

Name: Anoop Reddy Konappagari
Ph: 9599998185
Email: reddyanoop19@gmail.com

PROFESSIONAL SUMMARY

- Having **10+ years** of extensive IT experience in all phases of **Software Development Life Cycle (SDLC)** which includes development, design, analysis, testing and Integration of various web based and client/server applications in multi-platform environments with **JAVA/J2EE** technologies.
- Expertise in developing **Web Pages** using **HTML5, CSS3, Bootstrap, JavaScript, jQuery, Ajax** and **Angular JS** with webpage cross browser compatibility and **Responsive Web Design** and have knowledge on Server scripting language like **NodeJS**.
- Implemented **Angular 6** services to connect the web application to back-end APIs to POST/GET the data used in the application.
- Worked as **SRE (Site Reliability Engineer)**, involved in improving the availability, latency, efficiency and making the application more resilient and reducing the TOIL items.
- Managed **Amazon Web Services** like **EC2, S3 Buckets, Dynamo DB, Elastic search, Virtual Private Cloud (VPC)** through **AWS Console** and **API Integration**.
- Experience in building **Micro Service** applications using **Spring Boot** for developing **RESTful Web Services**.
- Experience in verifying issues during **Production Support** and resolving those issues using **Splunk** and **Dynatrace**.
- Experience in Creating and configuring the continuous delivery pipelines for deploying **Micro services** and **Lambda functions** using **Jenkins CI** server.
- Experienced in developing web-based applications using **Java/J2EE, Servlets, Struts (Struts, Tag Libraries and Struts custom validation rules, Tiles), Spring IOC, Spring MVC, Spring AOP, Spring Security, Spring Boot, Spring Web Flow, Spring Data, JDBC, Spring Data Rest, Spring Data JPA, Web Services (SOAP & Restful services)** and ORM frameworks like **Hibernate, iBatis**.
- Experience in developing and deploying applications on **Cloud Platforms** like **Amazon Web Services** and **PCF**.
- Integrated java and Angular based application using **Elasticsearch** via Spring RESTful Controllers communicating to a java utility wrapper. Implemented a Continuous Delivery pipeline with **Docker, Jenkins and GitHub and AWS AMI's**.
- Excellent in developing **REST** and **SOAP** based **Web Services** using **JAX-RS, JAX-WS, WSDL, JAX-B, Apache Axis, Apache CXF** and **Jersey** frameworks.
- Experienced in implementation of **JMS** to exchange information over reliable channels in an asynchronous way by using **ActiveMQ, RabbitMQ, and Kafka** as message queue.
- Experience using **Hibernate** for mapping Java classes with database and using **Criteria API** and **Hibernate Query Language (HQL)**.
- Proficient in developing **RESTful** web services in **Python** using **XML, JSON**.
- Worked with **SQL** databases like **Oracle, My SQL, IBM DB2, Maria DB** and worked with memory database like **H2** and Hands on Experience in working with **NoSQL** Database like **MongoDB** to manage extremely large data sets also worked with Graph databases like **Neo4j**.
- Proficient in writing **SQL queries, PL/SQL stored procedures, Triggers** and **creating business tables**.
- Expertise in building **Microservices** and implementing **Spring Cloud- Netflix OSS Stack- Eureka and Hystrix Circuit Breaker**.
- Used **Feign Client, Retrofit** as declarative Http Clients. Hands on experience in working with **Junit5, Mockito and Selenium**.
- Experienced with deploying applications on to production servers, configuring various parameters of servers like **Apache Tomcat, JBOSS, BEA Web logic, IBM Web Sphere**.
- Creation of custom components, client libraries, **OSGI** services, deployments frameworks, querying and connecting to **DB** using **OSGI** bundles.
- Have experience in job scheduling tools like **Control-M** for automating IT processes.
- Used version controller tools like **Tortoise Sub Version (SVN)**, and **GIT**. I have experience in working with **IDES** like **Eclipse, Spring Tool Suite (STS), RAD, Visual Studio** and **IntelliJ**.
- Experience in developing applications using **SDLC** methodologies like **Waterfall, Agile (TDD, SCRUM)** and **Test-Driven Development**.
- Developed **Service Oriented Architecture (SOA)** and **Micro Service Architecture** based **J2EE** applications.
- Expertise in implementing **Design Patterns** like **Singleton, Factory, MVC, Front Controller** and **DAO pattern**.
- Expert in **Core Java** and implementing concepts like **Multithreading, Concurrency, Exception Handling, File handling, IO, Generics and Java collections** in various projects.

