- Accomplished SAP Program Manager with over 15 years of experience managing large-scale SAP data migration initiatives.
- Proven expertise in leading cross-functional teams, overseeing data extraction, transformation, and loading (ETL) processes.
- Specialized in migrating critical data to SAP S/4HANA, ECC, and other SAP environments, ensuring successful data transitions.
- Skilled in project management, stakeholder engagement, and risk management with a strong track record of delivering projects on time, within budget, and to the highest quality standards.
- Adept at driving alignment between business requirements and technical solutions in a fast-paced, complex environment.
- Techno-functional domain knowledge in ERP-SAP Business Warehouse, SAP HANA, S/4HANA, SAP migrations on Microsoft Azure, Microsoft DevOps Program Management and Microsoft Power Platform.
- Successfully supported multiple clients in diverse industries, including financial, manufacturing, and energy/utility sectors.
- Key achievement: Commercial cost optimizations and profit margin improvements through infrastructure optimization using AWS, Microsoft Azure, and ESRI servers, resulting in USD 1 million in Capex/Opex savings.
- Collaborative leader dedicated to partnering with coworkers to promote an engaged and empowering work culture.
- Proven track record in navigating multi-markets and establishing strong relationships with business owners and key stakeholders.

Skills

- SAP BW
- SAP BW/4 HANA
- SAP Analytics Cloud - SAC
- SAP migrations on Microsoft Azure
- Data Migrations for SAP S/4 HANA
- Microsoft Power Platform/Power BI Analytics
- Microsoft SQL

Certifications

- SAP - Accenture Certified (Accenture Internal)
- Microsoft PL-900 Power Platform Certification
- SAFe Agile Program Management Certification

Technical Skills

- SAP S/4 HANA
- Microsoft Azure
- Microsoft Power Platform
- SAP on Azure Deployment
- Microsoft Azure DevOps
- Data Analytics using Microsoft Power Apps and Microsoft Fabric

Professional Experience

Technical Program Manager PricewaterhouseCoopers

Apr 2022 – Mar 2025

- Designed and implemented custom data migration solutions and extensions in SAP S/4HANA to address client-specific requirements, following SAP's in-app and on-stack extensibility model.
- Led and executed integration testing and unit testing to ensure the smooth migration and deployment of data from legacy systems to SAP S/4HANA, minimizing disruptions.
- Ensured documentation compliance and reporting for business stakeholders, providing clear visibility into data migration progress and success metrics.
- Introduced faster delivery cycle by implementing agile sprints allowing incremental SAP migration execution.
- Reduced Risk by introducing Iterative testing minimizing cutover failures.
- Aligned with business through continuous collaboration ensuring process adoption.
- Implemented scalability that supported large, complex SAP migrations with structured Agile execution.
- Conducted SAP Readiness Check and BW object analysis for S/4HANA migration with engineering team.
- Provided guidance on BW data model transformation, migrating DSOs, Info Cubes, and Extractors to CDS Views and HANA Calculation Views.
- Assisted engineers in data cleansing, Unicode conversion, and SAP HANA sizing for performance optimization.
- Executed business process validation and performance tuning for Embedded Analytics.
- Guided in implementation of security, compliance, and role-based access control for reporting tools.
- Provided end-user training and post-migration hyper care support guidelines.

Engineering Manager Axtia Ingenious Insights

April 2020 – March 2022

Axtia is a pure play company into data analytics for healthcare industries.

- Conducted SAP Readiness Check and identified simplification items for migration.
- Managed custom code adaptation using ABAP Test Cockpit (ATC).
- Led data cleansing, Unicode conversion, and system sizing for SAP HANA.
- Implemented SAP Fiori enablement and role-based access controls.
- Executed end-to-end business process validation and performance tuning.
- Ensured compliance, security hardening, and disaster recovery readiness post-migration.

Engineering Manager – SAP on Microsoft Azure Microsoft

March 2018 – April 2020

- Led the migration of SAP solutions to Microsoft Azure for the Microsoft Supply Chain team, focusing on the end-to-end process of requisitioning, purchasing, receiving, paying for, and accounting for goods and services, ensuring a seamless integration with Azure cloud infrastructure.

