

PROFESSIONAL SUMMARY

As a highly skilled System Administrator with over 18 years of experience in Information Technology, I possess comprehensive expertise in managing, maintaining, and securing enterprise-level IT infrastructure. Proficient in Windows and VMWare operating systems, I have a proven track record of optimizing system performance, troubleshooting complex issues, and implementing innovative solutions to enhance operational efficiency. My strong knowledge in server and desktop administration, virtualization, and cloud computing allows me to effectively support and improve IT environments. Dedicated to continuous learning, I excel in adapting to rapidly evolving technologies and consistently deliver exceptional results in fast-paced, dynamic work environments.

SKILLS

Virtualization Technologies	Teamwork and Collaboration	Infrastructure Upgrading
Cloud Computing	Excellent Communication	

EXPERIENCE

System Administrator

Publix Employees Federal Credit Union (PEFCU), Lakeland, FL, August 2022 – January 2025

- Experience with Azure HI Stack setup and maintenance
- Maintain and upgrade all banks software such as various Jack Henry products (Synergy, Image Center, ARCU)
- Rooted out problems by benchmarking and routinely testing system performance.
- Hand on experience with Dell Xtreme IO, DataDomain
- Experience with VMWare System Recovery
- Knowledge and experience with ABCorp Evolve Platform for supporting printing debit and credit cards
- Working knowledge with Diebold ATM machines
- Understanding and knowledge of SMA Technologies OpCon product
- Experience with Azure Arc
- Microsoft Intune Administration (MDM), Meraki MDM and Apple MDM Experience for over 7 years
- Knowledge in Microsoft Data Loss Prevention and Window Defender.
- Managed user accounts, security group permissions and passwords.
- Resolved emergency issues quickly by maintaining organized spare parts inventory.
- Prevented data loss with regular backups and sound disaster recovery processes.
- Kept work and common areas neat and organized to maximize productivity, alleviate potential accidents and promote professional workspace.
- Identified issues and solutions to eliminate backlog and maximize workflows.

System Engineer

Eclipse Networks, Tampa, FL, April 2021 – August 2022

- Hands-on with Hyper-V (setup, VM migration and configuration), Microsoft Servers (2008, 2012/R2, 2016, 2019 and 2022) setup, configuration and migration.

- Office 365 new setup, configuration, and migration
- Some experience with PowerShell working within O365
- Experience in Datto Workplace and additional Datto products such as backup and SaaS
- Cisco Umbrella deployment and management
- Experience with Sentinel One AV Management Solution such as setup, migration, and configuration

System/Network Administrator

ACES (Computer Pros), Cedar Falls, IA, August 2006 - April 2021

- Experience and knowledge for over 13 years with: VMWare, vCenter, Hyper-V, Microsoft Servers (2008, 2012/R2, 2016 and 2019), Office 365 and Azure, Microsoft Office (2010, 2013, 2016 and 2019), Backup Exec System Recovery, Microsoft Exchange 2003, 2007, 2010 and 2013, Wireless Network Infrastructure (Meraki Certified), Axcient Backups, Windows Desktop OS (Windows 7, 8 and 10)
- Experience for over 13 years with network upgrades, server migrations, new and existing network implementations
- Quickly learned new tasks and rapidly resolved customer problems
- Great communication skills with leaders, team members and customers
- Highly proficient at multi-tasking to complete tasks quickly
- Server and desktop installation, migration, and configuration

EDUCATION

Associate of Applied Science in Computer Science: Computer Information System - Network Administration

Kaplan University College, Cedar Falls, IA, Mar 2006

- Graduated with 2.88 GPA on 3.6 scale

JOB TITLE

System Administrator

CERTIFICATIONS

- HIPPA Certified
- CompTIA Network +
- Meraki Wireless Management
- Axcient ACE
- ZCSE
- Apple MTC

PROJECTS

- While at PEFCU I was responsible for managing over 80 virtual servers, 10 VMWare hosts and Azure Environment. Along with many other responsibilities I oversaw upgrading servers OS and keep them up to date. Line of business apps upgrades, migration are often done and managed by system administrator. Among these projects I was also responsible for other projects mentioned in previous jobs as well.
- While at ACES I've had hands-on experience with VMWare such as building a brand new ESXi hosts, deploying new Windows and/or Linux based VM guests with ISO and OVA files as deployment images, upgrading ESXi hosts either through vCenter if vCenter exists or outside of vCenter. Installation of ESXi either to external device such as USB flash drives or directly onto specified partition for ESXi installation only. Migrating VM Guest from one host to another using vMotion. Patching hosts as needed and with scheduled down time if required.
- While at Eclipse Networks, I have done a lot of projects, server, and desktop migrations. Some projects and migrations include, migrating customers data, line of business applications and user directories from old server/hardware to new server and decommissioning old server hardware/software. Along with server migrations I've also done customers/users' desktop migrations which includes migrating users' data, line of business apps and desktop experience/view from one desktop to another. At Eclipse Networks I've successfully implemented and set up Datto Workplace sync between servers and clients. With little or no supervision, I'm able to migrate customers to Microsoft Office 365 platform and successfully deploy it. Successfully deployed products such as DUO 2MFA, Office 365 MFA and GSuite 2FA. At both jobs I have successfully set up Sentinel One AV portal and deploy installation agents to all client machines via GPO and RMM tools. Assemble server hardware, setup OS on that hardware and migrate customers servers from one host to another. Other projects I have done include setting up many educational devices such as Chromebooks, iPad and getting those devices connected to cloud management portals.