- Experience with **Java 1.8** features such as **Lambda** Expressions for making inline function calls by using Functional Interfaces which makes code readable and concise.

TECHNICAL SKILLS

Languages	C, C++, Java, J2EE, Python, SQL, and PL/SQL
Mark-up/XML Technologies	HTML5, CSS3, Bootstrap, JavaScript, jQuery, Ajax, AngularJS, NodeJS, XML, XSD, XSL/XSLT, SAX/DOM, DOJO and JSON.
Tools & Framework	Struts, Spring, Hibernate, Spring MVC, Spring Web Flow, Spring IOC, Spring AOP, Spring Security, Spring Data REST, Spring Data JPA, Spring Boot, JUnit, Apache CXF, SOAP UI, Google Web Toolkit, Jersey.
Build Automation	ANT, MAVEN, Jenkins, Gradle.
Web services	SOAP, RESTful, UDDI, WSDL, JAX-RPC, JAX-RS, JAX-WS, JAX-B, Micro services, Apache Axis and Apache CFX.
Cloud Technologies	Amazon Web Services (EC2, SQS, RDS, IAM, S3), Spring Cloud and PCF.
Web/App Servers	Web Sphere, Apache, Apache Tomcat, JBoss EAP, Web Logic Server and Apache Camel
Databases	Oracle, SQL-Server, IBM DB2, H2 and NoSQL DB like MongoDB, Neo4j.
IDE tools	Eclipse, Net Beans, Spring Tool Suite (STS) and IntelliJ IDEA, RAD, Adobe Dreamweaver, Visual Studio.
Testing Tools/ Others	Selenium, JUnit, Rational Clear Quest, RTC, Load UI and Mockito.
Version Control	Tortoise SVN, CVS, Rational Clear case, and GIT, Bitbucket
OS & Environment	Windows, Win 2k Server, Sun Solaris, UNIX, MacOS, Linux
Design Patterns	Singleton, Factory, MVC, Front Controller and DAO pattern.

PROFESSIONAL EXPERIENCE

Client: Jabil, Nicholasville, KY

Oct 2021 - Present

Role: Lead Java Developer

Responsibilities:

- Used **GEL** library to implement company specific User interface. Built reusable React components and integrated them with back-end APIs using RESTful web services. Created responsive web pages using **Bootstrap** and wrote client-side application in a clean Component based **React JS**.
- Built a Full-Service Catalog System which has a full workflow using Elasticsearch, Kinesis. Used different **NPM** third party modules in Angular application.
- Leverage the inbuilt React Js tool for creating frontend features.
- Used **Java8 JDK** in building the applications.
- Consumed **RESTful Services** with **Angular2 \$http Services**.
- Experience in Maintenance, Triaging issues, and Rollback customizations on **Elastic Path** products.
- Implemented custom plugins, extensions, and integrations to extend the functionality of **Elastic Path**.
- Developed **RESTful Web Services** with **JAX-RS** using **Spring Boot** and **Micro Services Architecture**.
- Implemented the application using **Spring IOC, Spring MVC, Spring Boot, Spring Security** and **Hibernate Template**.
- Used Spring Data Framework to use the features of **Spring JDBC** and **Spring ORM** classes like **JDBC Template** and **Hibernate Template** to perform the database operations by connecting to Data sources available
- Involved in batch processing using **Spring Batch framework to extract and load data from the database** into corresponding tables.
- Database built on **DB2 JSON DB** in non-structured format. This DB will be kept in-sync with the mainframe invoices Database using the **Data Integration Framework**.
- Used **Spring Kafka API** calls to process the messages smoothly on **Kafka Cluster setup**.
- Implemented **Spring boot microservices** to process the messages into the **Kafka cluster setup**.
- Strong experience and knowledge of real time data analytics using spark streaming Kafka.
- Implemented predefined operators in spark such as map, flat map, filter and all types of keys.
- Experience with **IBM WebSphere Application Server (5.0 / 6.0 / 7.0)** and **WebSphere MQ** and familiar with application servers, such as **JBoss**.
- Implemented user-friendly web-based applications using AngularJS, HTML5, CSS3, Bootstrap, Spring and MongoDB.
- Performed Data Migration between multiple environments using mongo dump and mongo restore commands.