- Analyzed data points for optimal migration strategy including Classical Migration and SAP Database Migration Option (DMO).
- Conducted a detailed SAP landscape assessment, including OS, DBMS, application versions, and dependencies along with engineering team.
- Identified the appropriate migration approach (Classical Migration or DMO).
- Defined RTO (Recovery Time Objective) and RPO (Recovery Point Objective) requirements.
- Assessed network connectivity and bandwidth requirements for migration.
- Validated Azure region selection based on latency, compliance, and business needs.
- Designed the target Azure architecture (VM sizes, storage types, networking, high availability, and disaster recovery).
- Assisted in installing and configuring necessary SAP and database software versions.
- Coached and mentored team members on best practices for Azure migration and SAP integration, fostering professional development and enhancing overall performance within the migration project.
- Implemented agile methodologies in program management processes, increasing team flexibility and responsiveness to the dynamic nature of SAP on Azure migrations.
- Managed cross-functional teams including cloud architects, developers, and SAP consultants, ensuring the successful migration of SAP systems to Azure, meeting both project deadlines and budget constraints.

Technical Lead **Mindtree**

Nov 2016 – Feb 2018

- Managed the Microsoft practice across multiple business verticals
- Primarily responsible for Microsoft Stor Simple Product Support for customers across different geographies adhering to the standard SOPs.
- Worked with a large account overlooking their BI practice and leveraging the industry best practices for SAP CoE, while setting up the production support processes through Live Site and Direct Responsible Individual (DRI)
- Handled a team of 10-12 developers adhering to the SLAs set for production support incidents.

Senior Consultant – SAP **Smart Metro Railway Transit**

Feb 2015 – Aug 2016

- SMRT Management recognized me as successful client coordinator who went above and beyond providing exceptional service and support and showed genuine integrity
- Strength was in staying across issues, pro-actively offering ERP and SaaS solutions and working closely with engineering team
- Roles & responsibilities covered
- Analyzing customer requirements and understanding their business drivers while articulating value-added solutions
- Conceptualizing, developing and implementing SAP on HANA
- Managing analytics projects & building business intelligence landscape using SAP systems
- Worked on SAP HANA Live Implementation with Business Objects Front End Reporting for SMRT end users.
- Implemented data-driven approaches for assessing project success, continuously refining processes based on insights gained over time.
- Managed cross-functional teams to ensure timely delivery of high-quality solutions for various project.

Senior Consultant – SAP **Client: Lanxess (formerly Chemtura Corporation)**

Apr 2013 – Oct 2014

- The assignment involved creation of Enterprise Data Warehouse and DataMart's for Global Business Services.
- Facilitated workshops with clients to identify pain points, establish goals, and define actionable steps towards achieving desired outcomes.
- Defined the architecture from functional and non-functional perspectives.

- Mentored junior consultants, helping them enhance their skills and contribute more effectively to projects.
- Worked closely with functional team to understand business requirements.

AtoS IT Solutions and Services

Client: Federal Home Loan Bank

Dec 2010 – Jan 2013

- Made independent decisions on user requirement specifications for SAP HANA migrations, with short to medium-term impact, leveraging precedence and established guidelines to ensure alignment with the HANA platform.
- Assisted the client in the selection, design, and implementation of SAP HANA, integrating data across the enterprise and transforming it into actionable business insights, driving decision-making in real-time.
- Leveraged extensive industry knowledge to provide insights into emerging trends and their impact on SAP HANA migration strategies, helping clients optimize their business processes on the HANA platform.
- Engaged with client partners and stakeholders within the Global Services Business line, ensuring alignment and collaboration for successful SAP HANA migration projects.
- Implemented data-driven approaches to assess the success of SAP HANA migration projects, continuously refining and improving migration processes based on insights gathered throughout the project lifecycle.

Consultant – SAP

Cognizant Technology Solutions

Jan 2010 to Nov 2010

- Collaborated with cross-functional teams to successfully deliver comprehensive solutions for clients.
- Managed client relationships through regular check-ins and updates on project progress.
- Evaluated client needs and expectations, establishing clear goals for each consulting engagement.
- Conducted risk assessments for business processes, recommending measures to mitigate potential impacts.
- Increased client satisfaction by developing comprehensive consulting strategies tailored to each business's unique challenges and objectives.

Associate Software Engineer

Accenture

Aug 2008 to Jan 2010

- Worked with business to scope the project and helped business users create Functional Specifications
- Enhanced standard extractors to fulfill the Business requirements
- Analyzed work to generate logic for new systems, procedures and tests.
- Inspected equipment, assessed functionality, and optimized controls.
- Developed conversion and system implementation plans.
- Translated technical concepts and information into terms parties could easily comprehend.

Education

Master of Computer Applications

Birla Institute of Technology Mesra, Ranchi, India

Aug 2005 – Aug 2008

Additional Information

Collaborative leader with dedication to partnering with coworkers to promote engaged, empowering work culture. Documented strengths in building and maintaining relationships with diverse range of stakeholders in dynamic, fast-paced settings.
