Data Extraction, Data Mining, Data Exploration, Data Management  
**Data Modeling:** Star Schema, Snowflake Schema, ER Modeling  
**Cloud Platforms:** Google Cloud Platform (GCP), BigQuery, Google Cloud Storage, Cloud Functions  
**Machine Learning:** Classification, Regression, KNN, Decision Trees, Random Forests, XGBoost, ARIMA, FB Prophet, Ensemble  
**Deep Learning:** ANN, CNN, RNN, LSTM, BERT, YOLO, Deep SORT, SSD, GAN, SIFT, ResNET, Kalman Filter, Autoencoders  
**Image Processing:** Image Labelling, Image denoising, Image Morphology, Gaussian distribution, Otsu’s threshold  
**ML Tools/Framework:** PyTorch, Keras, TensorFlow, DarkNet, OpenCV, Spark MLlib, MXNet, Amazon ML. Azure ML  
**Version Control Tools:** Git, GitHub, SVN  
**File Formats:** Parquet, CSV, TXT, Avro, ORC, JSON, YAML, XML, JPEG, PNG  
**Operating System:** Windows, Linux, Unix, MacOS