- Experience in developing java programs at the Application side. Developed scripts to monitor health of Mongo databases and perform ad-hoc backups using Mongo dump and Mongo restore.
- Used **Jenkins** as build automation tool and responsible for **Continuous Integration (CI) and Continuous Delivery (CD)** process implementation using **Jenkins**.
- Implemented **Informatica recommendations**, methodologies, and best practices.
- Experience in resolving on-going maintenance issues and bug fixes, monitoring informatica sessions as well as performance tuning of mappings and sessions.
- Performed tool evaluation and feasibility to help in selecting suitable Automation tool for **RPA implementation**. Performed stress test for bot Scripts to prove the scalability and stability of **RPA code**. Used **GitHub** as Version Control tool and **IntelliJ** and **Eclipse IDEs**.
- Involved in various phases of the Software Development Life Cycle (SDLC) of the application, Requirement gathering, Design, Analysis, and Code development and understanding of business requirements and implementing the process using **Agile (Scrum)** methodology.
- Involved in the development of user interface using **HTML5, CSS3, JavaScript, Bootstrap, jQuery, Ajax, React Js**
- Developed modern web applications using React JS and Java technologies, including Spring Framework and Hibernate. Developed Kubernetes Pod definitions, Deployments, and Ingress definitions to trigger the deployments of the cluster on AWS
- Cloud environment using Kops. Installed and configured API servers, and Consul Clusters for service discovery.

Environments: Java 8, HTML5, CSS3, JavaScript, Bootstrap, jQuery, Ajax, React Js, REST web services, SOAP webservices, Spring Boot, Spring IOC, Spring DI, Spring MVC, Hibernate Template, Micro Service, DB2, Mainframe DB2, OAuth, Active MQ, JBPM, LMA Logging, Junit, Mockito, Gradle, Jenkins, GitHub, VersionOne, Micro Services, VM's, Eclipse and IntelliJ IDE.

Client: Starbucks, Seattle, WA

Feb 2018 - Sep 2021

Role: Sr. Full Stack Java Developer

Responsibilities:

- Worked on development and implementation of the **MVC** Architectural pattern using **Spring Framework** including **JSP**, and **Servlets**.
- Involved in implementing the **Micro Services** based on **Restful API** utilizing **Spring Boot** with **Spring MVC**.
- Used Web Services for creating rate summary and used **WSDL** and **SOAP** messages for getting useful plans from different modules.
- Implemented Core Java concepts like **Multithreading, Concurrency, Exception Handling and Collections** whenever necessary.
- Involved in design and development of the **Hibernate Domain Model** for the services. Worked on web services and associated business modules integration.
- Involved in writing **JSP** components. Used **JSTL** Tag library to create standard dynamic web pages.
- Worked on **XML** and **JSON** for transferring and retrieving data between different applications. Worked on generating the web services classes by using **Service Oriented Architecture (SOA), WSDL, UDDI and SOAP**.
- Worked in wide-area network to maintain all the device related data onto **MYSQL** database.
- Experienced in **RDBMS** such as **Oracle, Cassandra, MySQL**, and **IBM DB2** databases. Used **NoSQL DB** database **MongoDB** for proof of concept and having experience in create a **Stored Procedures** and having experience in Remote Procedure call (RPC) and **Redis**.
- Used **RabbitMQ** message broker to route messages to the clients across the cloud network.
- Experience in writing complex **PL/SQL** queries using joins, **Stored Procedures, Functions, Triggers, Cursors**, and indexes in **Data Access Layer**.
- Involved in identifying and implementation of different **J2EE design patterns** like **Service Locator, Business Delegate, and DAO**.
- Collaborated with testers and developers and prepared test plans for producing high quality software applications.
- Experience in using **JUnit** and building tools such as **MAVEN**. Worked on **Log4j** for logging errors, messages, and performance logs and **SVN** for version control.
- Worked on High level and low-level system design, planning, estimation, and implementation.
- Developed presentation layer using **JSP, HTML5, CSS3** and client validation using **JavaScript, JSON**.
- Used two-way data binding features of **AngularJS** to implement Data binding to bind various server controls to the data from database.
- Implemented animation and styling using **CSS3** and **jQuery**.
- Used **NodeJS** for building web applications with client-server architecture, where both can initiate communication in two-way connections and allow them to exchange data.

Environment: Agile Methodology, Java, J2EE, HTML5, CSS3, JavaScript, jQuery, Ajax, AngularJS, JSON, JSP, Struts, Micro Services, Spring, Hibernate, SOA, SOAP, WSDL, RabbitMQ, Multithreading, Concurrency, Exception Handling, JDBC, Oracle, Maven, JUnit, Log4j, SVN, JAXB, XML, Web Logic, Unix/Linux.

Client: Danaher Corporation, El Dorado Hills, CA

Dec 2016 - Jan 2018

Role: Java / J2EE Developer

Responsibilities:

- Used **Angular Forms** and Validators to create and validate complex user input forms, while implementing modular and reusable controller code following best practices using Angular controllers.
- Enhanced existing JavaScript code to take advantage of new **TypeScript** features, such as interfaces, Enums, and decorators, to improve the clarity and expressiveness of the codebase.
- Used **Node.js** to develop the back-end components and connect the application with the other web services.
- Built a Node server using Node.js and Express.js to populate data on the web page by retrieving it from a database.
- Implemented modules into Node.js to integrate with designs and requirements while optimizing the performance of the Node.js application.
- Implemented **J2EE** design patterns like Front Controller, Service Locator, DAO, and Session Facade.
- Developed stored procedures and triggers in the **Oracle database** to implement business logic, enabling calculations and updates to be performed on the tables.
- Handled response data from **SOAP** Web Services by utilizing XML, JSON, and jQuery to update the UI. Additionally, Interacted with Java controllers to facilitate the process.
- Worked with **Express.js** for the development of Soap web services and middleware configurations.
- Used **Java Messaging Services (JMS)** for the reliable and asynchronous exchange of important information such as payment status reports and parsing of JMS XML messages.
- Involved in building the code and deploying it on the **JBoss application server**.
- Developed and configured Jasmine test cases using the **Jasmine** testing framework to effectively test Angular controllers responsible for UI components.
- Implemented Agile (Kanban) methodology to foster collaboration, iterative development, and frequent feedback, resulting in enhanced productivity and successful project outcomes.
- Worked with **JAVA 8** features like stream API, Functional interfaces, Multithreading, Transaction management, Time API, Exceptional Handling, and Collection API.
- Developed dynamic and responsive Web pages from scratch using HTML5, CSS3, and JavaScript.

Environment: JAVA 8, J2EE, HTML 5, CSS 3, XML, Angular, JSON, JavaScript, TypeScript, jQuery, Node.js, Express.js, SOAP, Oracle DB, Jasmine, WebStorm IDE, JUnit, Mockito, Maven, SonarQube, JBoss, Java Messaging Services (JMS), Agile (Kanban).

Client: Netflix, Los Gatos, CA

July 2014 - Nov 2016

Role: Java Developer

Responsibilities:

- Used **AJAX** to dynamically load a portion of the page when it was not needed for reloading the entire page. Developed several **JSP** pages and **JSR** for displaying and processing Information.
- Building front end platforms using JSF and hibernate framework.
- Used **Java, J2EE** patterns like Model View Controller (**MVC**), Data Transfer Objects (**DTO**), Singleton, and factory patterns.
- Implemented **Spring IOC** Setter Method Injection and writing Spring Configuration **XML** file that contains declarations and another dependent objects declaration.
- Used Dependency Injection along with Inversion of Control (**IOC**). Developed UI navigation using **JSP** and **Spring MVC** architecture.
- Involved in various phases of Software Development Life Cycle (**SDLC**) such as requirements gathering, modeling, analysis, design, development, and testing using **Agile Methodology**.
- Implemented **GUI** using **HTML5, CSS3, JavaScript, and jQuery**.
- Used **multithreading** in programming to improve overall performance using **Singleton** design pattern in **Hibernate** Utility class.
- Worked on **Hibernate ORM** technology for database transaction with **MySQL** database and developed **HQL** queries for CRUD operations.
- Implemented features like logging, user session validation using **Spring AOP** module and **Spring IOC**.
- Used **Spring Batch** for batch processing of files and database.
- Wrote complex **SQL** queries, **PL/SQL** Stored Procedures for all the DML process.
- Deployed the application using **Apache Tomcat** web server.
- Developed services that are reusable and interoperable, based on **SOAP** and **RESTful**. Automated the build process by using **MAVEN** build tools. Installed and configured **Jenkins** for continuous integration.

- Designed and developed the application using the **Eclipse IDE**. Worked on creation of custom **Docker** container images, tagging, and pushing the images.

Environment: Java, J2EE, HTML5, CSS3, JavaScript, jQuery, Multithreading, Docker, AJAX, JSP, JSF, MVC, Hibernate, Spring IOC, Spring MVC, Spring AOP, Spring Batch, SQL, SOAP, RESTful, Apache Tomcat, Maven, Jenkins, Eclipse, Tortoise SVN, JUnit, Log4j, MySQL.
